

IAS MAINS 2020

VALUE ADDITION

GS - I

GS - II

GS - III

GS - IV

12 QUESTIONS WITH MODEL ANSWERS

MODULE - 9

GS – I ... INDIAN SOCIETY

- 13 “Huge strides were made in socio-economic progress and high tolerance in society is one of the prime reasons”. Elaborate the statement with suitable justification. How far does the growing intolerance in society affect further socio-economic progress? (250 Words)
- 14 Indian Secularism has many traits. Examine how its interpretation changed over a period of time. (150 Words)
- 15 Sub-nationalism can become both a cementing force and a divisive force. Argue and counter-argue for both the possibilities. (250 Words)

GS – II ... SOCIAL JUSTICE AND GOVERNANCE

- 13 “India achieved huge success in eliminating absolute poverty, but for reducing relative poverty, intergenerational cycle that denies opportunities to those at the bottom of the pyramid is to be broken”. Elaborate the statement with the role of the Government and Civil Society to reduce relative poverty. (250 Words)
- 14 Smart Cities Mission completed 5 years. How far is the Smart Cities Mission successful in achieving its desired objectives? In your opinion, what are the systemic challenges faced by Smart Cities Mission? (250 Words)
- 15 What do you understand by Jugaad? How far can the faster economic growth post-2000 be attributed to this Indian way of innovation? (150 Words)

GS – III ... ENVIRONMENT & DISASTER MANAGEMENT

- 7 What do you understand by Common but Differentiated Responsibilities and Respective Capabilities (CBDR-RC)? Enumerate the challenges in implementing the Paris Climate Pact. (250 Words)
- 8 Narrate various measures taken by the Government to promote Electric Vehicles. How far is India away from developing the manufacturing ecosystem for Electric Vehicles? (250 Words)
- 9 What is the rationale behind prescribing the minimum ecological flow for main stem of River Ganga? Critically examine various challenges in ensuring ecological flow. (150 Words)

GS – IV ...ETHICS & INTEGRITY

- 25 Discuss political attitudes in the context of the generic ABC model of attitude. (150 words)
- 26 Analyse social influence as basis of attitude. What are enablers of social influence? (150 words)
- 27 Elaborate the Sevottam model of quality public service delivery. (150 words)

“Huge strides were made in socio-economic progress and high tolerance in society is one of the prime reasons”. Elaborate the statement with suitable justification. How far does the growing intolerance in society affect further socio-economic progress? (250 Words)

Tolerance towards different communities is the means to inclusive development and progressive humanity. It engendered socio-economic progress in all nations that supported it.

- E.g.: Industrial development by Jews and Parsis in India. E.g.: Sassoon family, Tatas, Wadias
- Parsis played major role in Indian National Movement. E.g.: Dadabhai Naoroji, Bhikaiji Cama
- USA's advancement is attributed to its open accommodative nature.

NECESSITY OF TOLERANCE

TOLERANCE

- Results in multiculturalism where all communities exist in harmony respecting each other's traditions and cultures
- Diverse mindsets propel new ideas towards better humanity
- Breeding ground for innovation
- Strengthens ground for innovation
- Enhances brand image of nation
- Develops fraternal relations with communities across the world
- Nation gets external support in the times of crisis
- Protects freedom of individual to pursue diverse human interests. It leads to progress in various art forms, sports etc.

GROWING INTOLERANCE AND EFFECT ON SOCIETY

- Develops a fear of threat to collective identity of communities
- Social unrest and law and order problems prevail
- Leads to brain drain as people out-migrate
- Cripples freedom to question and thereby innovative spirit
- Results in stagnation of techno-economic developments
- Threatens the survival of democracy, deepens social divisions
- Spurs fake news-based assaults owing to social media
- Radicalizes youth towards extreme ideologies
- Creates enemies to nation across the globe
- Can lead to civil war within a nation
- Vulnerable sections like women and children face greater threat
- Rule of anarchy prevails over Rule of law

FINALLY

Tolerance is an inherent trait of Indian civilization. It is exemplified in its accommodation of diverse communities all across the globe. Present democratic governance should protect this trait against the fringe elements that threaten its survival.

Indian Secularism has many traits. Examine how its interpretation changed over a period of time. (150 Words)

Indian secularism is based on principled state intervention in all religions. Such intervention betrays disrespect to some aspects of every religion.

TRAITS OF INDIAN SECULARISM

- Equal focus on intra-religious and inter-religious domination. It equally opposed:
 - ✓ Oppression of Dalits and women in Hinduism
 - ✓ Discrimination against women in Indian Islam and Christianity
- Deals with both religious freedom of individual and minority communities
- Compatible with state supported religious reform
 - ✓ E.g.: Banning untouchability
- Allows equal disrespect for some aspects of organized religion
 - ✓ E.g.: Religiously sanctioned caste hierarchies are not accepted.

