GS - IV

12 QUESTIONS WITH MODEL ANSWERS

MODULE - 7

GS – I ... INDIAN SOCIETY

- 10 “Though the slums are looked down socially and economically, their intertwining characteristics towards integration with the metropolis is worth considering”. Elaborate the statement by taking Dharavi, one of the largest slums in the world, as an example. (250 words).
- 11 “In the context of huge inter-state migration, it may not be difficult to integrate the migrants economically, but the real problem is social, emotional and political integration”. Do you agree? Give reasoned arguments. (250 Words)
- 12 Except NCR, majority of the vibrant 21st century urban agglomerations emerged in western and southern parts of the country. Examine the reasons for this transformation. How far does it pose challenges to the balanced development of the Nation? (250 Words)

GS – II ... SOCIAL JUSTICE AND GOVERNANCE

- 10 Differentiate the traits of poverty between Kerala and Jharkhand. (150 Words)
- 11 Examine the impact of social audit in efficient delivery of public services with examples. Enumerate the systemic challenges in social audit. (250 Words)
- 12 “Democratic principles will be undermined if the policy framework and its implementation by the Government is swayed by the public opinion”. Elaborate the statement by giving valid reasons. (150 Words)

GS – III ... ECONOMIC DEVELOPMENT

- 10 The inadvertent fall-out of Green Revolution is the gradual loss of importance of nutri-rich cereals, pulses, oilseeds. What are the reasons for this development and examine its repercussions? (250 Words)
- 11 Indian economy presents a paradoxical situation with strong macro-economic fundamentals and downward spiral of economic slowdown. How do you explain this paradox? (250 Words)
- 12 Biosecurity is an essential element of “sustainable agricultural development”. How far are Indian agricultural policies aligned in this direction? (150 Words)

GS – IV ...ETHICS & INTEGRITY

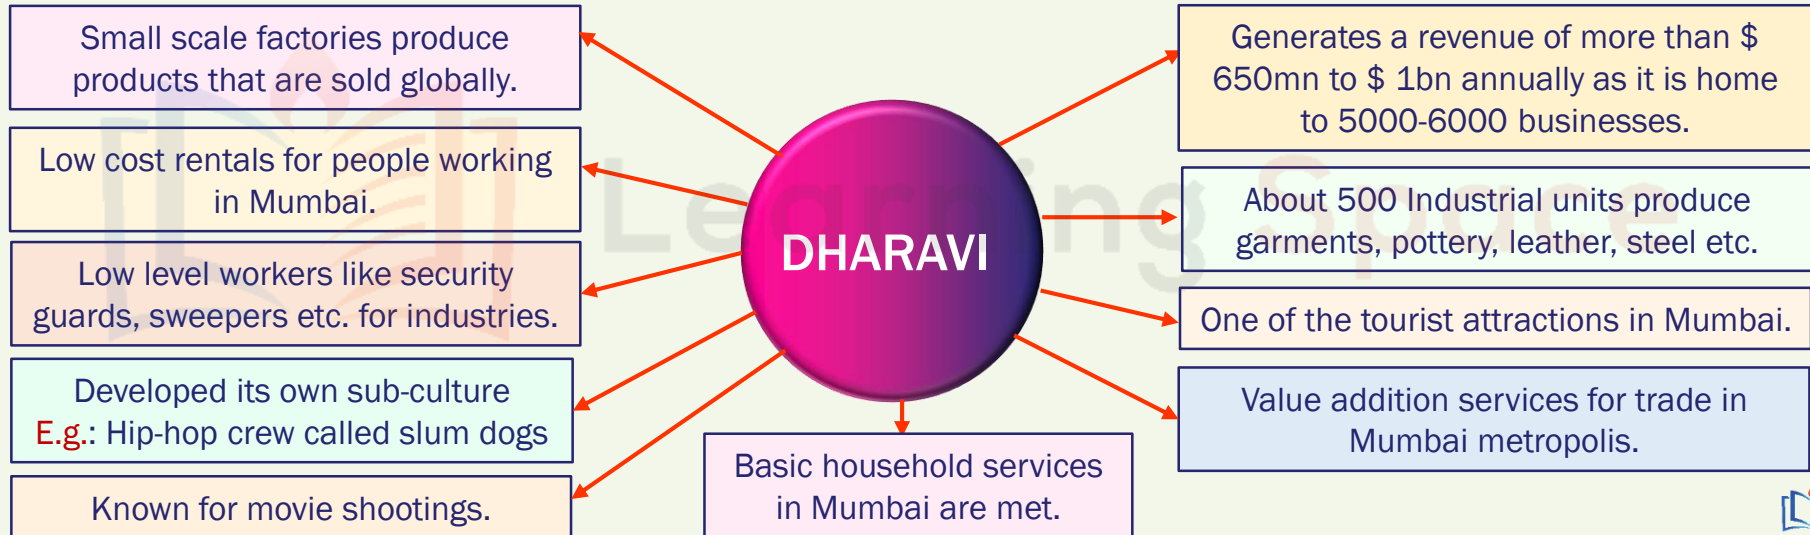

- 19 Discuss content and structure of Attitude. How is it useful in administration? (250 Words)
- 20 Explain the following terms in the context of civil services: Objectivity, Integrity, Impartiality and Non-Partisanship. (150 Words)
- 21 Analyze the role of RTI in ushering transparency and accountability in governance. (250 Words)

10 / IS
GS - I

“Though the slums are looked down socially and economically, their intertwining characteristics towards integration with the metropolis is worth considering”. Elaborate the statement by taking Dharavi, one of the largest slums in the world, as an example. (250 words).

