GS - IV

12 QUESTIONS WITH MODEL ANSWERS

MODULE - 3

GS – I ... GEOGRAPHY (DYNAMIC)

- 1 Peri-urban areas should become the growth drivers for orderly absorption of migrants from rural areas. Comment. (150 Words)
- 2 The pull towards the Indian metros is highly skewed towards information technology sector than manufacturing sector during the past two decades. Analyse the reasons. Do you support the formation of such “islands of prosperity”? Argue with your viewpoint. (250 Words)
- 3 With Globalisation, Indian employment scenario became “most uncertain” and “unpredictable”. Do you agree with this statement? Give valid arguments. (150 Words)

GS – II ... SOCIAL JUSTICE & GOVERNANCE

- 4 The traits of poverty vary from State to State. Examine the fundamental differences in the traits of poverty between Gujarat and Bihar. What should be the differences in the policy imperatives of the respective State Governments? (250 Words)
- 5 India's Poverty Alleviation Programmes have the bias of "short-term gains" over "long-term sturdy outcomes". Do you agree? Give valid reasons to support your argument. (150 Words)
- 6 "Globalization has thrown certain sections into poverty / near-poverty". Elaborate the statement with specific recent examples. This downward mobility causes more mental agony than original state of poverty. Elaborate. (250 words)

GS – III ... ECONOMIC DEVELOPMENT

4

“Zero Budget Natural Farming has attracted both hope and scepticism in equal measure”. Elaborate the statement with the underlying reasons. What measures do you propose to make it acceptable to majority of the people? (250 Words)

5

“Farmers’ Producer Organizations hold the key not only for rising the farm incomes but also for making India nutrition secure”. How do you support this statement? (150 Words)

6

In independent India, “community rights over commons” has not attracted the required policy attention. Examine the benefits of granting “community rights over the commons”. What can be the probable challenges in achieving this objective? (250 Words)

GS – IV ...ETHICS & INTEGRITY

7

Analyse virtue and its applicability in Indian administration. (250 Words)