VARIED INTERPRATIONS OF INDIAN SECULARISM

- 1947 – Early Independence
 - ✓ State honors all faiths equally and give them equal opportunities
 - ✓ Equal distance intervention to all religions
- 1950s - 1970s (After constitution was enforced)
 - ✓ Principled intervention rather than be equidistant
E.g.: State reformed Hindu personal law without imposing similar changes on religious minorities
- 1970s – 1990s
 - ✓ Appeasement of minorities
E.g.: Invoking Sharia as template for Muslim personal law during Shah Bano case.
- 1990s to present
 - ✓ Majoritarianism
E.g.: Equating Hindutva with secularism

CONCLUSION

Protecting the minorities is the essence of a secular democracy. There is a need for political attitudes of Indian society to shift towards progressive ideas and rationality to retain the constitutional spirit of secularism.

Sub-nationalism can become both a cementing force and a divisive force. Argue and counter-argue for both the possibilities. (250 Words)

Sub-nationalism refers to the aspirations of a particular community within a nation to express their identity in different forms rather than having any national identity. It can engender social progress or result in social unrest depending on the nature in which it manifests.

SUBNATIONALISM - A CEMENTING FORCE

- Rekindles the nature of pluralistic society
- Disbands the manufactured rhetoric of nationalism being falsely related to a particular community
✓ E.g.: Hindu nationality
- Engenders competitive federalism
- Enables efficient governance with more focus to meet local aspirations
- Results in strong regional economy and security and thereby national economy and security
- Checks the abuse of power by centre
- Deepens democracy with greater representation
- Multiculturalism and diverse thoughts result in innovation and techno-economic advancements of society

AGGRESSIVE SUB NATIONALISM – A DIVISIVE FORCE

- Aggressive emphasis on regional identities can break sensitive thread uniting the nation
 - ✓ E.g.: Khalistan movement, Naga secession movement
- Expressions of one community at the cost of others results in social unrest
- Sons of soil theory is a threat to migrants
- Half governance measures because of non-cooperation
- May lead to violent means
- Contagion effect on other regions
- Threatens culture and traditions of minority communities

WAY AHEAD

As long as sub-nationalism is not secessionist in nature or not harming other community, it might become a positive force in India. Pluralistic nationalism enables celebrating the socio-cultural diversity.

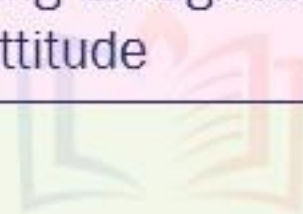

“India achieved huge success in eliminating absolute poverty, but for reducing relative poverty, intergenerational cycle that denies opportunities to those at the bottom of the pyramid is to be broken”. Elaborate the statement with the role of the Government and Civil Society to reduce relative poverty. (250 Words)

As per World Poverty Clock, around 44 Indians escape extreme poverty every minute. Though India lifted significant percentage of its population out of poverty, relative poverty still remains due to intergenerational poverty cycle: Richest 10% own 80% of India's wealth.

REASONS FOR HIGH RELATIVE POVERTY

- Poor access to affordable quality health care
- Digital divide inhibiting access to competitive job market
- Rise in Gig economy and low paid jobs
- Continuation of traditional occupations by lower sections
Eg: Manual scavenging
- Socio-cultural barriers like caste
- Huge workforce depending on agriculture and informal sector
- Absence of risk-taking attitude

 Learning Space

ROLE OF GOVERNMENT AND CIVIL SOCIETY IN REDUCING RELATIVE POVERTY

GOVERNMENT

- Enhance the infrastructure and quality of teaching in Government schools
- Strict implementation of schemes like mid-day meals, Sarva Shiksha Abhiyan etc.
- Vocational education and entrepreneurial training at early ages
- Providing poor and slum dwellers with decent house, sanitation etc.
- Promoting Dalit entrepreneurs
- Ensuring social security measures in Gig and similar sectors
- Campaigns to make people aware of moving away from jobs like manual scavenging

RELATIVE POVERTY

CIVIL SOCIETY

- Ensure children get better education, nutrition, skills and general awareness
- Utilize Government services through participatory governance
- Embracing attitude of calculated risk to seek entrepreneurial opportunities
- Moving beyond socio cultural barriers of caste
- Make lower sections aware of their rights
- Shift of workforce from agriculture to other sectors for better paid jobs
- Shifting away from sub-culture of poverty to culture of decent, clean and civic living

WAY AHEAD

Cooperative federalism and collaboration between State and Civil society is must to break the intergenerational cycle. Future generations should embrace progressive ideas and innovative thinking to enable political and socio-economic equity.