Though slums are seen as places having lesser aesthetic value in urban planning, they are self-sustaining microcities within larger cities. They help in sustaining the industries as well as households in metropolis through their services.

DHARAVI - A SELF SUSTAINING MICRO CITY

CHALLENGES FACED BY THESE SLUMS

- Official lists under-identify slums and under-count slum dwellers.
- Slums in each city have a variety of living conditions that fall along a continuum. Standardized slum policies are therefore not helpful.
- Traditional survey methods are inadequate to keep up with rapid changes.
- Lack of awareness among slum dwellers about their rights.
- Absence of property titles.

FINALLY

Each slum should be upgraded with slum specific policies. Satellite image analysis can be used to generate slum maps and sort slums into types.

“In the context of huge inter-state migration, it may not be difficult to integrate the migrants economically, but the real problem is social, emotional and political integration”. Do you agree? Give reasoned arguments. (250 Words)

As per World Economic Reform (WEF) report, inter-state migration in India doubled between 2001 and 2011 compared to previous decade. Annual inter-state migration averaged about 5-6 million migrants a year. Yet, it is less than in other countries at similar stages of economic development. This is attributed to migrant unfriendly policies of state at various levels of integrating migrants, specifically the social, emotional and political integration.

ISSUES OF MIGRANT INTEGRATION

1. Economic

- Ageing states in Southern and Western India provide labor market access as they need young work force. But, access to workers' rights is still a problem.

2. Social

- Lack of access to government entitlements for social security.
- Absence of basic shelter and abuse of child rights.
- Vulnerable to attribution of crimes happening in the region.
- Poor access to quality health services.
- Considered as reason for lack of jobs and opportunities by local people.

3. Emotional

- Poor standards of living affect the dignity and self-respect of migrants.
- Psychological trauma because of harsh working atmosphere.
- Deprived of emotional requirements from family.
- Absence of dear persons to take care at times of crisis.
- Adaptation requirements for new culture, cuisine and behavior.

4. Political

- Lack of or poor access to electoral rights.
- No consultation in welfare policy making.
- No political empathy towards slum dwellers who are mostly migrants.

THE WAY AHEAD

Migrant friendly policy making is necessary to realize the benefits associated with migration in both origin and destination regions. There should be:

- Sensitization of locals to facilitate social and emotional requirements of migrants.
- Enabling portability of government entitlements.
- Ensuring social security measures.
- Political inclusion by providing necessary rights.

Except NCR, majority of the vibrant 21st century urban agglomerations emerged in western and southern parts of the country. Examine the reasons for this transformation. How far does it pose challenges to the balanced development of the Nation? (250 Words)

Higher economic activity in urban agglomerations drives the economic growth of a state. States without vibrant urban agglomerations remained poor cousins of those with bustling metros. But these agglomerations emerged mostly in the western and southern India, resulting in regional imbalances.

REASONS FOR THIS TRANSFORMATION

1. Historical Reasons

- While northern India remained as power center, regions of West Bengal, Madras, Surat, Mumbai etc. emerged as business centers during British rule.
- Rulers of princely states like Mysore, Nizam established efficient infrastructure.

2. Geographical Reasons

- Proximity to ports enabled early development of regions of Madras, Surat etc.

3. Social Reasons

- High poverty, low literacy and high fertility rates in BIMARU regions.
- Strong presence of caste dominance in northern and eastern India.
- Higher gender inequalities resulted in miniscule participation of women in economic activity.
- Insurgencies in North East and Red corridor in eastern India and Andhra region.

4. Political reasons

- Post-independence, regional parties in Southern India focused on local development and employment generation.
- Better quality education and health facilities in Gujarat, Tamil Nadu resulted in skilled work force.
- Special Economic Zone (SEZs) to attract investments through business-friendly policies.
- Software technology parks established.