8

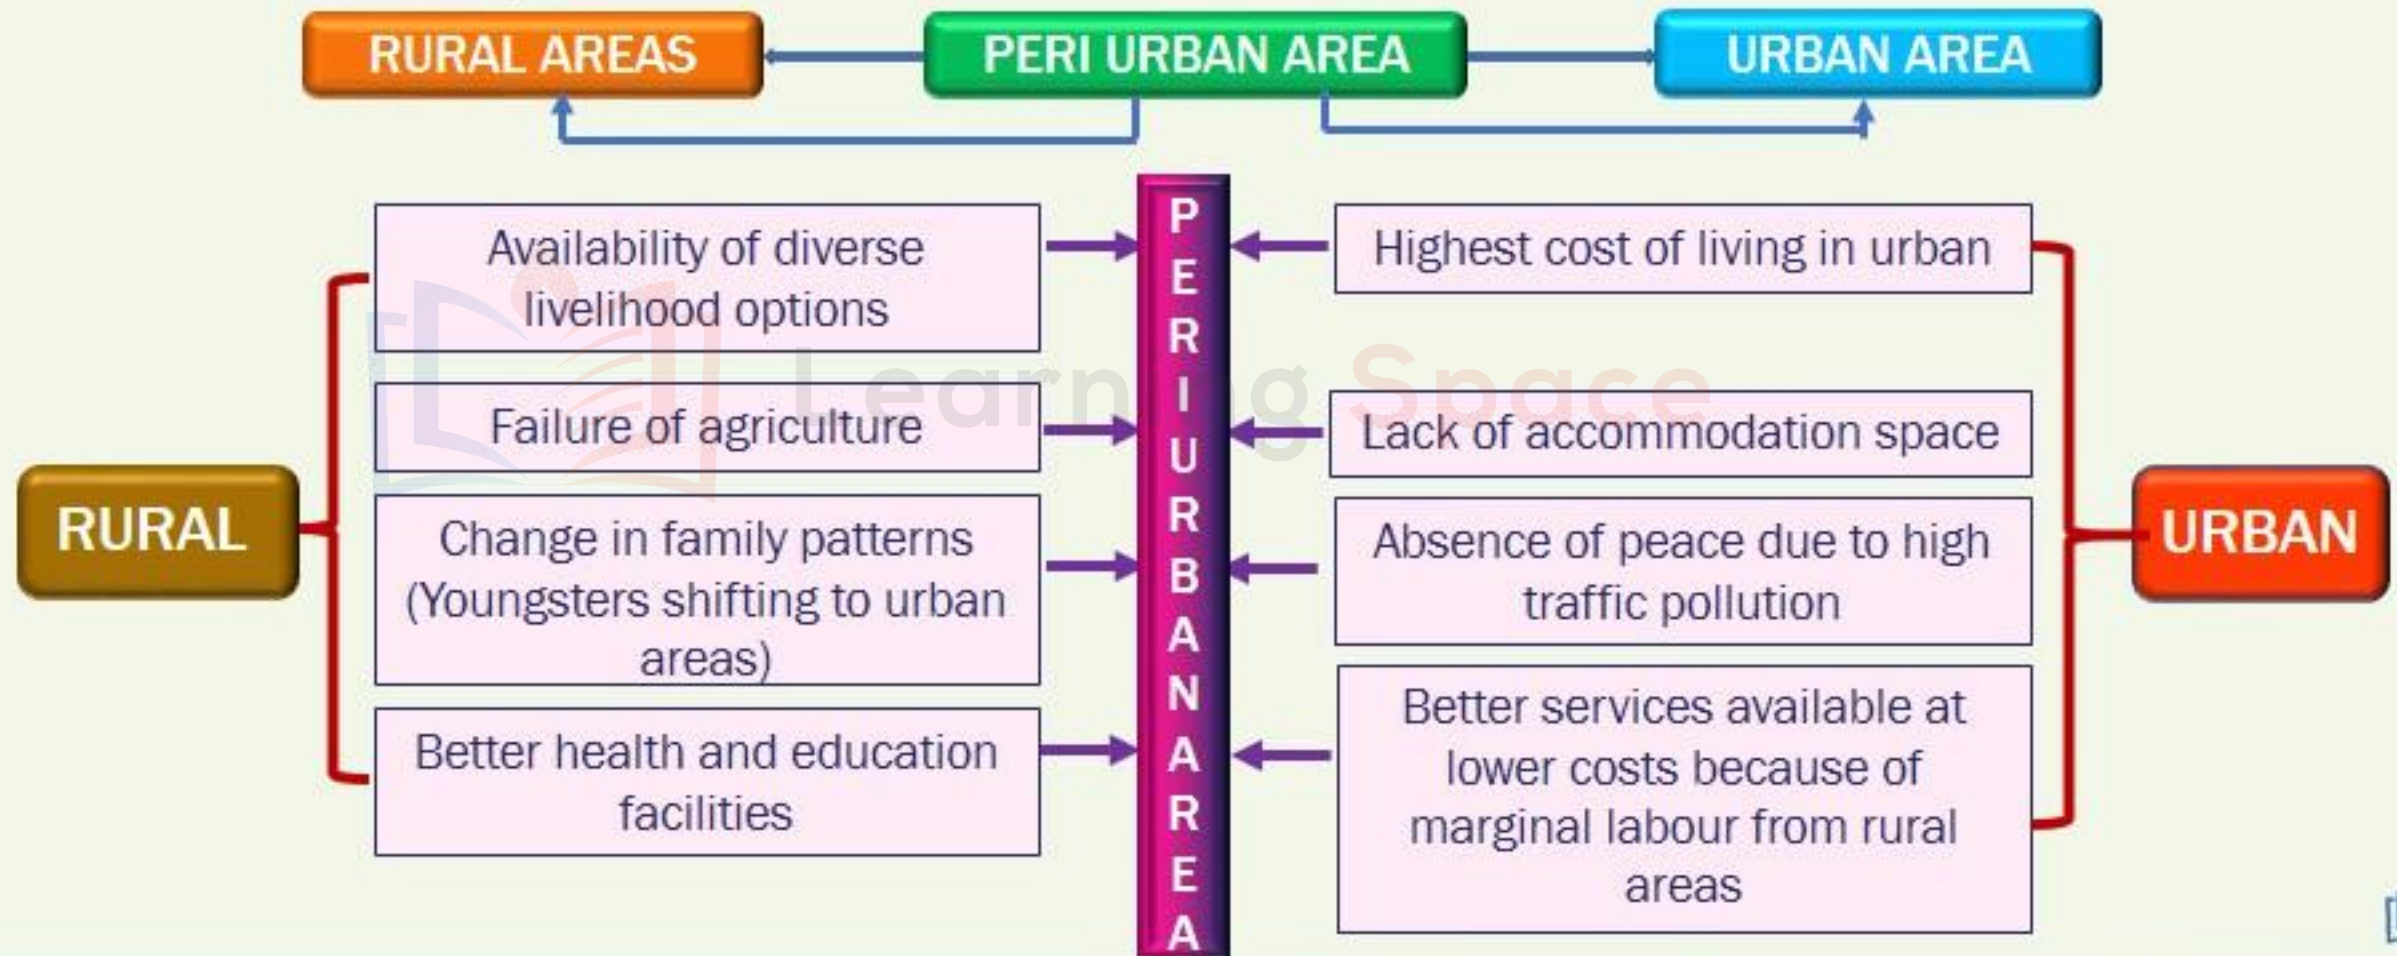

Can we separate ethics in public life and ethics in private life? Explain with specific examples. (150 Words)

9

What is Emotional Intelligence? Elaborate its role in administration. (150 Words)

Peri-urban areas should become the growth drivers for orderly absorption of migrants from rural areas. Comment. (150 Words)

Peri-urban areas are fringe areas of cities or adjoining rural areas which are intrinsically linked with city economy, and experience constant transformation with a mix of rural and urban activities.

PROBLEMS IN PERI-URBAN AREAS

1. LAND ISSUES:

- Lack of regulations on real estate and forced land acquisitions.

2. ADMINISTRATION:

- Administrative boundary is not clearly demonstrated.

3. DEMOGRAPHY:

- Native displaced people are not being rehabilitated.

4. ENVIRONMENTAL:

- Reckless construction of buildings without eco-friendly designs.

THEY CAN BE GROWTH ENGINES

Peri-urban areas play a major role in enabling orderly urbanization and socio-economic transformation of India. It needs:

- Migrant friendly administrative policies;
- Clear demarcation of administrative boundaries;
- Transparency in land regulation; and
- Adoption of integrated multimodal transport, smart governance, piped water and good sanitation etc.

The pull towards the Indian metros is highly skewed towards information technology sector than manufacturing sector during the past two decades. Analyse the reasons. Do you support the formation of such “islands of prosperity”? Argue with your viewpoint.
(250 Words)

Liberalisation and consequent reforms in 1990s triggered a structural shift in Indian economy. The economy transitioned to knowledge economy driven by services sector. It leapfrogged the intermediate manufacturing driven stage seen in developed economies. It resulted in concentration of metros as islands of prosperity.

REASONS FOR SUCH TRANSFORMATION

- Exponential advances in technology.
- Rise in per capita income and thereby demand for better services.
- Entry of new players in sectors like finance, telecom etc.
- New ways of conducting business with increasing computing power, data storage and transmission capacity.
- Government support in setting IT Parks.
- Failure in involving agriculture in globalization.
- Absence of local raw materials for manufacturing sector.
- Judicial ban on domestic mining disabled raw material for manufacturing.
- Complicated process of permits and labour laws resulting in underutilization of capacity.
- Increased import dependence for raw material in manufacturing.
- Globalization and e-commerce increased competition for domestic goods.

The “islands of prosperity” have become a new reality due to the bottlenecks to the manufacturing sector. However, the prosperity must be dispersed to achieve an inclusive and sustainable growth.