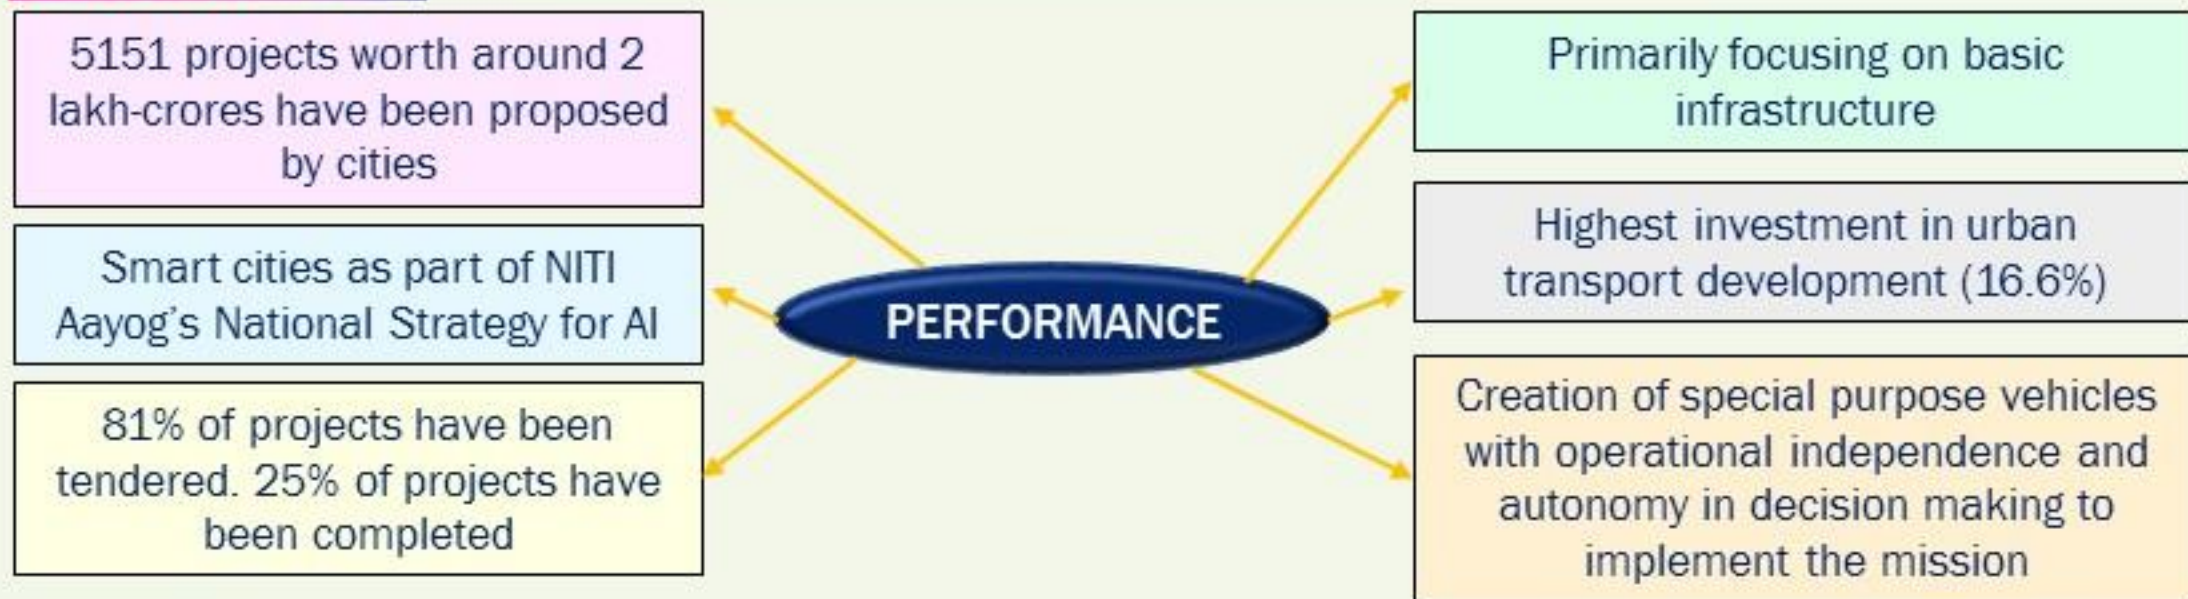

Smart Cities Mission completed 5 years. How far is the Smart Cities Mission successful in achieving its desired objectives? In your opinion, what are the systemic challenges faced by Smart Cities Mission? (250 Words)

Smart Cities Mission is a flagship initiative by Indian Government aimed at improving quality of life, create employment and enhance incomes for all, especially the poor and disadvantaged, leading to inclusive cities.