CHALLENGES TO BALANCED DEVELOPMENT

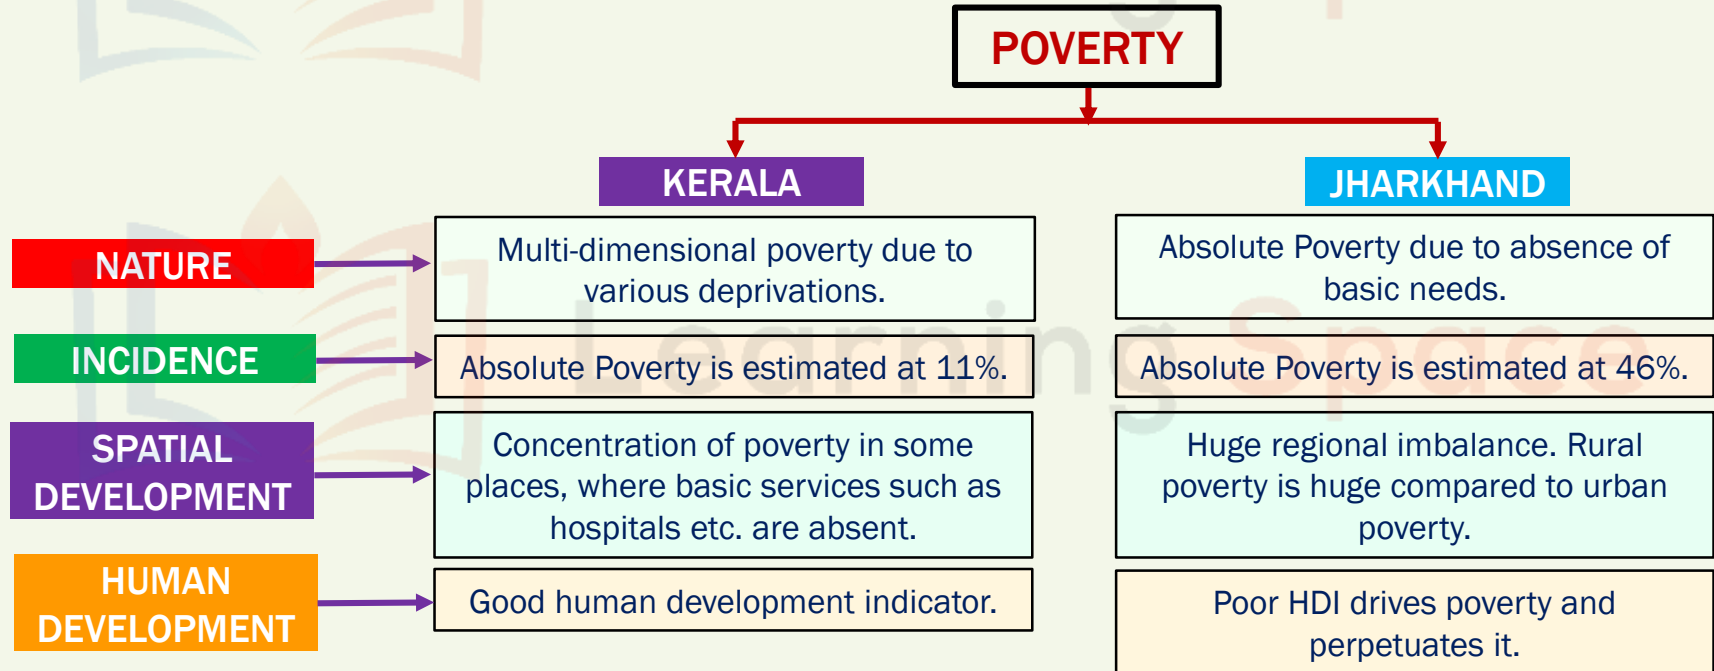

- Migration to metros results in brain drain and skill drain in less developed states.
✓ E.g.: Migration from Uttar Pradesh to Maharashtra.
- Absence of dispersion of economic activity to secondary cities further aggravates imbalances.
- Skewed sex ratio because of migration in less developed states perpetuates poverty.
- Brain drain deprives wise electoral outcomes resulting in poor governance and infrastructure.
- Economic growth of regions experiencing out-migration gets stunted.