WAYS TO DISPERSE THE PROSPERITY FROM ISLANDS

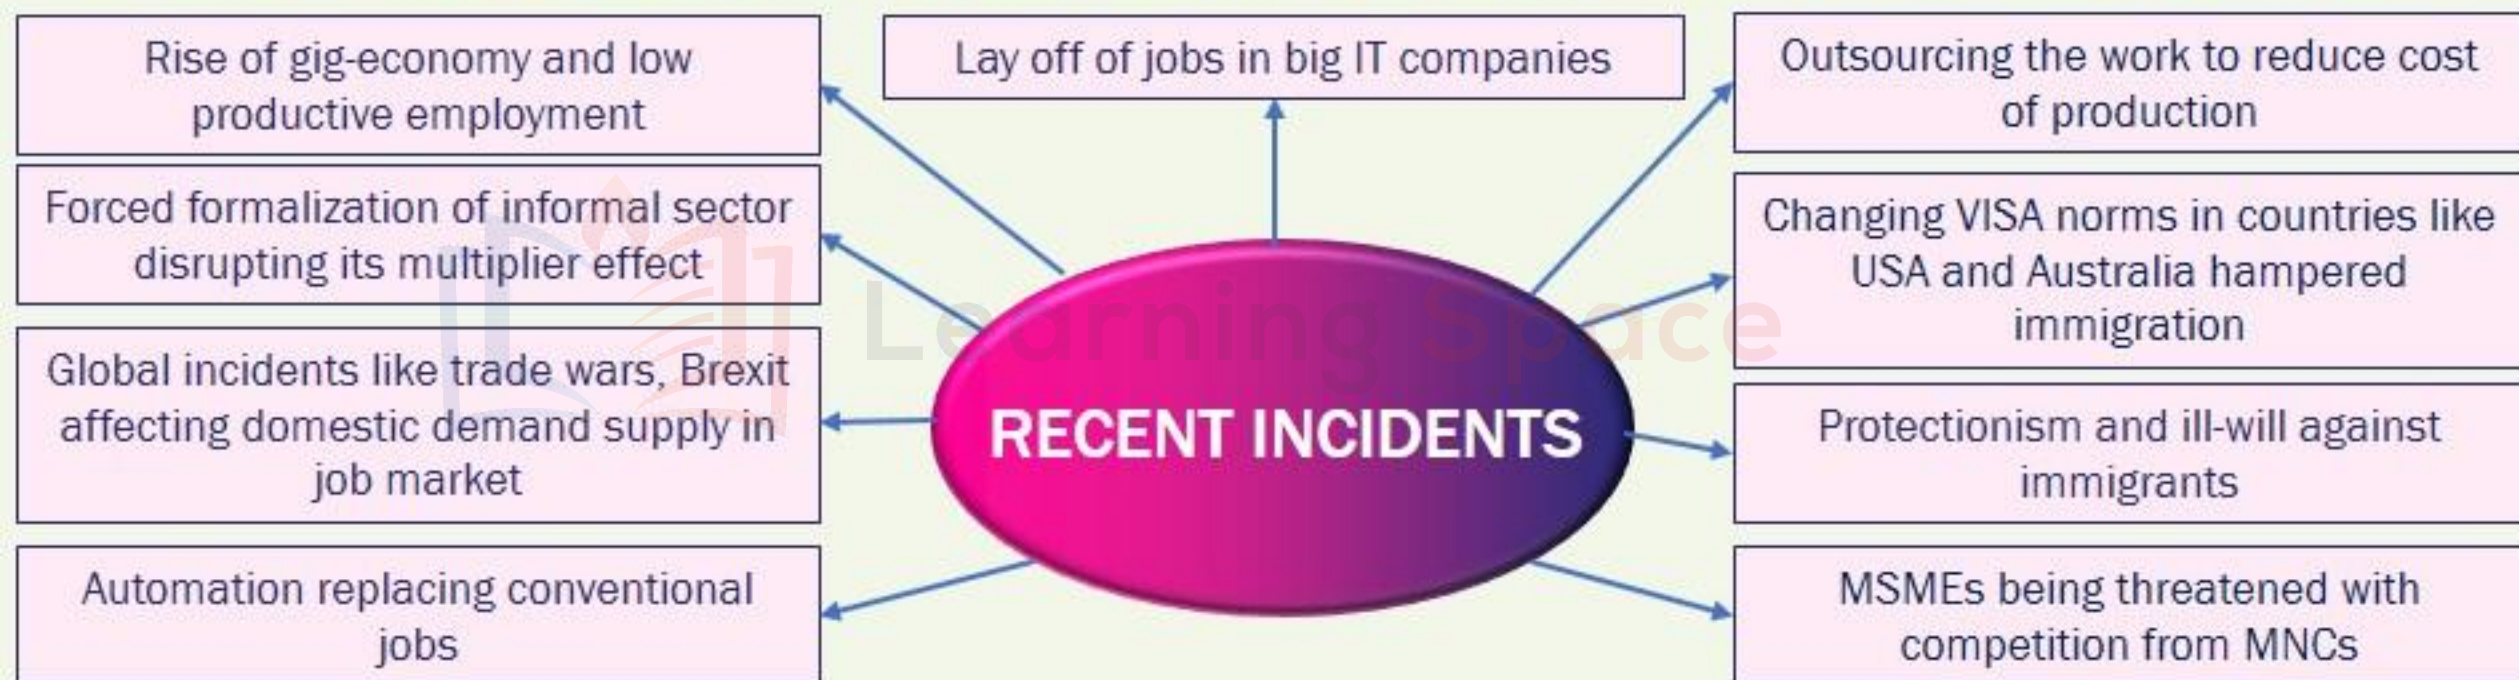

- Outsourcing services and backend jobs to rural areas.
- Diversifying farm incomes.
- Shifting of workforce from agriculture.
- Promoting MSMEs through credit and technology upgradation.
- Reforming labour laws and environmental laws.
- Enabling resource optimization and efficiency in providing domestic raw material.

FINALLY

There is no need to overlook our services prowess. The rapid growth in Indian services industry is not only sustainable but also poised to drive manufacturing in the country.

With Globalisation, Indian employment scenario became “most uncertain” and “unpredictable”. Do you agree with this statement? Give valid arguments. (150 Words)

Globalisation and third generation reforms in India resulted in employment driven by service sector. The later advancements in technologies like automation, digital transformation and needs for constant reskilling has changed the employment scenario to be uncertain. World Bank data analysis estimates that the proportion of jobs threatened by automation is at 69% in India.

CONCLUSION

Continuous upskilling and reskilling of Indian workforce in line with changing technologies is the need of the hour. Developing strong local economies as an insulation for job market from global uncertainties is necessary.

The traits of poverty vary from State to State. Examine the fundamental differences in the traits of poverty between Gujarat and Bihar. What should be the differences in the policy imperatives of the respective State Governments? (250 Words)

Causes and effects of poverty vary from state to state based on geographic, demographic and socio-economic situations of the state. This calls for state specific poverty alleviation measures.

TRAITS OF POVERTY

GUJARAT

- Driven by huge inequalities.
- Economic growth not transforming to human development.
- Poor health indicators mostly of lower section people.
- State growth is not participative.
- Caste hierarchy is a hurdle.
- Window of demographic dividend is less.
- Issues of immigration.
- Achievement in SDG-1 of poverty reduction is 48% (UNDP report, 2018).

BIHAR

- Huge population and orthodox social practices.
- Strong presence of caste hierarchy.
- Poor education and health infrastructure.
- Geographically more vulnerable to floods and cyclones.
- Window of demographic dividend is more.
- Issues of emigration.
- Achievement in SDG-1 is 45% (UNDP, 2018).

NEEDED DIFFERENCES IN POLICY IMPERATIVES

GUJARAT

- Invest more on upskilling existing workforce to prevent demographic crisis.
- Migration friendly policies
E.g.: Portability of social security schemes
- Schemes towards affordable and quality health care.
- Enable inclusive participatory governance.
- Shift of state funds from growth to development.
- Enhancing geriatric care services and elderly friendly policies.

BIHAR

- Invest on school, education, health and nutrition.
- Schemes like UBI to support the excluded, vulnerable sections of migration.
- Curbing evil social practices by empowering women.
- Greater implementation of food for work programs.
- Early disaster mitigation and resilience building policies.
- Shift of certain state funds to develop industries and improve employment opportunities.

WAY AHEAD

Bihar has to enable participatory, inclusive governance for achieving development and growth. But, Gujarat has to shift from growth obsession to growth as a means to development.

5 / SJ&G
GS - II

India's Poverty Alleviation Programmes have the bias of "short-term gains" over "long-term sturdy outcomes". Do you agree? Give valid reasons to support your argument.
(150 Words)

India's poverty alleviation programmes are part of five-year plans. They are adhoc, output based than outcome oriented. This resulted in a little success in alleviating poverty but only as short term gains.

REASONS FOR BIAS TOWARDS SHORT TERM GAINS**1. POLITICAL**

- Populist policies to attract vote bank.
- Short-term of 5-years for any government.

2. ECONOMIC

- Financial crunch due to wars, droughts and political crisis.
- Planning process is generic and not India specific.
- Larger focus on large industries and dams.
- Agriculture not involved in globalization and liberalization.

3. SOCIAL

- Absence of community participation and thereby political scrutiny.
- Lack of awareness among lower sections.

4. ADMINISTRATIVE

- Poor implementation of welfare schemes.
- Corruption and leakages in implementation.

WAY FORWARD

- Public policy making towards poverty should involve participation of all stakeholders.
- Social Audit should be mandatory in all poverty alleviation programs.
- Integrated India specific policies with convergence of education, health, nutrition and skills is needed.

