STRATEGY FOR NEW INDIA @ 75

MODULE - 20

20

SWACHH BHARAT MISSION

OBJECTIVES

- Making India Open Defecation Free by October 2, 2019.
- Extensive behaviour change campaigns to change the attitude of people.
- Ensuring scientific solid and liquid waste management.
- Augmenting the capacity of local bodies.
- Eradicating manual scavenging.
- Creating an enabling environment for private sector participation.

20

SWACHH BHARAT MISSION

PRESENT SCENARIO

पेयजल और स्वच्छता मंत्रालय
MINISTRY OF
**DRINKING WATER AND
SANITATION**Ministry of Housing
and Urban Affairs
Government of India

Swachh Bharat Mission was launched on October 2, 2014.

It has two sub-missions:

- Swachh Bharat Mission (Gramin) for rural areas under the Ministry of Drinking Water and Sanitation.
- Swachh Bharat Mission (Urban) for urban areas under the Ministry of Housing and Urban Affairs.

Given the cross cutting impact of SBM, the Ministry of Drinking Water and Sanitation is the Nodal Ministry for SBM with several other ministries being actively involved in achieving its goals.

20

SWACHH BHARAT MISSION

नीति आयोग
National Institution for Transforming India

PRESENT SCENARIO

WATER & SANITATION RELATED ISSUES

- Water and sanitation related diseases continue to remain among the major causes of death among children under five years of age.
- In India, the under-five mortality rate is 50 per thousand live births as compared to the global average of 41.
- The lack of sanitation facilities leads to groundwater contamination and pathogen contamination leads to diarrhoeal diseases, resulting in malnutrition, stunting and death.

- Women, who do not have access to toilets, mostly relieve themselves under the cover of darkness, before dawn or after sunset.
- It is threat to their physical security and is also a cause of various diseases.

20

SWACHH BHARAT MISSION

PRESENT SCENARIO

SWACHH BHARAT MISSION (GRAMIN)

- As per Census 2011, only 32.7% of rural households had access to toilet facilities.
- Only 39% of households had access to toilets before the launch of the Mission.
- The rapid pace of construction is due to mass mobilization of resources and extensive behaviour change campaigns under the Mission.
- By March, 2018, the country achieved sanitation coverage of 81% in rural India.

20

SWACHH BHARAT MISSION

PRESENT SCENARIO

SWACHH BHARAT MISSION (URBAN)

- As of March, 2018, 47.04 lakh household toilets and 3.18 lakh seats of community/public toilets have been constructed against the Mission targets of 66.42 lakh and 5.08 lakh respectively.
- Hundred percent door-to-door collection of solid waste is achieved in almost 75% of the wards.
- Waste-to-energy production reached 88 MW and new plants that can produce 415 MW are under construction.

CONSTRAINTS

20

SWACHH BHARAT MISSION

**CONSTRAINTS
FACED BY THE
MISSION**

11 Tackling the problem of lagging states like Uttar Pradesh and Bihar.

10 Discharge of untreated effluent into rivers.

9 Insufficient number of dustbins, particularly in urban and peri-urban areas.

8 Lack of on-site treatment of waste by bulk generators.

7 Inadequate infrastructure for collection, transportation and processing of segregated waste.

1 Lack of availability of space for construction of household toilets in slum areas.

2 Issues regarding the operation and maintenance of community toilets.

3 Non-availability of water

4 Non-segregation of waste.

5 Sustaining the change in behaviour patterns among people.

6 Continued unwillingness of Urban Local Bodies to levy user charges.

20

SWACHH BHARAT MISSION

WAY FORWARD

1

EXPANDING THE SCOPE OF SBM

- 1) The concept of Swachhata needs to be integrated into hospitals, Govt. offices and other public establishments.
- 2) Where space is a constraint, community toilets with participation and ownership of stakeholders are to be constructed. However, the community should take care of operation and maintenance of community toilets.
- 3) Rural toilets with steep slope should be promoted in rural areas, so as to limit the water used for flushing.