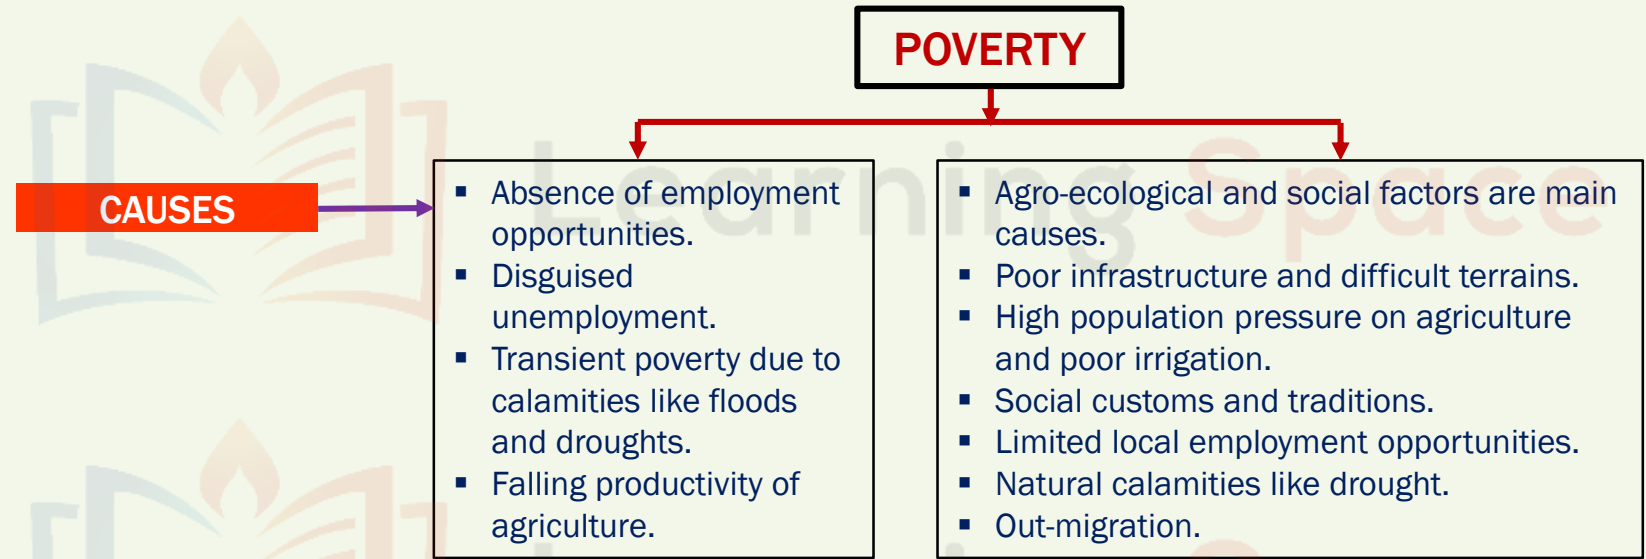

THE WAY AHEAD

- Prompt and efficient implementation of schemes like AMRUT is necessary to check migration.
- Northern states should develop green field urban agglomerations based on planned urbanization.
- Empowering citizens through health, education and skills is needed.

Differentiate the traits of poverty between Kerala and Jharkhand. (150 Words)

The nature of poverty in Kerala and Jharkhand are distinct both in terms of causes and consequences. While Kerala is a top performer in multi-dimensional poverty index, Jharkhand remained as one of the least performers.

CONCLUSION

State specific welfare policies based on the nature of existing poverty have to be formulated. Jharkhand has to strengthen essential services of education, health, nutrition and skills to embrace both growth and development. On the other hand, Kerala needs to attract more investments to create better employment opportunities.

Examine the impact of social audit in efficient delivery of public services with examples.
Enumerate the systemic challenges in social audit. (250 Words)

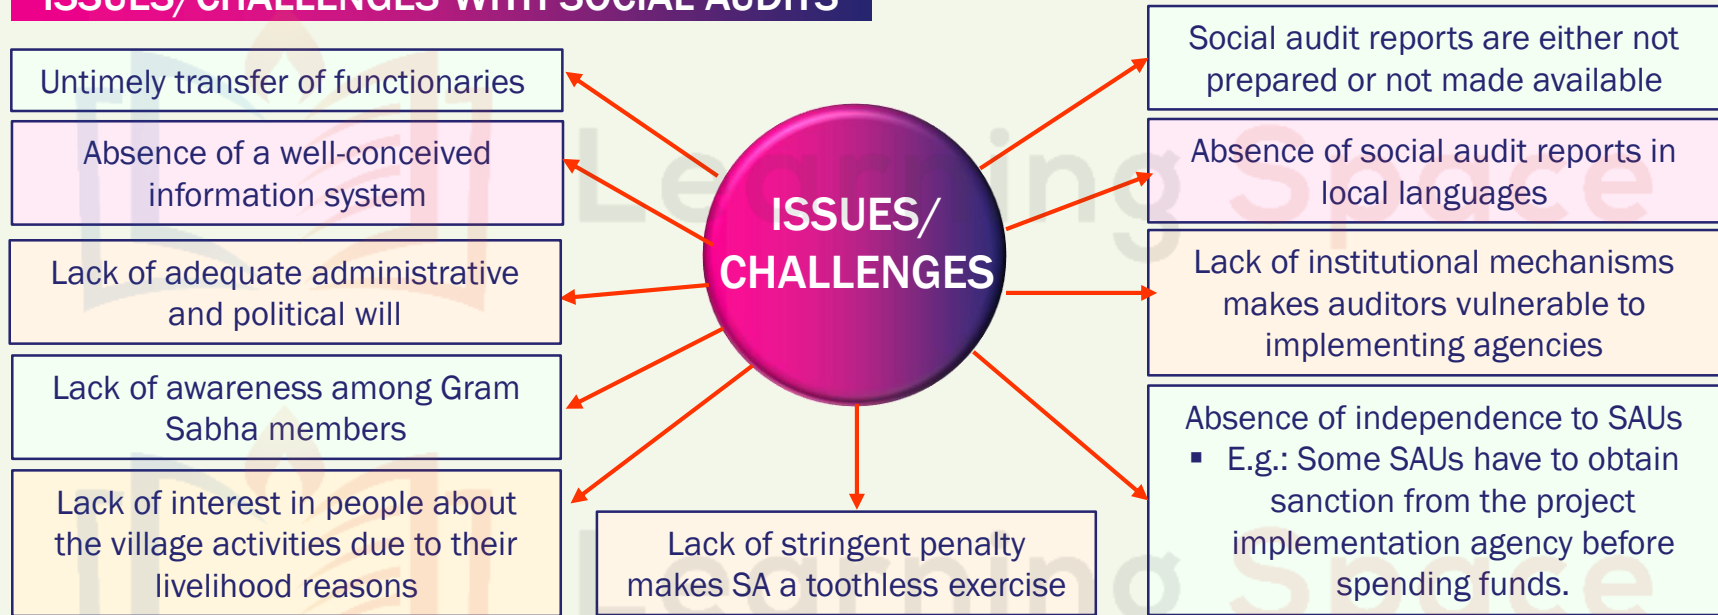

Social auditing is a process by which an organization/government accounts for its social performance to its stakeholders and seeks to improve its future social performance. It was first made statutory in National Rural Employment Guarantee Act, 2005 (MGNREGA). 73rd CAA empowered Gram Sabhas to conduct Social Audits in addition to other functions.