SALIENT FEATURES

- Develop around 100 cities during 2016 - 2020 with financial support of 48,000 Cr.
- Area based development to transform existing areas (retrofit and redevelop) including slums into better planned ones.
- City extension (Greenfield) to accommodate expanding population.
- Application of smart solutions to improve infrastructure and services.

PERFORMANCE**IRRITANTS**

- High end communication network for smart solutions is far away
- Lack of clarity on whether the mission is for high-end or basic infrastructure
- Lack of coordination among Government agencies
- Lopsided priorities in investing allocated funds
 - ✓ Only 2.4% share to waste management
 - ✓ 2.5% share to storm water drainage work
- Creation of parallel governance mechanism in some cities
- No efforts to create awareness about need of cities
- Locations chosen away from cities is another challenge

CONCLUSION

Institutional and legal mechanisms for any repercussions with regard to social justice, equity and cyber safety must be stitched on to mission strategy. Tapping municipal bonds and reality based monitoring of the mission is necessary.

What do you understand by Jugaad? How far can the faster economic growth post-2000 be attributed to this Indian way of innovation? (150 Words)

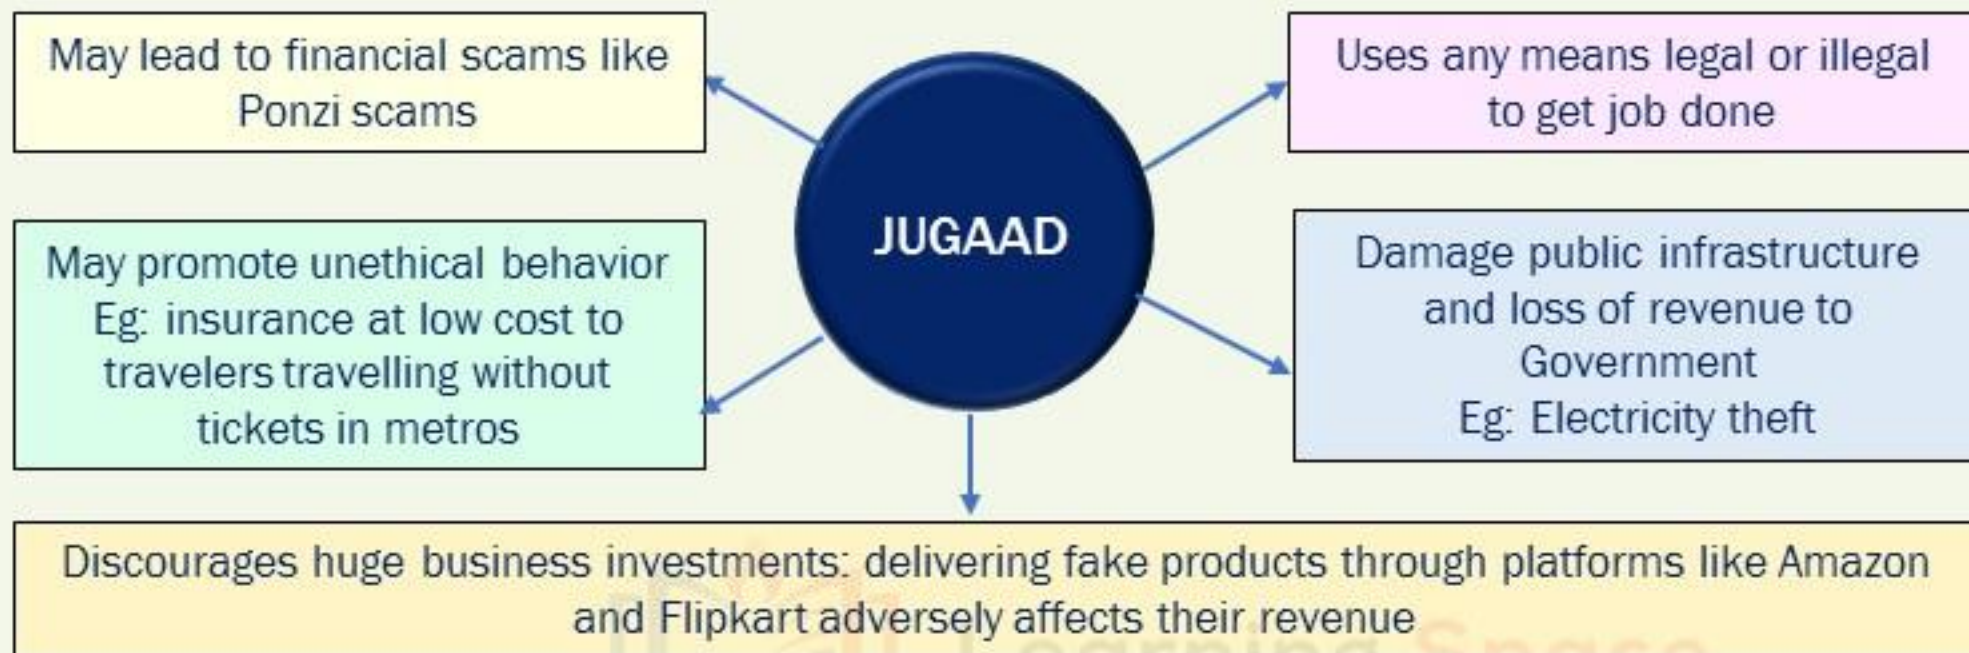

Jugaad is a problem-solving approach that uses limited resources and frugal innovation. It represents a way for low-income Indians to access modern conveniences by a cheap quick fix.