6 / SJ&G
GS - II

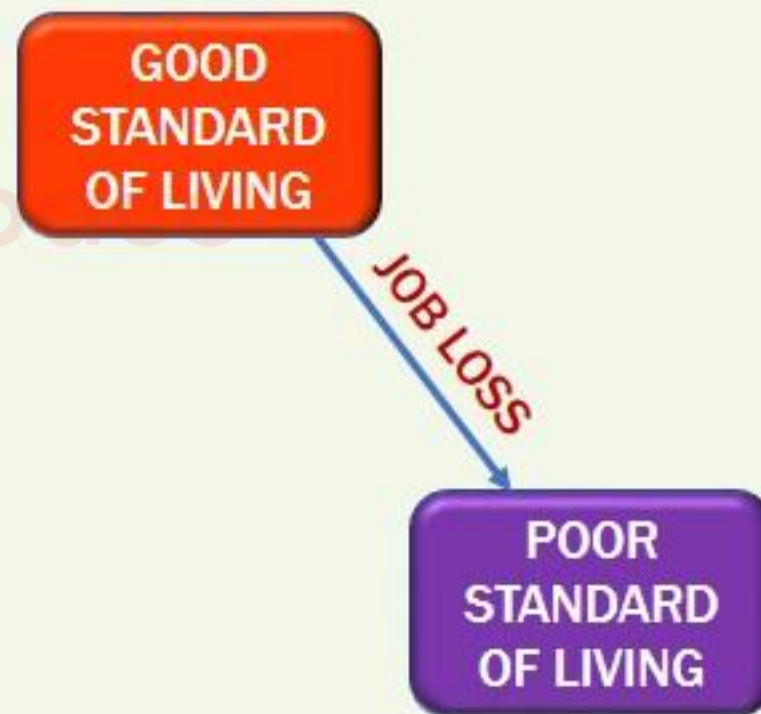

“Globalization has thrown certain sections into poverty / near-poverty”. Elaborate the statement with specific recent examples. This downward mobility causes more mental agony than original state of poverty. Elaborate. (250 words)

Globalisation has not only interconnected various economies but also variedly influenced livelihoods of various sections of people in these economies. This included pushing certain sections into poverty/near poverty.

RECENT EXAMPLES

1. Laying off by big IT companies like cognizant.
2. Global uncertainties and its impact on construction sector.
 - Many informal sector workers have turned jobless.
3. Unfair competition from foreign goods resulting in closure of small and micro industries.
4. Lack of domestic demand -
 - fall in sales of passenger cars
 - force companies to cut jobs to reduce costs

These incidents resulted in downward mobility in standards of living resulting in mental agony.