IMPACT OF SOCIAL AUDIT IN EFFICIENT DELIVERY OF PUBLIC SERVICES

- Narrows gaps between vision/goal and reality
 - ✓ E.g.: Meghalaya's social audit law ensures timely review and concurrent course-correction in the delivery of schemes and programmes.
- Acts as a bridge between efficiency and effectiveness
 - ✓ E.g.: Helps in reviewing the outcomes in the implementation of MGNREGA and further strengthening the policy.
- Enables participatory governance
 - ✓ E.g.: Chhattisgarh - Wall writing of muster rolls, bills and measurement books to ensure active involvement of the community in the social audit process.
- Strengthens citizens vigilance mechanism
 - ✓ E.g.: Andhra Pradesh - Society for Social Audit, Accountability and Transparency (SSAT) enables Public vigilance, 'Social Audit Forums-Public Hearings' and verification of the various stages of implementation.
- Puts the administrators on tenterhook to deliver quality public services
 - ✓ E.g.: Jharkhand - Public hearings are heard by juries with PRI and CSO members.

ISSUES/CHALLENGES WITH SOCIAL AUDITS

IN A NUTSHELL

Legislative measures for strong institutional mechanism to strengthen social audit process is necessary. All government welfare programmes and policies should include social audit as a pre-condition to allocation of funds.

“Democratic principles will be undermined if the policy framework and its implementation by the Government is swayed by the public opinion”. Elaborate the statement by giving valid reasons. (150 Words)

Influence of public opinion on policy frame work and implementation results in public policy being directed away from public interest. This undermines the democratic principles by satisfying specific interest while keeping at stake the larger public interest.

POPULAR NARRATIVES INFLUENCING PUBLIC POLICY – IMPACT ON DEMOCRACY

- Undermines democratic values of equality and freedom – against Article 14, 15.
- May lead to majoritarianism.
- Delivery of justice is biased.
- Weaker and vulnerable sections become more vulnerable.
 - ✓ E.g.: Upper sections may be imprisoned while lower sections may be encountered for same crime.
- Distinctive cultures of voiceless sections may be threatened against Article 29 of constitution.
- Flared up identity conflict may result in social unrest.
- Justice delivery can be replaced by revenge seeking.
- Adversely impact the principle of fraternity.
- Increases threat to national security.

THE WAY FORWARD

Sensitization of both civil society and administration is needed towards emerging social challenges like new forms of crimes, migration etc. Objective delivery of justice and abiding to constitutional principles is necessary for a democracy to sustain.

The inadvertent fall-out of Green Revolution is the gradual loss of importance of nutri-rich cereals, pulses, oilseeds. What are the reasons for this development and examine its repercussions? (250 Words)

Subsequent to the failure of land reforms, India adopted Green revolution to meet food security demands. While it introduced modern technology, methods of farming, machinery and HYV seeds, it resulted in wider cultivation of wheat and rice at the stake of nutri-cereals.

REASONS FOR THIS DEVELOPMENT

- Huge consolidated land tracts of large farmers in areas of Punjab and Haryana facilitated easier adoption of green revolution.
- Small and marginal farmers' incapacity to buy inputs resulted in forced acquisition of land by large farmers.
- Government policies of MSP attracted farmers towards wheat and rice.
- Increased productivity in wheat resulted in huge revenues.
- No alternatives for farmers to realize better revenues.
- Prioritization of resolving hunger deaths than hidden hunger.

REPERCUSSION OF THIS DEVELOPMENT

- Commodity centered cropping resulted in mono-cropping.
- Adverse effect on diverse breeds of rice and other crops.
- Excessive water usage resulted in fall of ground water levels.
- Regional imbalances across India.
- Emergence of class system amongst farmers.
- Shift from Agro-climatic based cropping pattern to arbitrary, policy-based cropping pattern.
- Increased the workforce dependent on agriculture.
- Resulted in disguised unemployment in later periods.
- Absence of scientific and technological boost led to green revolution fatigue.
- Food surplus associated with distressed food prices.
- Declined soil fertility and polluted ground water.
- Environment pollution due to heavy use of pesticides and chemicals.

CONCLUSION

Though green revolution met the food security demands, it resulted in regional and socio-economic disparities. At present, India needs to shift to ever green and sustainable agriculture considering all region specific Agro-climatic conditions. Affordable nutri-cereals to meet the nutrition security demands is the need of the hour.

Indian economy presents a paradoxical situation with strong macro-economic fundamentals and downward spiral of economic slowdown. How do you explain this paradox? (250 Words)