JUGAAD – INVISIBLE CONTRIBUTION TO ECONOMIC GROWTH

- Irrigation facility to Agriculture
 - ✓ Wind powered pumps for irrigation
- Enhanced work force
 - ✓ Jaipur foot allowed amputees to work again
- Increased productivity of work force
 - ✓ Cheap sanitary pads for women and teenage girls
- Lifted people out of poverty
 - ✓ Invention of fruit processor by Rickshaw wala
- Generation of economic activity
 - ✓ Use of washing machine to make lassi
- Better standards of living
 - ✓ Home-made air conditions and water coolers
- R&D in economy at low cost

ISSUES WITH JUGAAD

CONCLUSION

Though Jugaad played key role in Pre 2000 economic growth, its role in Post 2000 economic growth in India is decreasing as per World Bank Report.

What do you understand by Common but Differentiated Responsibilities and Respective Capabilities (CBDR-RC)? Enumerate the challenges in implementing the Paris Climate Pact. (250 Words)

Common but Differentiated Responsibilities and Respective Capabilities (CBDR-RC) is a principle within UNFCCC that acknowledge the different capabilities and differing responsibilities of individual countries in addressing climate change.

CBDR HAS TWO ASPECTS

1. "Common":

- Every country (both developed and developing) must take part in countering climate change.

2. "But differentiated responsibilities":

- Historically biggest polluters should do more compared to the recent polluters i.e., responsibilities proportional to pollution caused.
- CBDR-RC remained a matter of concern in implementing Paris Agreement.

PARIS AGREEMENT

- Set a goal of limiting global warming to below 2°C, preferably 1.5°C, compared to pre-industrial levels.
- Net zero GHG emissions during 2nd half of 21st century
- Developed countries reaffirmed the commitment to mobilize \$100 bn a year by 2020.
- Reaffirmed the Warsaw international mechanism for loss and damage to avert, minimize and address loss and damage due to climate change.

CHALLENGES IN IMPLEMENTING PARIS PACT

- Finalizing rulebook for transparent framework and accounting mechanism
- Ensure robust and effective transparency and review mechanism
- Insufficiency of the pledged NDCs to meet GHG reduction goal
- Major polluters like USA moving out of treaty
- Developed countries accusing developing countries of dubious quantification of emission reduction certificates
- Redundant ERCs with developing nations under Pre 2020 Kyoto framework to be continued in Post 2020 Paris Pact
- Developing mechanism for Post 2020 carbon markets
- Developed nations stressing on more emission cuts from developing countries while developing countries emphasizing on watering down CBDR by developed nations
- Status of \$100bn a year funds transfer in doldrums
- Challenge of meeting global food demand while mitigating and adopting to climate change
- Developing nations fighting poverty alleviation need time to shift from fossil fuel-based economy

FINALLY

Coherent climate policies and enabling investment environment are fundamental for ensuring that public and private finance flows are consistent with climate resilient development pathways. Global climate action should be guided by enlightened self-interest which stresses that a nation's well-being depends on global well-being.

Narrate various measures taken by the Government to promote Electric Vehicles. How far is India away from developing the manufacturing ecosystem for Electric Vehicles? (250 Words)

Vehicular emission remained as a major source for PM10, PM2.5 that choked capital in recent times. Further, to meet the NDCs under Paris Pact and need to reduce GHG emission, it is inevitable for India to adopt Electric Vehicles.

MEASURES TO PROMOTE E-VEHICLES

- National Electricity Mobility Mission Plan 2020 – to achieve 6 to 7 million sales of hybrid and electric vehicles every year from 2020
- Promoting Green Public Transport through incentives under FAME II and FAME I
- Power Ministry's policy that charging electric vehicles will be a service and not electricity sale
- ISRO commercializing indigenously developed Lithium ion battery technology
- NITI Aayog initiative to promote electric bus fleet on PPP mode, on operational expenditure model rather than paying upfront capital cost
- Guidelines to provide for electric vehicle charging stations in private and commercial buildings