20

SWACHH BHARAT MISSION

नीति आयोग
National Institution for Transforming India

WAY FORWARD

1

EXPANDING THE SCOPE OF SBM

(..contd.)

- 4) Bulk generators of waste should ensure on-site treatment of waste.
- 5) All drains/tributaries flowing to rivers should be covered with sewage treatment plants by 2022- 23.
- 6) Give higher monetary compensation and social security to rag pickers and small sanitation workers for segregating waste. This will help waste-to-energy plants as well as projects related to dry waste management and help reduce the burden on landfills.

- 7) Scope of SBM may be expanded to cover initiatives for landfills and plastic waste.
- 8) Increase the number of community toilets along the highways

20

SWACHH BHARAT MISSION

WAY FORWARD

2

INDUCING BEHAVIOURAL CHANGE

- 1) Plan intensive Behaviour Change Communication and Inter-Personal Communication campaigns beyond the target year of 2019.
- 2) Draw up a clear and concerted behaviour change communication campaign, specifically aimed at panchayats and cities that have shown slow progress towards ODF status.
- 3) Children should be made aware of sustainable waste management practices through suitable changes in the school syllabus.

20

SWACHH BHARAT MISSION

WAY FORWARD

2

INDUCING BEHAVIOURAL CHANGE

(..contd.)

Waste Segregation

The Need Of The Hour

- 4) Behaviour Change Communication should lay greater emphasis on encouraging people to segregate waste into wet, dry and hazardous waste right at the point of waste generation.
- 5) Promote disposal of kitchen and home waste at the local level through Resident Welfare Associations. A decentralized system of disposal of waste needs to be in place, especially in urban areas.

20

SWACHH BHARAT MISSION

WAY FORWARD

3

EXPEDITING CONSTRUCTION AND
LEVERAGING TECHNOLOGY

- 1) SBM should encourage the use of bio-digester technology. This will facilitate reduction in the time and cost incurred in laying sewage pipelines and constructing sewage treatment plants.
- 2) A special strategy should be adopted to expedite the construction of household toilets in Uttar Pradesh and Bihar.
- 3) Adopt the wiser use of twin-pit toilets. It is a low-cost technology that decomposes waste into bio-fertilizer.

20

SWACHH BHARAT MISSION

WAY FORWARD

3

EXPEDITING CONSTRUCTION AND
LEVERAGING TECHNOLOGY

(..contd.)

- 4) Promote the use of modular wet waste disposal machines for the disposal of bio-waste at the household level itself.
- 5) Cement and construction industry should be encouraged to consume material made of recycled Construction and Demolition waste. Fertilizer sector should procure compost produced out of organic waste.
- 6) Ensure the availability of adequate numbers of dustbins in public spaces in urban and peri-urban areas.

20

SWACHH BHARAT MISSION

WAY FORWARD

4

CHANGING GOVERNANCE AND PRACTICES

FECAL SLUDGE MANAGEMENT TOOLS

Why is waste to energy important?

- 1) Expenditure on bio-toilets/bio-digesters may be considered for concession from the Goods and Services Tax to encourage large-scale adoption.
- 2) Draft 5-year action plan to integrate Swachh Bharat Mission and Faecal Sludge Management (FSM) at the ward level in cities.
- 3) Waste-to-energy projects at present are not bankable in the absence of tariff orders by the appropriate authority. Companies that want to establish waste-to-energy plants should have tripartite agreements i.e. producer, concerned municipal body and electricity distributing company.

20

SWACHH BHARAT MISSION

WAY FORWARD

4

CHANGING GOVERNANCE AND PRACTICES

(..contd.)

- 4) Urban Local Bodies should be nudged to charge adequate user charges for collection and disposal of waste and maintenance of toilets. The user charges are as important as user charges for electricity and water.
- 5) Solid and liquid waste management projects should be covered under priority sector lending.
- 6) To maintain the ODF status of villages and cities, the Govt. should continue to monitor and undertake corrective measures for areas that might be slipping back from ODF status.