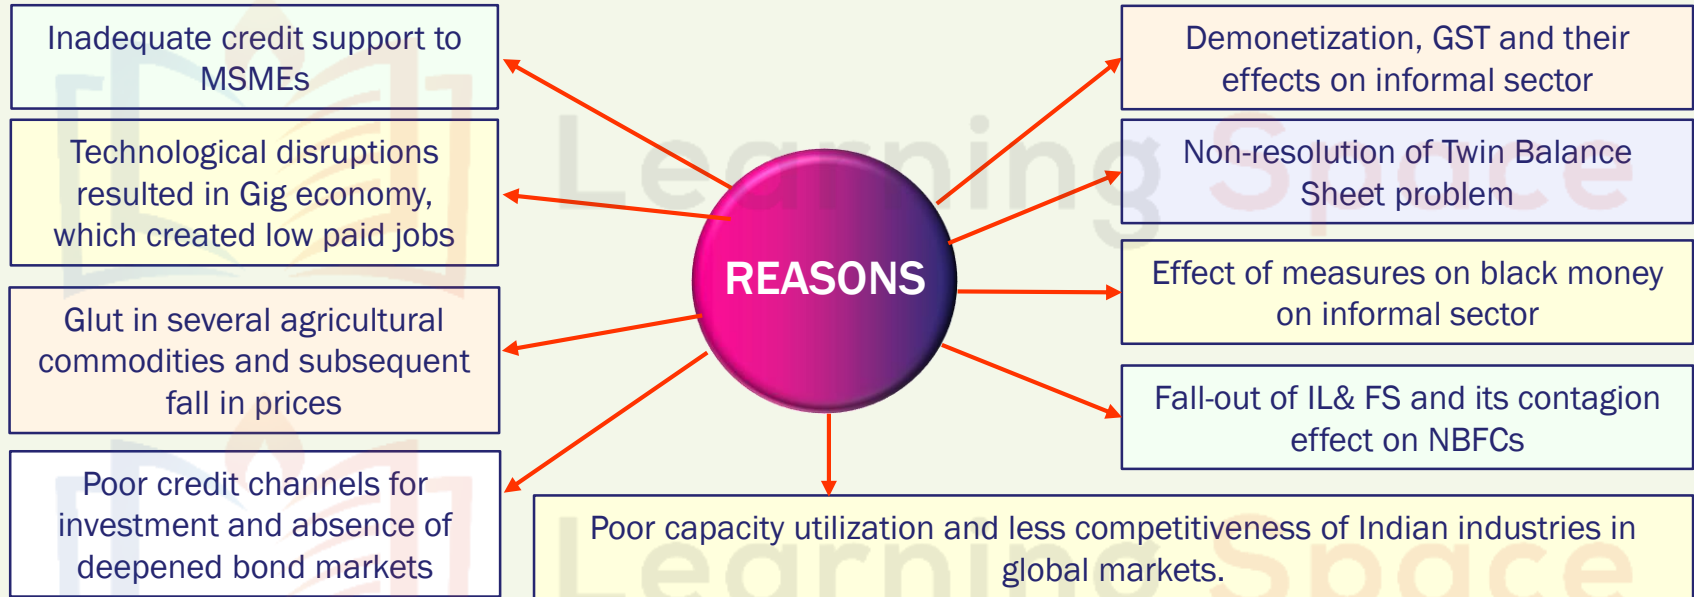

While macro-economic fundamentals like fiscal deficit, current account deficit and inflation were under control, GDP growth rate has slipped to 5% in Q1 of FY20, which is lowest in over six years. Further, the recent collapse of the automobile sector, the rising number of NPAs and failing manufacturing sector strengthen this paradoxical situation. This can be attributed to multiple reasons as follows:

STRONG MACRO-ECONOMIC FUNDAMENTALS

- Issues of food scarcity are absent and is replaced by food surplus.
- Foreign Exchange Reserves are at a record ~\$449 billion.
- FDI is hovering around \$ 40-50 billion per year over the past few years.
- Ease of Doing Business Index ranking increased from 142 to 63.
- Start-up ecosystem is the 3rd largest in the World.
- Stock market is at a record high, doubling in the past five years.
- External disruptions like US - China trade conflict do not have substantial effect on India.

PROBABLE REASONS FOR THE PARADOX

THE WAY AHEAD

Embracing deep technologies to solve India specific problems and evolving innovative funding patterns using blockchain technologies are needed. Strengthening MSMEs and shifting the workforce from agriculture to other sectors is the need of the hour. Further, nutritional security and upskilling of workforce to the present needs are imperative.

Biosecurity is an essential element of “sustainable agricultural development”. How far are Indian agricultural policies aligned in this direction? (150 Words)

Biosecurity is a holistic approach that encompasses the policy and regulatory frameworks that analyze and manage risks in the sectors of food safety, animal life and health, and plant life and health, including associated environmental risk. It has direct relevance to the sustainability of agriculture, food safety, and the protection of the environment, including biodiversity.

ROLE OF BIOSECURITY IN SUSTAINABLE AGRICULTURE DEVELOPMENT

- Preventing diseases and controls pests
 - ✓ E.g.: Controlling fall armyworm that destroys maize
- Helps in more productivity and preventing land degradation
- Protection of cattle from diseases like foot and mouth disease enhances quality dairy products
- Enhances quality and productivity in aquaculture, horticulture
- Better incomes encourage farmers to invest more in agriculture

BIOSECURITY & INDIAN AGRICULTURE POLICIES

Historically, Biosecurity has not been a strong public policy in Indian agriculture. There is no comprehensive act towards Agricultural Biosecurity in India. But still there are some policies in this direction which include:

- I. Regulation in commercial production of GM crops which may invite alien species to our fields
- II. Destructive Insects and Pests Act, 1914 that governs import of agricultural products
- III. Establishment of plant quarantine centres
- IV. Requirement of Phytosanitary certification for agricultural products entering India
- V. Provisions in Wildlife Protection Act, 1972 to cull vermins which are pests or nuisance animals
- VI. Signatory to International Plant Protection Convention (IPPC)
- VII. Seed Protection Act, 1966 for regulating the quality of seed