INDIA AWAY FROM MANUFACTURING ECOSYSTEM FOR ELECTRIC VEHICLES

- Delay in channelizing the demand for battery, which is an ideal opportunity for domestic manufacturing industry and employment generation
- Absence of R&D on battery storage technologies – dependence on lithium can increase the future import bill
- Lack of demand stimulus for electric vehicles
- Private investments in EV ecosystem still in nascent stage
- Growing presence of China in EV manufacturing and sales

WAY FORWARD

India needs to take immediate steps on:

- Creating R&D to develop alternate battery system based on graphite etc.
- Battery recycling research to recover associated minerals.
- Strong Government stimulus through infrastructure and incentive creation to EVS for both demand and investments

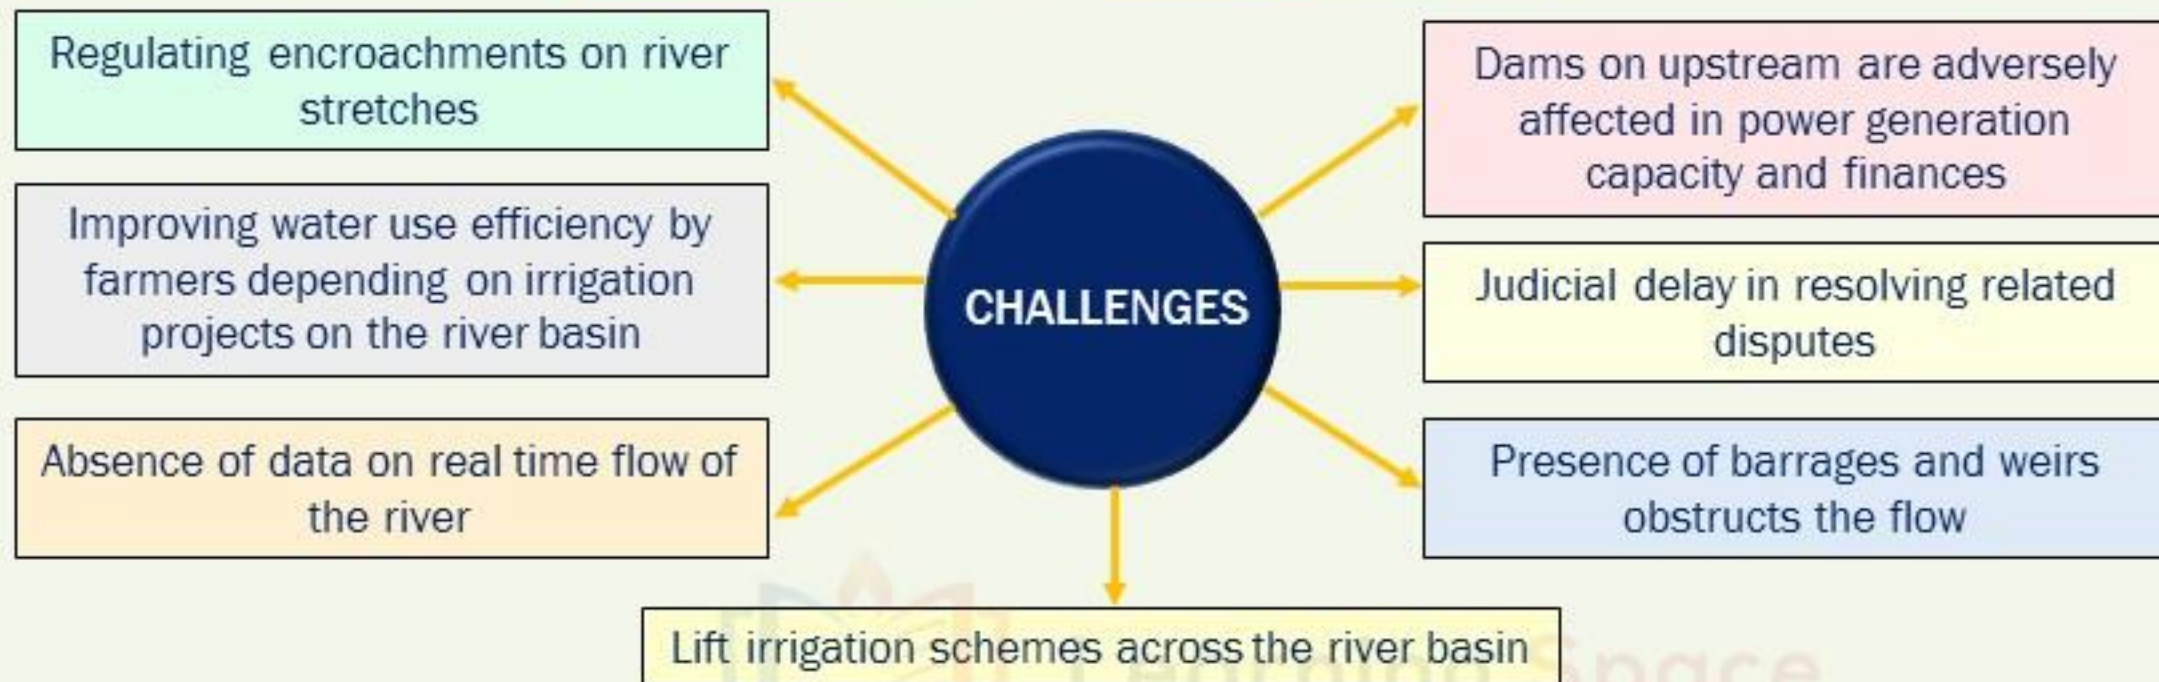

What is the rationale behind prescribing the minimum ecological flow for main stem of River Ganga? Critically examine various challenges in ensuring ecological flow.
(150 Words)

Minimum ecological flow is the quantity of water flow required to protect the structure and function of river ecosystem. It is needed to:

- Prevent alteration of physical regime of river
- Conserve hydrological and ecological functions of drainage networks
- Allow river to naturally clean itself
- Protect the aquatic biodiversity

National Mission for Clean Ganga stipulated the guidelines to maintain ecological flow along various stretches of Ganga river.

CHALLENGES IN ENSURING E-FLOW

CONCLUSION

Government should promote efficient irrigation and agricultural practices by incentivizing farmers. Overcoming technical challenges by hydro projects and clear understanding on influent and effluent streams is necessary to realize ecological flow.

Discuss political attitudes in the context of the generic ABC model of attitude. (150 words)

Political attitude is the qualitative evaluation of political ideologies and their mode of implementation. This determines the voting behaviour and thereby the government policy.

APPLICATION OF GENERIC ABC MODEL

1. AFFECTIVE COMPONENT

- Deals with emotions.
- Involves sense of hope, fear, anger, worry about a particular political ideology.