PSYCHOLOGICAL TRAUMA DUE TO DOWNWARD MOBILITY

WAY AHEAD

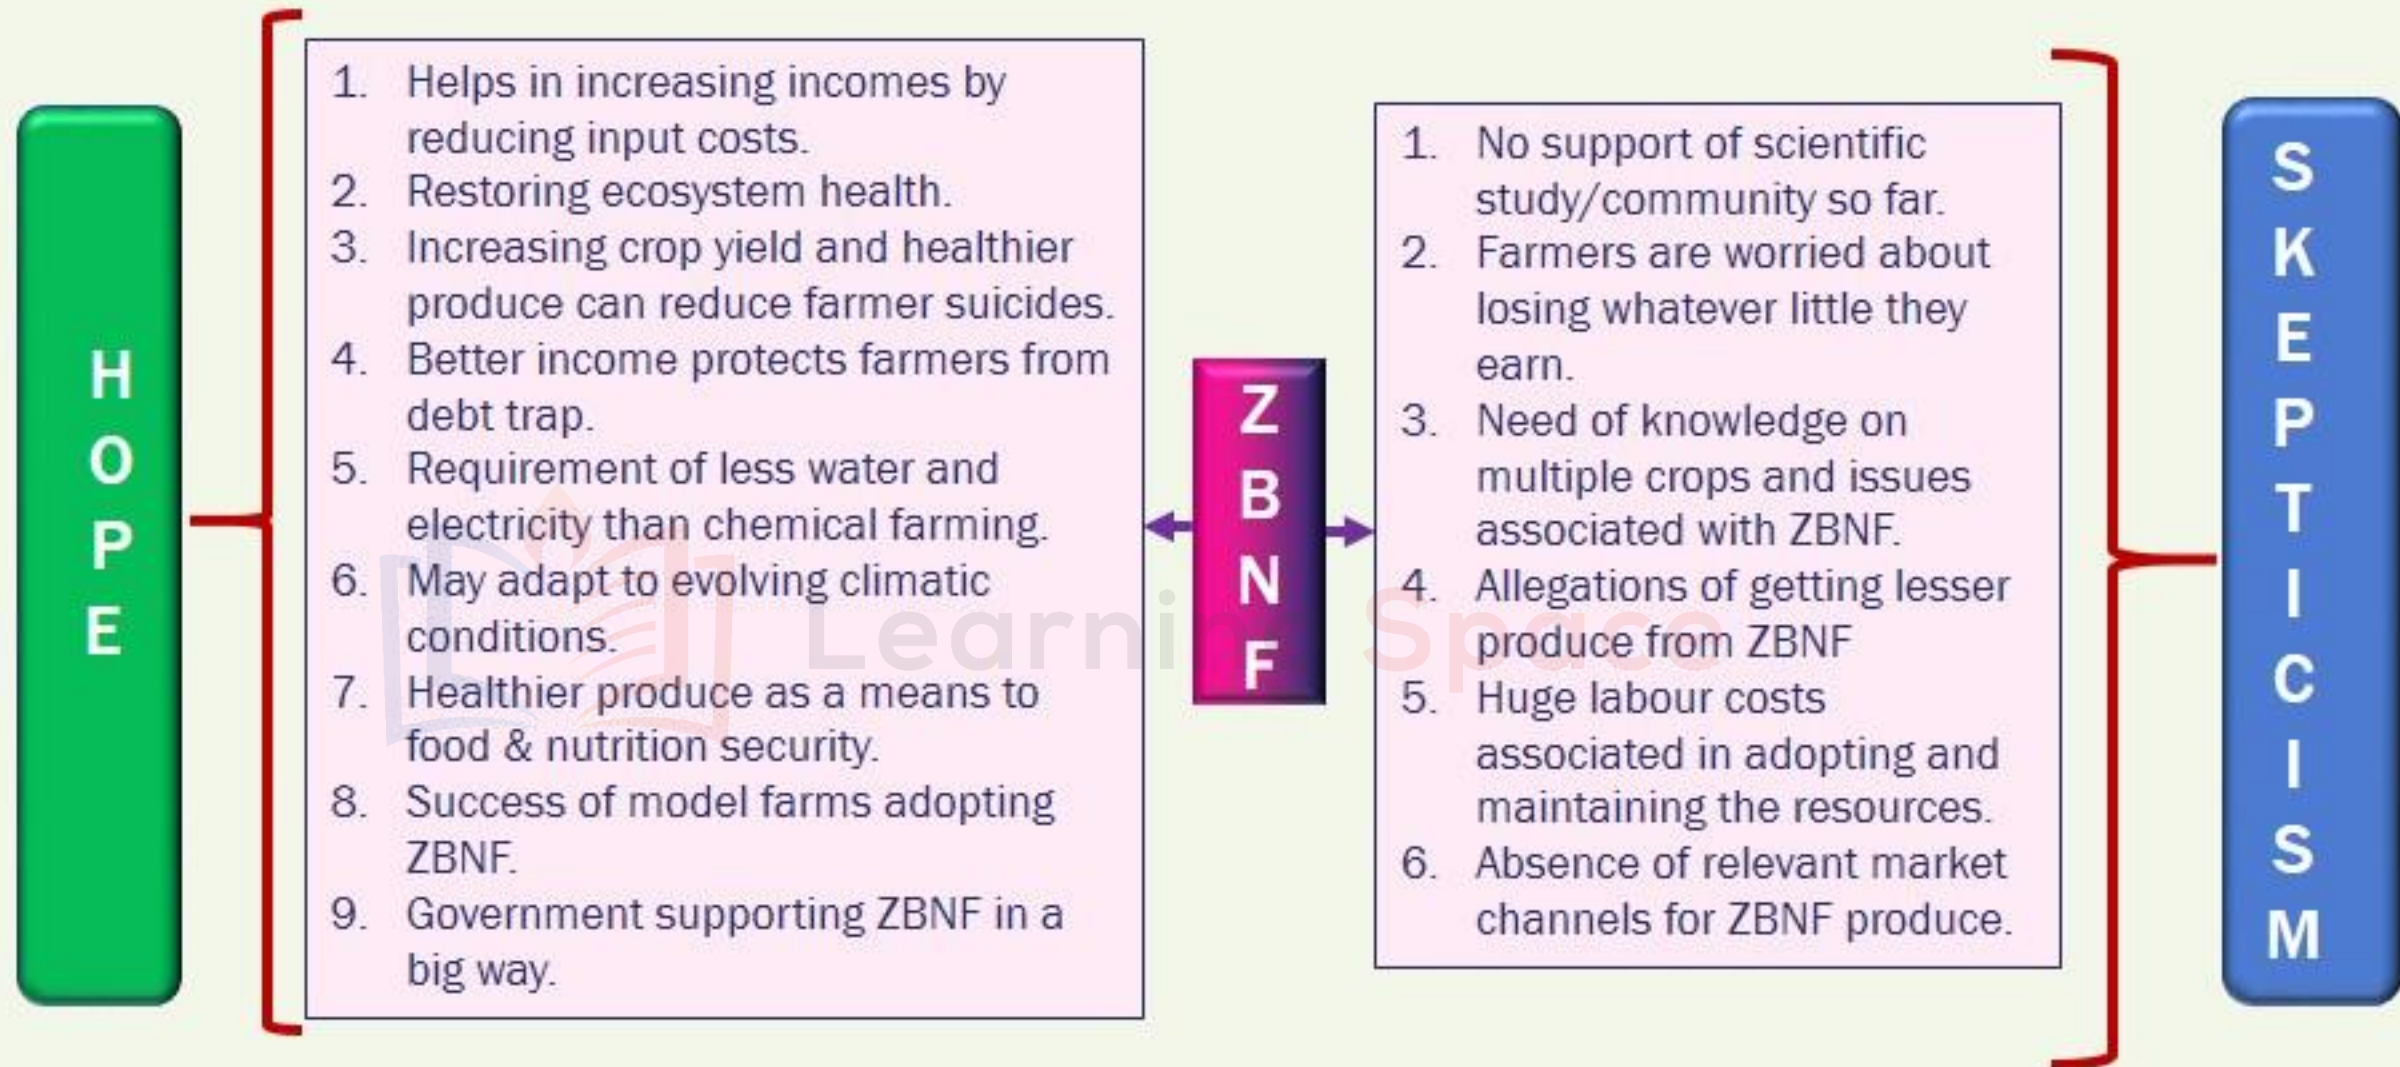

Continuous upskilling and reskilling in requirement to present technological advancements is necessary. Implementation of UBI conditionally by the government results in support during distress situations.

“Zero Budget Natural Farming has attracted both hope and scepticism in equal measure”. Elaborate the statement with the underlying reasons. What measures do you propose to make it acceptable to majority of the people? (250 Words)

ZBNF involves usage of local resources like cow dung, earthworms etc., making the overhead costs almost zero. It uses biological pesticides instead of chemical-based fertilizers. It has following components:

Though it gained popularity as a productive and nature friendly farming, skepticism disabled the wide-spread adoption among the farming community.

MEASURES NEEDED

CONCLUSION

Hand-holding of the farmers during the initial years is inevitable. Periodic monitoring and timely interference by the government along with farmers participation is the way to realize better farm incomes and food security.

5 / ED
GS - III

“Farmers’ Producer Organizations hold the key not only for rising the farm incomes but also for making India nutrition secure”. How do you support this statement? (150 Words)

An FPO, formed by a group of farm producers, is a registered body with producers as shareholders in the organisation. It is an effective alliance to collectively address challenges of agriculture. FPOs are important in increasing food security and nutrition for the poorest, as well as food production for local and global markets.

FPOs MAKING INDIA NUTRITION SECURE

1. Ensures quality and safety of the food system.
2. Encourage farmers to harvest nutrition rich crops.
3. Collaboration of agri-research agencies with FPOs.
E.g.: ICRISAT training FPOs in practices for millets.
4. Increases resilience of communities to withstand ‘shocks’ such as natural disasters.
5. Improve market linkages, value addition
6. FPOs can demand better price for their produce thereby promoting them to harvest millets etc.
7. FPOs can be a means to co-operative farming which results in increased productivity and food security.