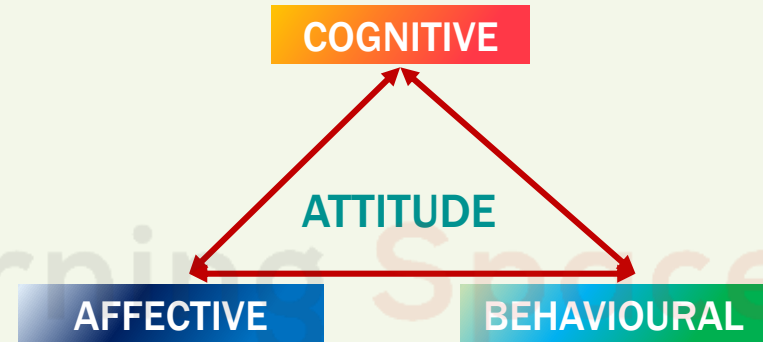

FINALLY

As recommended by M.S. Swaminathan, an institutional mechanism of biosecurity authority of India has to be established through a comprehensive biosecurity legislation. National agriculture biosecurity programme to create awareness among farmers and providing necessary Agri services is necessary.

Discuss content and structure of Attitude. How is it useful in administration? (250 Words)

Attitude is subjective individual interpretation of objective outside world. It is the aggregate of an individual's feelings, thoughts and behaviour towards a target object which may be a person, animal, issue or any abstract concept. Rosenberg and Hovland have formulated three components of attitude as ABC model.

1. AFFECTIVE COMPONENT

- Concerned with emotional part of attitude.
- Constitutes elaborate feelings, moods associated with target object.
- Manifests at subconscious level of individual
- Result of personality development and past experiences.
 - ✓ **E.g.:** Some may feel disgusted seeing a beggar while other may feel compassionate.
- Only way to condition this component is self-introspection.

2. COGNITIVE COMPONENT

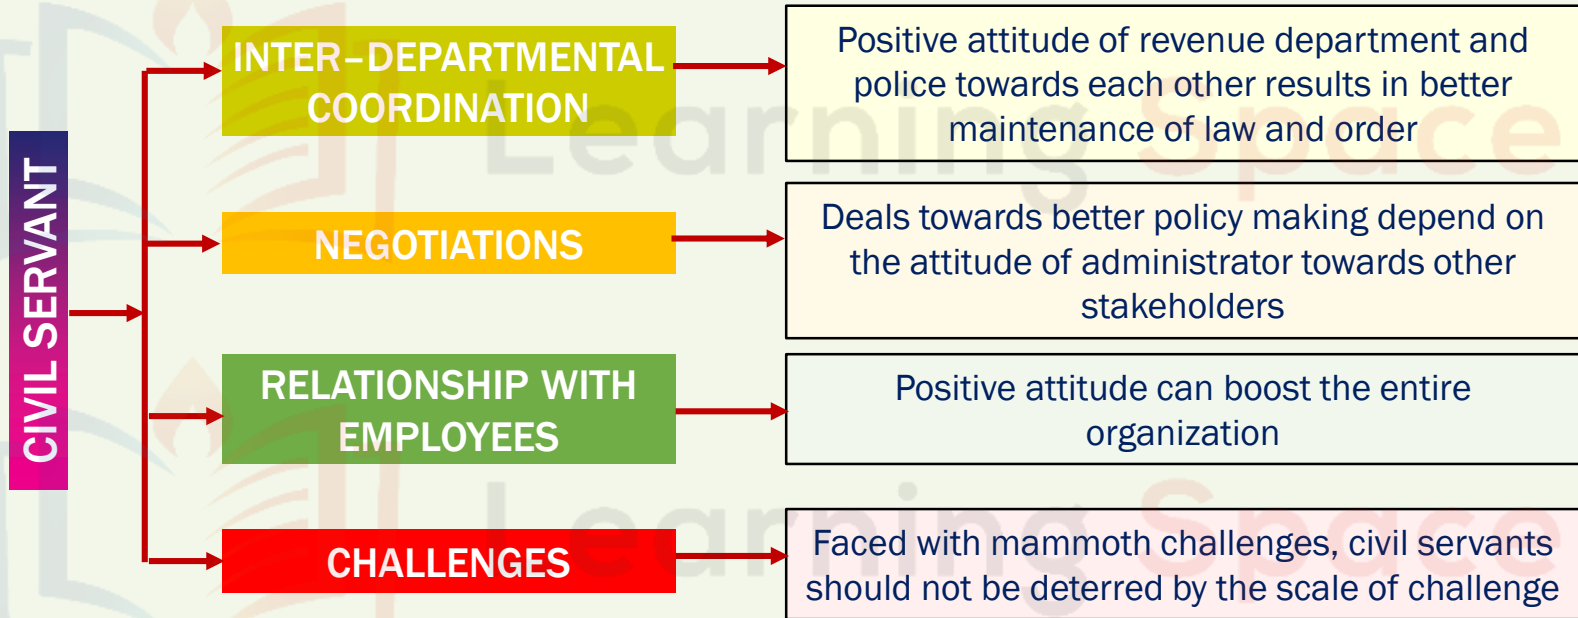

- Deals with knowledge, information and thought.
- Product of deliberate thought and conscious interpretation.
- Based on rational thinking
 - ✓ **E.g.:** On seeing beggar, one can analyze the reasons for such a situation based on beggar's age, gender, abilities etc.