- Suppose, a leftist party captures power, then the poor man feels a sense of hope while capitalists fear sense of hopelessness.

2. COGNITIVE COMPONENT

- Deals with knowledge, thoughts and associated interpretations.
- People develop conscious opinions about political ideologies through News Paper, social media and coffee table discussions etc.
- **Eg:** Individual contemplates about tighter labour regulations by a leftist party.

3. BEHAVIOURAL COMPONENT

- Display of behaviour towards a political ideology.
- Involves voting, sloganeering and writing news report in support or against a political ideology.

WAY AHEAD

As stated Joseph de Maistre “Every nation gets the government it deserves”. Thus, to raise a progressive government, the political attitudes of people should be progressive and rationality based rather than emotions based.

Analyse social influence as basis of attitude. What are enablers of social influence?
(150 words)

Social influence refers to a person influencing the other to change latter's attitude. As attitude is made up of emotions, opinions and behaviour, social influence alters or conditions other persons' emotions, opinions and behaviour.

Eg: All IEC (Information, Education and Communication) activities of government

- Mann Ki baath of Prime Minister to influence people's attitude to be progressive.
- "Quit smoking" ad before screening movies in theatres is an attempt of social influence to change attitude of smokers.

FEATURES OF SOCIAL INFLUENCE

ENABLERS & SOCIAL INFLUENCE

ENABLERS

Peer Pressure

Charismatic Personality **Eg:** Martin Luther King

Master - Servant relationship or Teacher - Student relationship
Eg: Buddha and his disciples.

Content of influencing attitude

✓ Should be beneficial, rational and practicable to accept.

Presentation of attitude

Persuasion

✓ Deliberate attempt to condition the attitude

CONCLUSION

Effective use of social influence is needed to sustain the gains of schemes like Swachh Bharat. Further, it can also result in progressive mindset among citizens and a mature democracy.

Elaborate the Sevottam model of quality public service delivery. (150 words)