WAY AHEAD

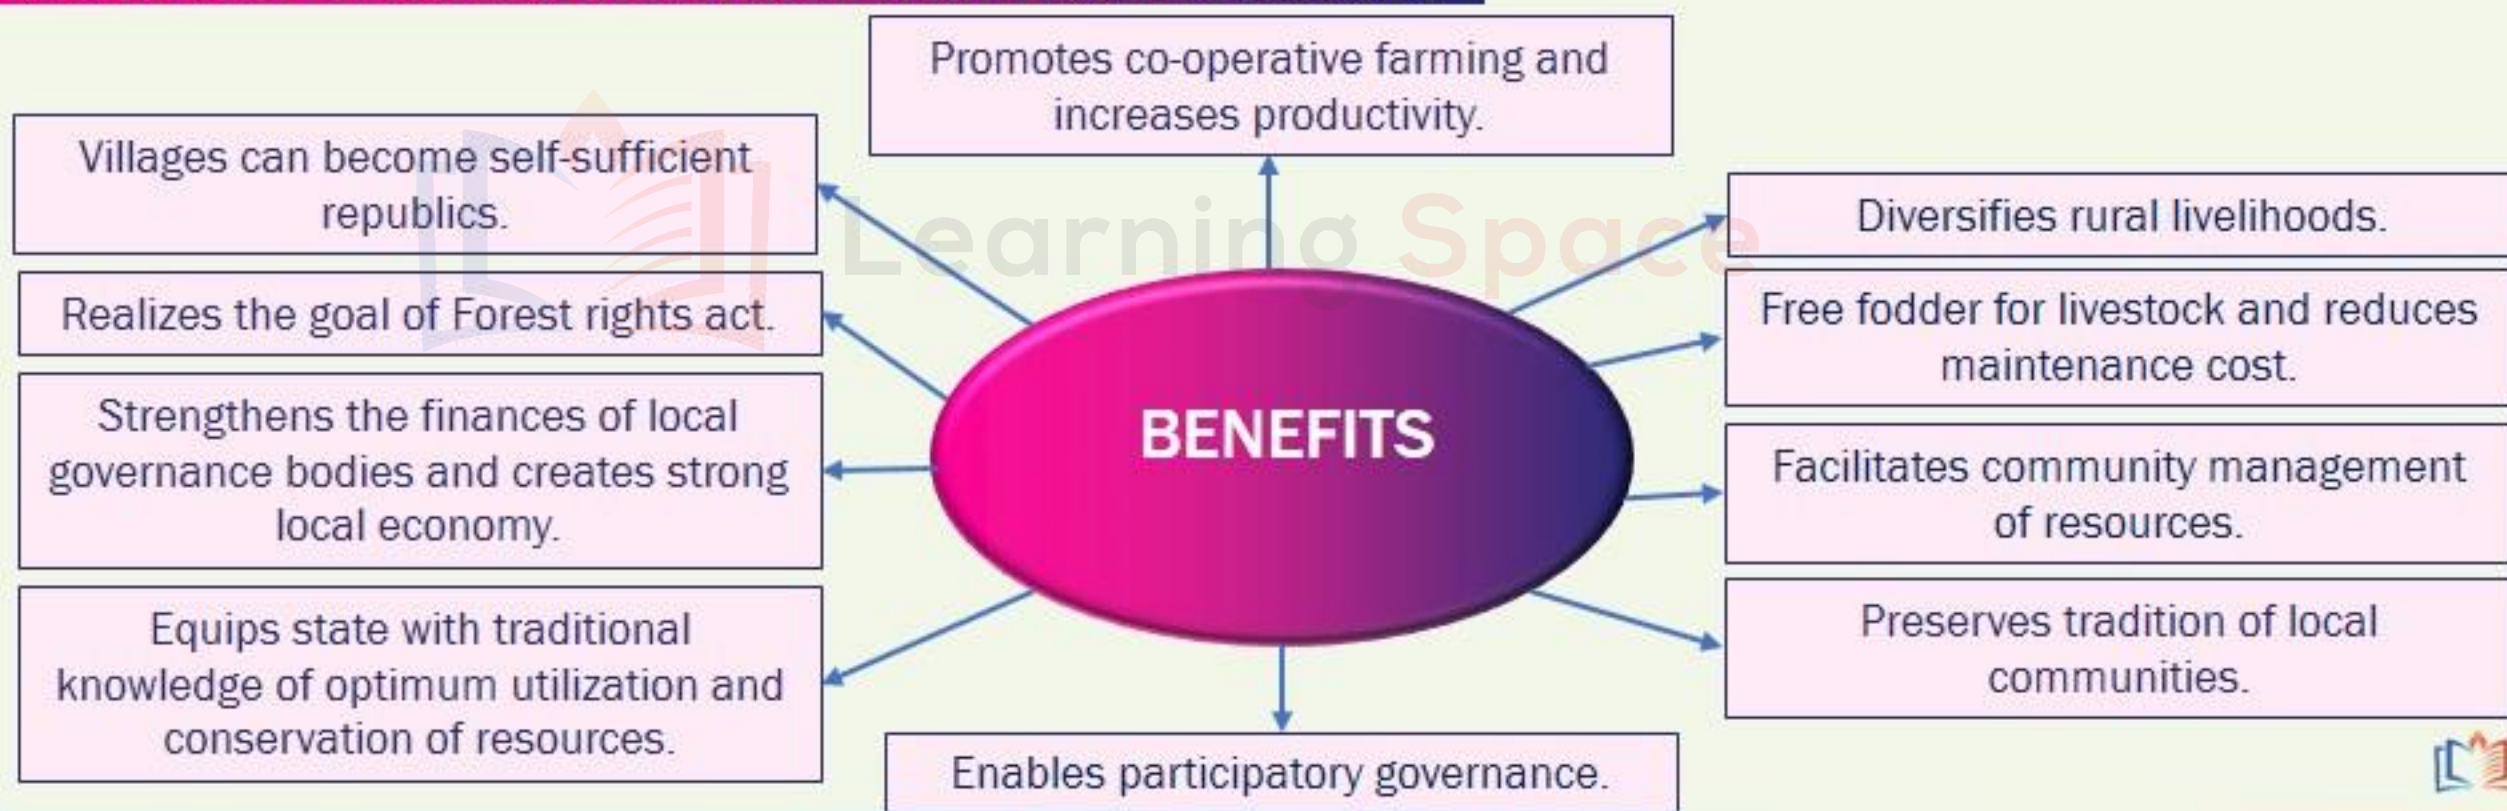

Banks can persuade farmer groups to adopt nutrient rich crops at the time of providing credit. Linking farmers to markets and strong value chains from farms to consumers has to be focused in policy making.

6 / ED
GS - III

In independent India, “community rights over commons” has not attracted the required policy attention. Examine the benefits of granting “community rights over the commons”.
What can be the probable challenges in achieving this objective? (250 Words)

Commons are non-exclusive resources to which rights of use are distributed among a number of co-owners like community members, villages etc. They include community forests, common grazing grounds etc.

BENEFITS OF GRANTING COMMUNITY RIGHTS OVER COMMONS

CHALLENGES IN ACHIEVING THE OBJECTIVE

1. LEGAL:

- Indian legal system is based on common law system which includes
 - **Principle of eminent domain:** State is owner of all natural resources contrary to community rights.
- Laws like PESA act, Forest rights act are not fully inclusive.
- Conflicting laws of forest rights and environment protection.

2. EXECUTIVE:

- Privatization of community resources depriving livelihoods of locals.
- Lack of bureaucratic will.

3. SOCIAL:

- Caste disables co-operative farming and equality in using common resources.
- Lack of awareness among the locals towards Social audit etc.

4. ECONOMY:

- Need of mining etc. to get raw material for industry.
- Exploration of minerals to enhance economy.
- Destroying commons to make lands for agriculture.

