EVOLUTION OF CIVILIZATION

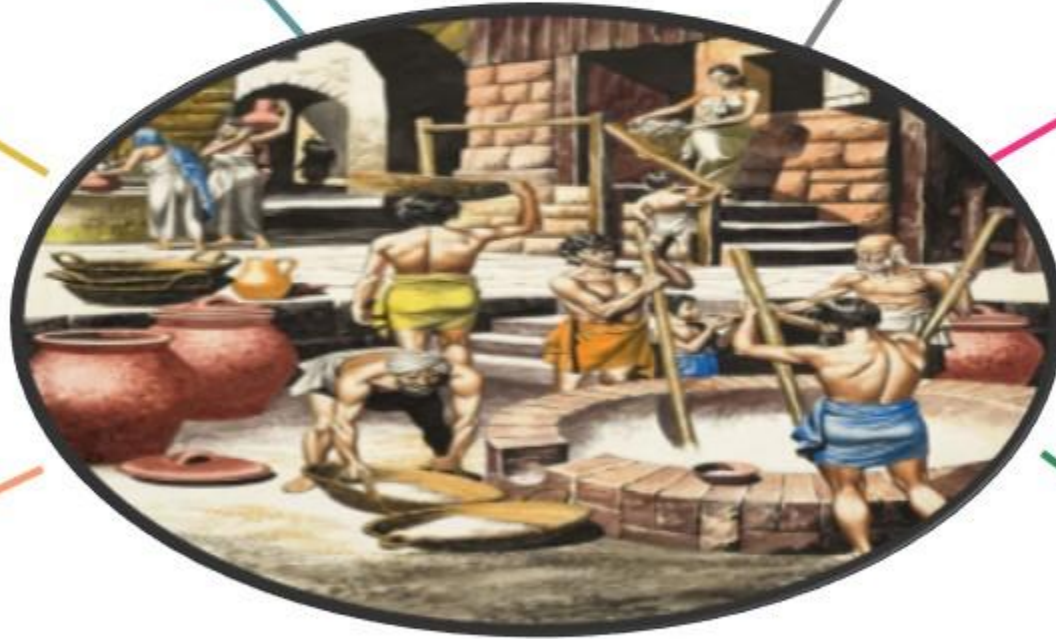

Civilisation: A society which has its own highly developed culture and way of life

Civilization emerged around **Indus** & other nearby rivers *Ghaggar-Hakra*, **dried up Saraswati** and the *Drasadvati*.

IVC is also referred as **Harappan Civilization** because the first city to be excavated was Harappa.

The term "**Indus Valley Civilization**" was used by **John Marshall** for the first time.

It is one of the oldest and longest surviving civilization

Bronze was extensively used during this period and thus this time period is referred as the **Bronze Age** (bronze is an alloy of copper and tin)

The people of this civilization were in touch with the other civilizations especially with Mesopotamian civilization.

INDUS VALLEY CIVILIZATION

The area occupied by the Harappan civilization was triangular in shape

MYSTERY OF SARASWATI RIVER

- 1 Researchers say the mighty river (probably 1500 km long) **dried up** roughly 4000 years ago **due to tectonic shift of the earth**.
- 2 Due to these shifts, supply to the river was cut off and the **remaining waters seeped down** below the earth from the fissures.
- 3 Sarasvati, portrayed as “surpassing in majesty and **mighty of all other waters**” and “pure in her course from mountains to the ocean,”

Experts say the river never flowed independently in Allahabad, but parts of it united with Yamuna which met the Ganga there, that is how all the three are said to have met.