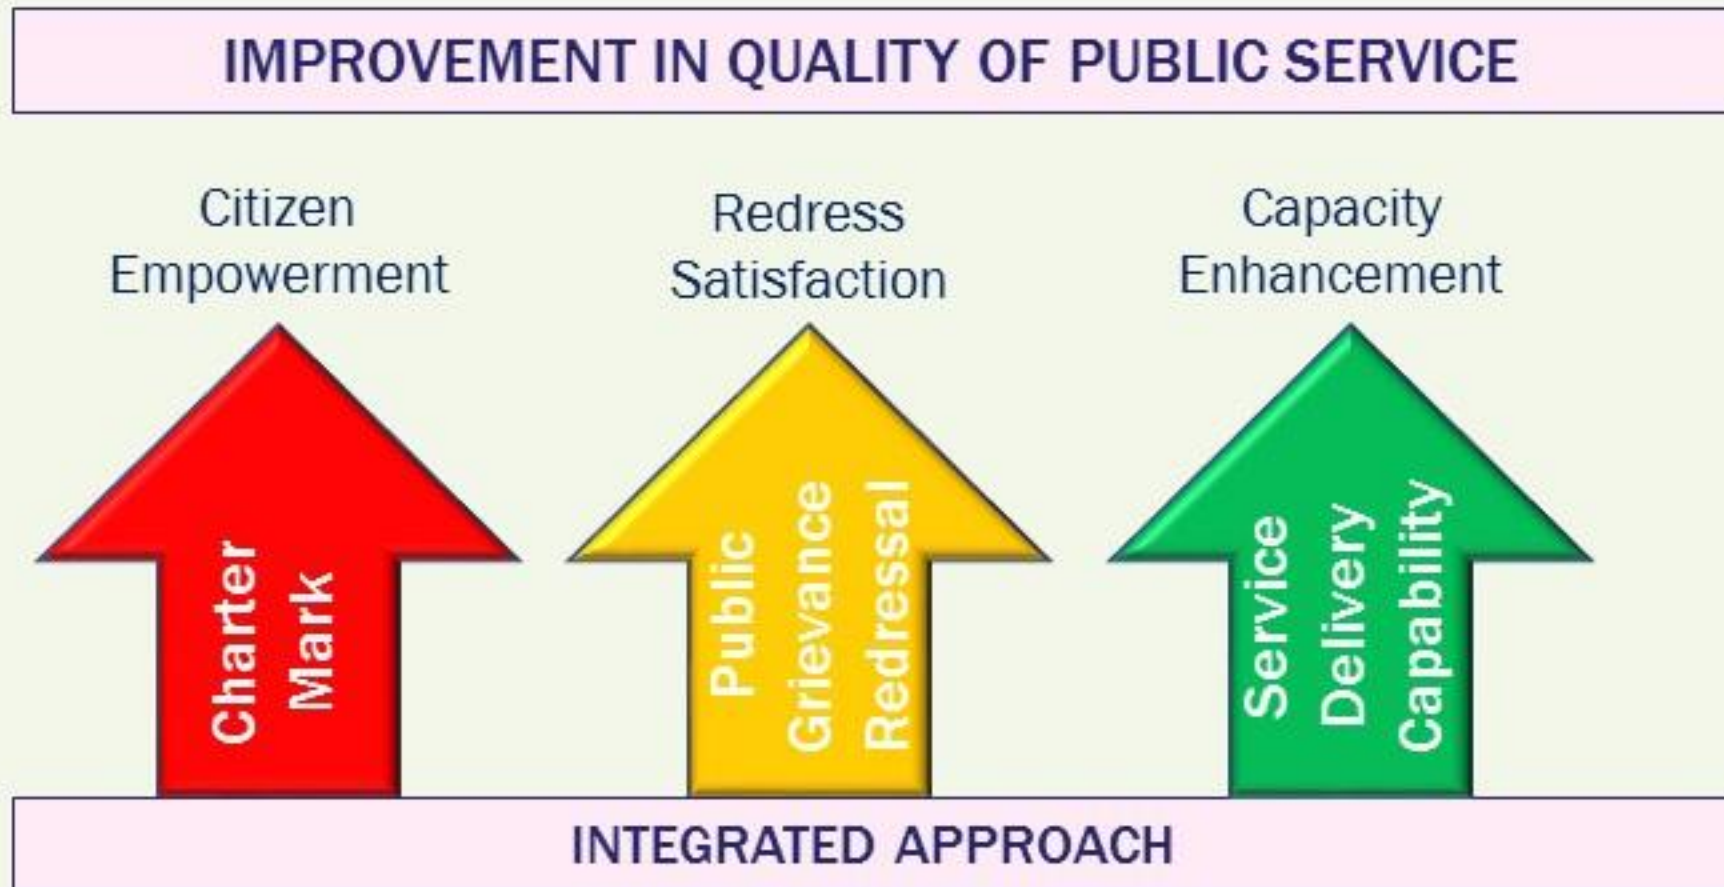

Sevottam model is a 3-pronged model developed by Indian government for enhancing quality of public service delivery.

It includes:

- Implementation of Citizen Charter
- Public Grievance Redressal
- Capacity Building

INTEGRATED APPROACH

1. CITIZEN CHARTER

- Developing citizen charter with stake holder consultation
- Strict display of citizen's charters in every government office

2. PUBLIC GRIEVANCE REDRESSAL

- Setting up grievance redressal system such that Citizens are satisfied with public service delivery
- Monitor public service delivery through citizen feedback mechanism

3. CAPACITY BUILDING

- Building capacity of employees involved in public service delivery
- Installing and upgrading of infrastructure for engendering quality public service delivery

CONCLUSION

Strict implementation of Sevottam model should be accompanied by efficient and inclusive social audit mechanism to realise good and ethical governance.