3. BEHAVIOURAL COMPONENT

- Affective and cognitive components interplay towards a particular behavior.
- Action part of attitude
- Can be a result of affective or cognitive or both.

Thus, attitudinal and behavioral changes in public policy discourse necessarily means changing the affective and cognitive components.

NEED OF ATTITUDE IN ADMINISTRATION

CONCLUSION

Success of public policies like Swachh Bharat, ODF status need attitudinal changes of people towards progress to sustain.

Explain the following terms in the context of civil services: Objectivity, Integrity, Impartiality and Non-Partisanship. (150 Words)

Values of civil services are the choices to be made by the civil servants to enable good governance. This includes:

1. OBJECTIVITY

- Looking at things “as they are” in contrast to subjectivity where things are seen “as we are”.
- Involves explanation of things as they are, being completely devoid of what one thinks of them.

APPLICATION IN CIVIL SERVICE

- Efficient implementation of Public schemes.
- Equity in distribution of resources by basing on facts.

2. INTEGRITY

- Unwavering adherence to moral principles not because of external regulations but because of internal compulsions.

APPLICATION IN CIVIL SERVICE

- To restrain from informal pulls and pressures to misappropriate public resources.
- Be brave against odds of transfers for strict enforcement of duties.
- Proper inquiries to protect innocent and punish culprits.

3. IMPARTIALITY

- Not favoring arbitrarily one section of people at the cost of disfavoring other sections.
- Based on “equal opportunity to all” and “equals being treated equally”.

APPLICATION IN CIVIL SERVICE

- Fulfilling interests of all sections equitably.
- Realize constitutional mandate of Article 14 and 15.
- Preventing majoritarianism and protecting minorities.

4. NON-PARTISANSHIP

- Ensuring a neutral approach politics and a solid commitment to constitution.

APPLICATION IN CIVIL SERVICE

- Prevent politicization of bureaucracy.
- Protecting the independent trait of Election Commission to conduct free and fair elections.

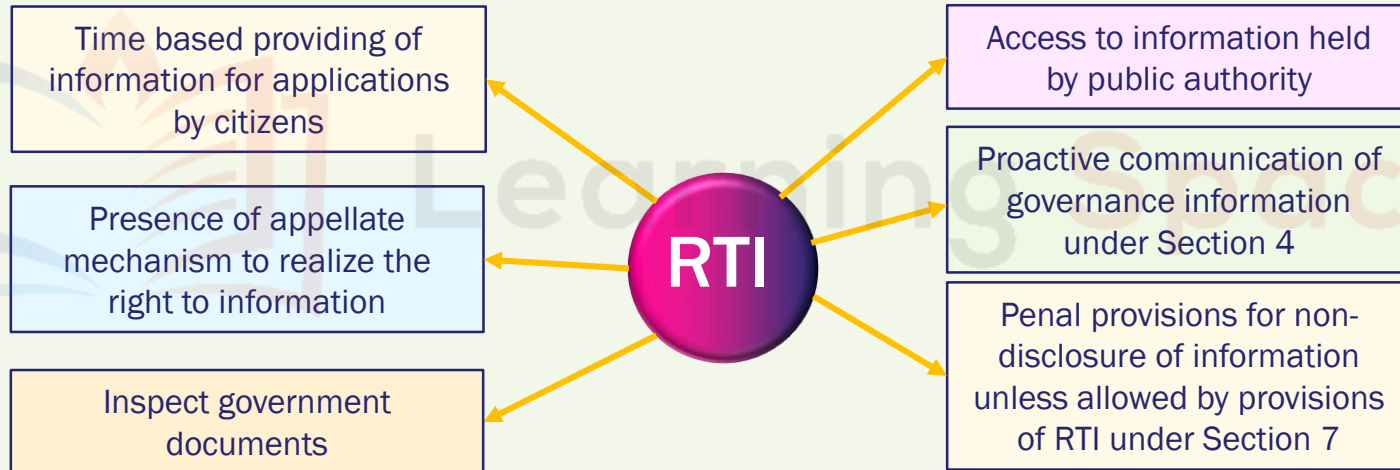

CONCLUSION

Enabling civil services values in administration is the bedrock of realizing the goals of establishing the civil services institution.

**Analyze the role of RTI in ushering transparency and accountability in governance.
(250 Words)**

Right to Information Act, 2005 enables participatory governance by making people vigilant about the implementation of public policies and good governance. Transparency and accountability are the hall marks of RTI in enabling participatory governance.

SALIENT ASPECTS OF RTI

ROLE OF RTI IN GOOD GOVERNANCE

- Enhances delivery of quality public services.
- Deters public servants from non-deliverance of services.
- Empowers weaker and voiceless sections to realize their entitlements.
- Prevents corruption because of the caution of vigilance.
- Reminds public servants constantly about their job.
- Enables informed choices for voters, thereby deterring political parties in delivering good governance.

SUCCESS STORIES OF RTI

- Pune Municipal Corporation has designated one day in a week to put all files for public inspection.
- A Class 5 student of Telangana filed RTI to labor department seeking reasons for not releasing scholarship, resulting in releasing of his scholarship.

CONCLUSION

Thus, many success stories back the vital role of RTI in strengthening good governance. It is necessary to further strengthen RTI to resolve existing challenges for its efficient implementation.