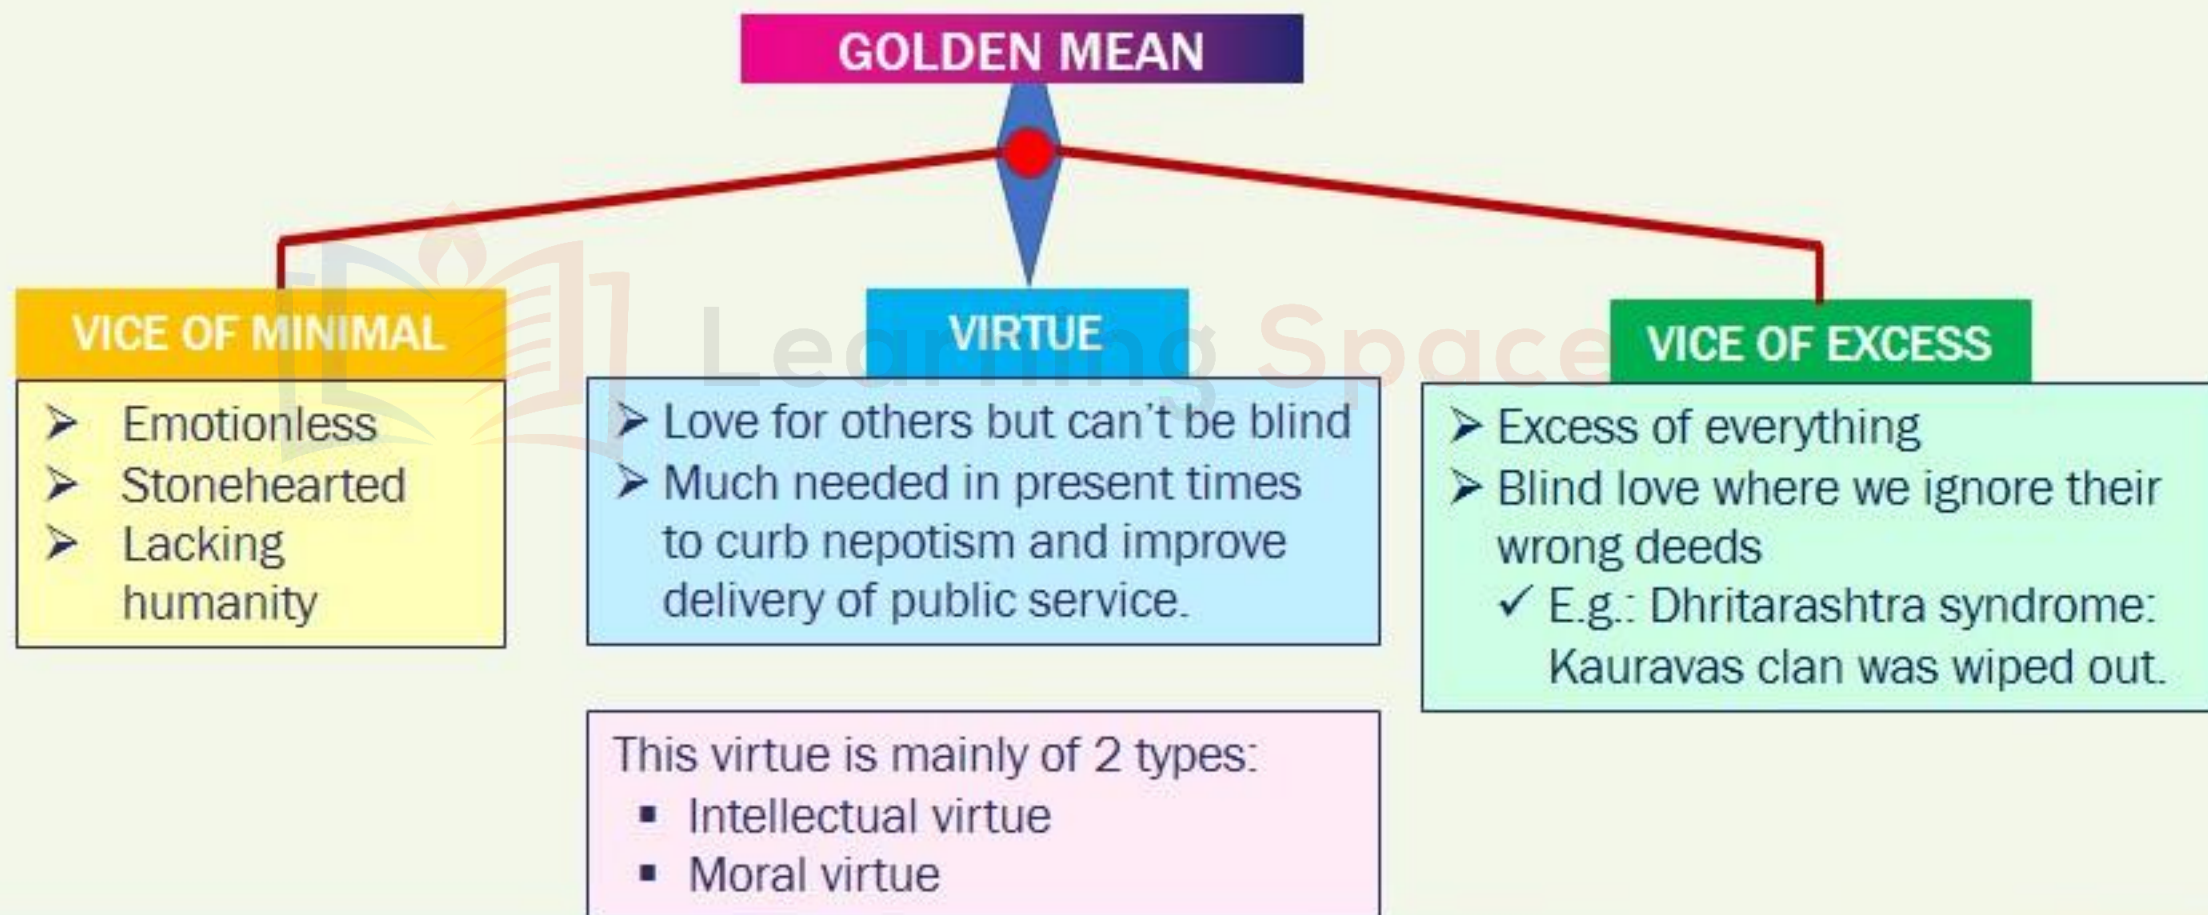

IN SUMMARY

Strict implementation of Social audit and specific laws that expand the scope of community rights over commons is the need of the hour. People are to be made aware to co-operate beyond any divisive line to engender strong local economy.

Analyse virtue and its applicability in Indian administration. (250 Words)

According to Aristotle, happiness comes from being perfect. Perfection comes from possessing certain virtues. Virtue is a golden mean between 2 vices i.e., vice of minimal and vice of excess.

1. INTELLECTUAL VIRTUES**1. WISDOM:**

- Application of knowledge in real life. It is as important as learning theoretical knowledge.
- E.g.: In India, everyone knows that taking bribe is vice. But, they fail in its practical application.

2. PRUDENCE:

- Need to consider facts, look at a situation and then take decisions.
- E.g.: In India, decision making is more emotional. It influences delivery of justice and public services.

3. RATIONALITY:

- Ability to make arguments based on logic, reason and proof.
- E.g.: The Argumentative Indian becomes emotional, sentimental resulting in irrationality.

4. INTUITIVE INSIGHT:

- It comes from knowledge and experience.
- E.g.: Civil servants should spend more time in the field than in offices to get cutting edge experience.

2. MORAL VIRTUES

- Intellectual virtues help in developing moral virtues. It is the ability to analyze means and consequences and resist temptation towards bad.
- E.g.: Civil servants should have moral virtue to resist corruption, promotion and status etc.

IN A NUTSHELL

Intellectual and moral virtues enable probity in governance. The virtue guides individuals in the right direction in times of dilemmas.

Can we separate ethics in public life and ethics in private life? Explain with specific examples. (150 Words)

Ethics in private life is as important as ethics in public life. Also, practicing ethics in private life is like a 'net practice' while practicing ethics in public is like a 'real cricket match'. But, there are proponents who seek to separate private and public life.

RELATION BETWEEN PRIVATE LIFE AND PUBLIC LIFE

LIBERALS

- Both are separate.
- As long as an individual is professionally efficient, one shouldn't get into their personal lives.
- It is one's right to live the personal life the way they want.

CONSERVATIVES

- Both are interrelated.
- Public life is often shaped by private life.
- E.g.:
 - ✓ District collector having no respect for poor can't implement government welfare programs efficiently.
 - ✓ An alcoholic administration can't implement prohibition of liquor.

RECENT EXAMPLES

1. Individuals in Indian defense forces with weakness for women resulted in leakage of sensitive information to enemy state.
2. A Minister having the same trait resulted in abuse of minor girls in shelter homes.

CONCLUSION

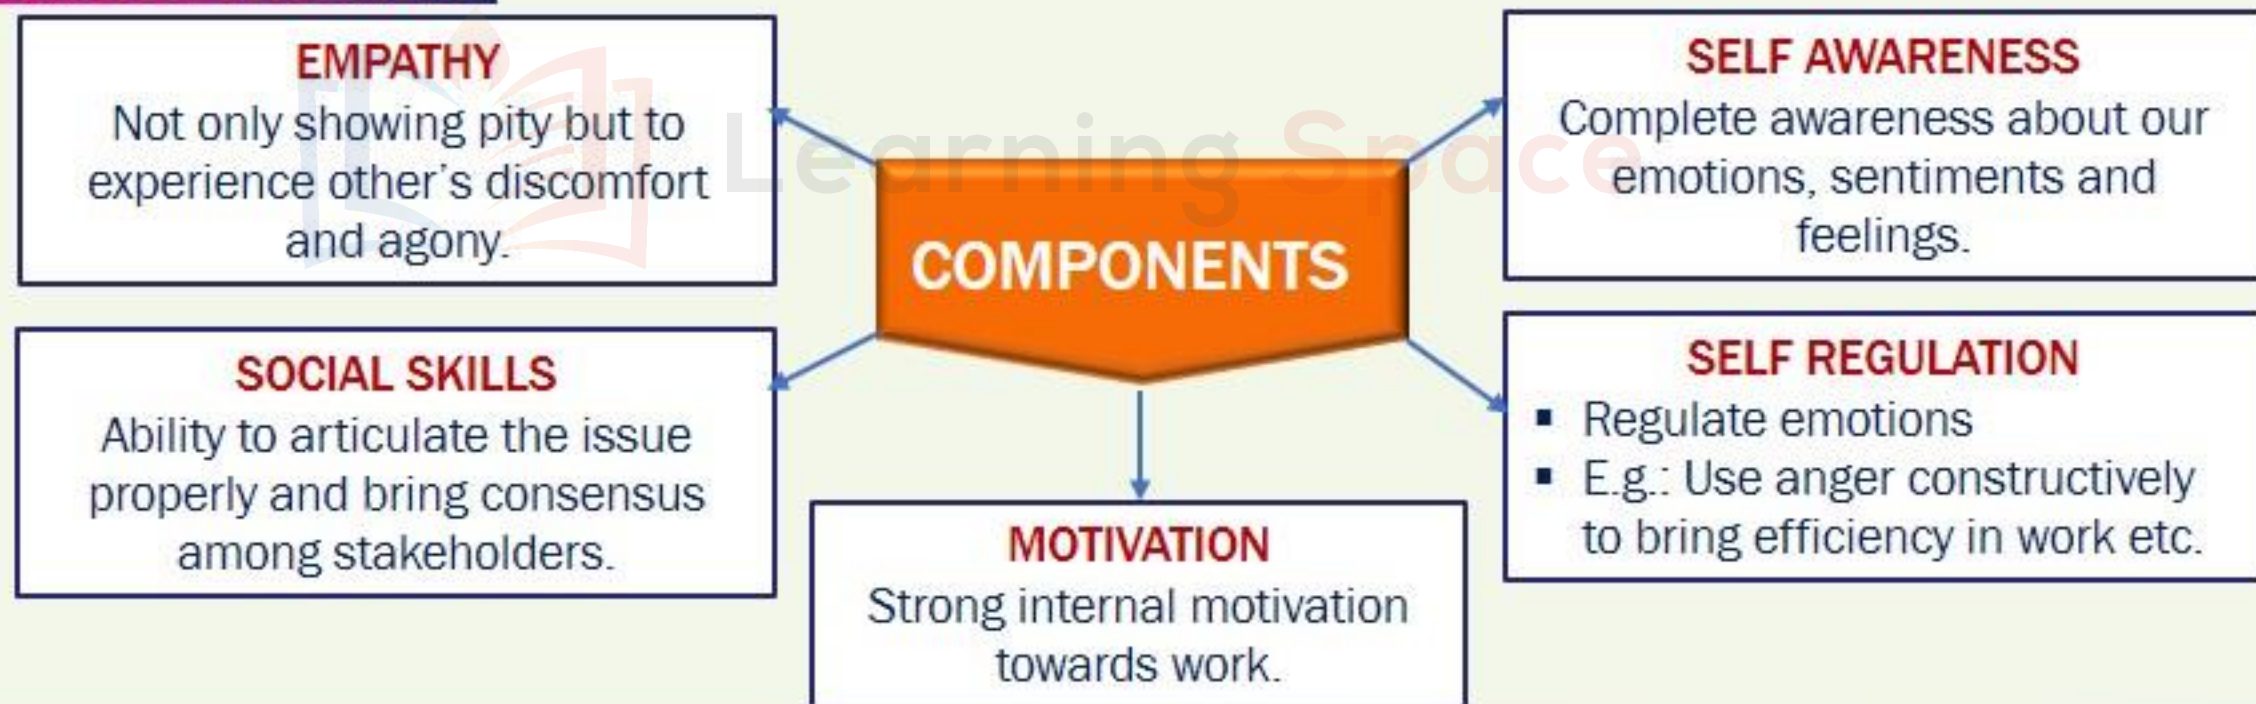

Thus, personal and professional ethics go together. Personal values impact professional life. Institutional integrity gets affected if the leader's personal life lacks ethics.

What is Emotional Intelligence? Elaborate its role in administration. (150 Words)

Emotional intelligence (EI) involves:

- ✓ ability to recognise one's own emotions;
- ✓ understand other people's emotions;
- ✓ differentiate between emotions and feelings; and
- ✓ using this analysis to guide our thinking, behaviour and decision making by controlling emotions.

COMPONENTS OF EI

ROLE IN ADMINISTRATION

- Enables community participation in governance.
- Keeps the entire administrative machinery motivated.
- Bureaucrat with EI acts as a role model and inspiration for others.
- Sensitive issues can be tackled efficiently through consensus.
- Political attitudes of people shift from emotions based to rationality.
- Enhances the efficiency in delivery of justice and public service.
- Prevents wastage and leakage of public funds because of participatory governance.

COURSE OF ACTION

Countries like India follow rules and regulations based administration as a legacy of colonial setup. EI in administration for such countries is the need of the hour to enable socio-economic transformation and development.
