

GEOGRAPHY

PHYSICAL GEOGRAPHY

MODULE -1

- WHAT IS GEOGRAPHY?
- WHY IS IT IMPORTANT?
- PHYSICAL GEOGRAPHY
- HUMAN GEOGRAPHY

WHAT IS GEOGRAPHY?

- The term 'Geography' was first coined by **Eratosthenes**.
- He was a Greek scholar (276-194 BC.).
- The word has been derived from two roots from Greek language.
- **Geo** means 'Earth' and **Graphos** means 'Description'.
- So, it is **description** of the **Earth**.
- Hence Geography can be defined as 'the description of the Earth as the abode of human beings'.

The Geography is not that simple and it is multi-dimensional concept.

WHY GEOGRAPHY IS SO IMPORTANT FOR THE HUMAN BEINGS?

- 1 The Earth is ever changing and human beings are ever active.
- 2 Primitive human societies were directly dependent on their immediate environment.
- 3 So, the Geography is concerned with the study of 'nature' and 'human' interactions as an integrated whole.
- 4 Hence, human is an integral part of nature and nature has the imprints of human.

Nature has influenced different aspects of human life.

ADAPTATION AND MODIFICATION

- 1 Human beings have come to terms with nature through adaptation and modification.
- 2 Present societies have modified the natural environment by inventing and using technology.
- 3 They have expanded the horizon of the operation by appropriating and utilising the resources provided by the nature.

HUMAN INTERACTION

INTERACTION BETWEEN PHYSICAL ENVIRONMENT AND HUMAN BEINGS

DIALOGUE BETWEEN **HUMAN** AND **NATURE**

*You created the soil,
I created the cup.*

*You created night, I created
the lamp.*

*You created wilderness, hilly
terrains and deserts,
I created flower beds and
gardens.*

GEOGRAPHY AND THE MODERN WORLD

- Spatial depth provided defence to many countries.
- The defence provided by the oceanic expanse around the countries of the new world has protected them from wars.
- Himalayas have acted as great barriers and provided protection. But, the passes in the Himalayas provided routes to the migrants, invaders from Central Asia.
- Navigation technology helped European countries to colonise a number of countries of Asia and Africa.

The geographical factors have modified the course of history in different parts of the world.

BRANCHES OF GEOGRAPHY

PHYSICAL

HUMAN

INTERFACE
BIOGEOGRAPHY

PLANT
GEOGRAPHY

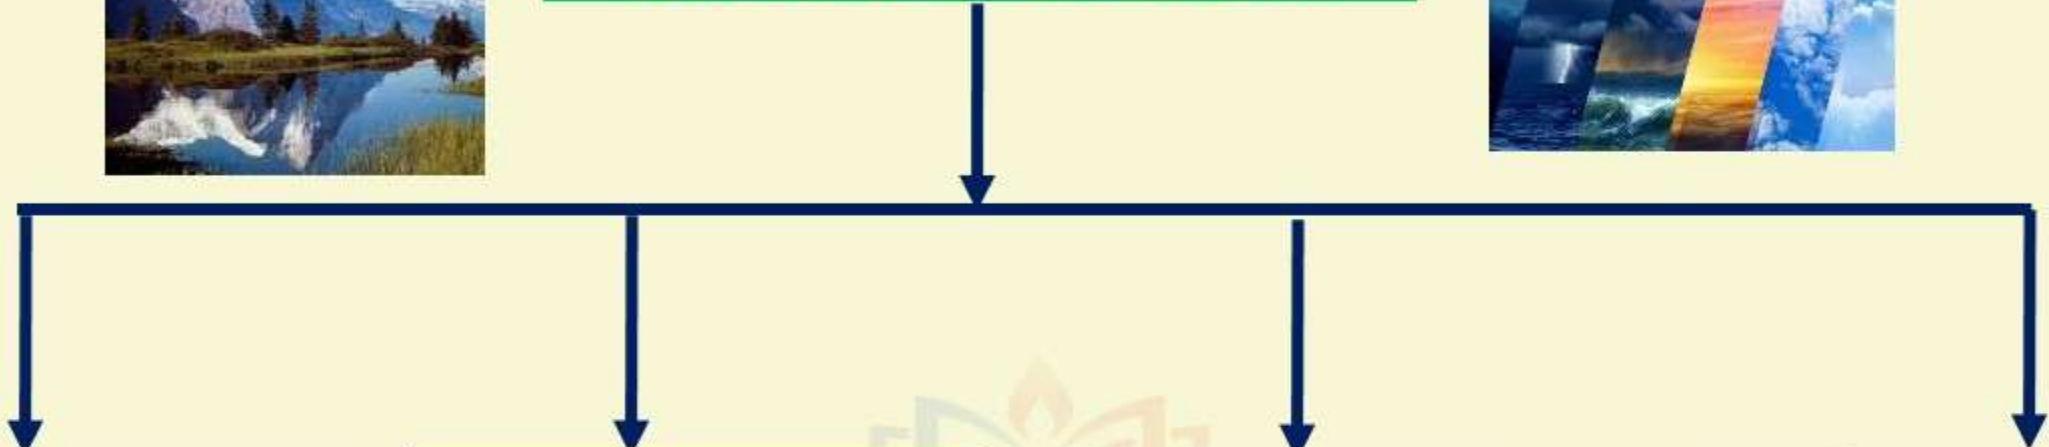

ZOO
GEOGRAPHY

ECOLOGY

ENVIRONMENT
GEOGRAPHY

BRANCHES OF GEOGRAPHY

PHYSICAL GEOGRAPHY

GEOMORPHOLOGY

The study of landforms, their evolution and processes.

CLIMATOLOGY

The study of structure of atmosphere and elements of weather and climates and climatic types and regions.

HYDROLOGY

The study of water over the surface of the Earth including oceans, lakes, rivers and other water bodies.

SOIL GEOGRAPHY

The study of processes of soil formation, soil types, their fertility status, distribution etc.

PHYSICAL GEOGRAPHY

GEOMORPHOLOGY

CLIMATOLOGY

HYDROLOGY

SOIL GEOGRAPHY

BRANCHES OF GEOGRAPHY

HUMAN GEOGRAPHY

SOCIAL/ CULTURAL

The study of society and its spatial dynamics.

POPULATION AND SETTLEMENT

It looks at population growth, density, sex ratio, migration, occupational structure etc.

ECONOMIC GEOGRAPHY

Agriculture, industry, trade, transport, infrastructure, services etc.

HISTORICAL GEOGRAPHY

The geographical features and historical processes.

POLITICAL GEOGRAPHY

Political events and studies boundaries, space relations between neighbouring political units and political behaviour of the population.

HUMAN GEOGRAPHY

SOCIAL/ CULTURAL

POPULATION AND SETTLEMENT

ECONOMIC GEOGRAPHY

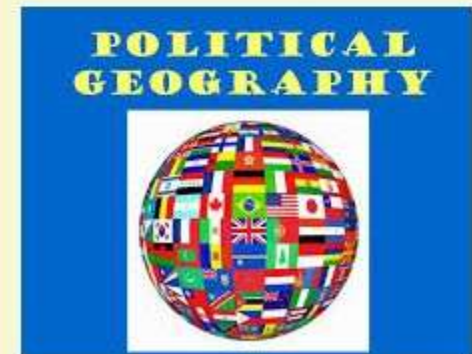

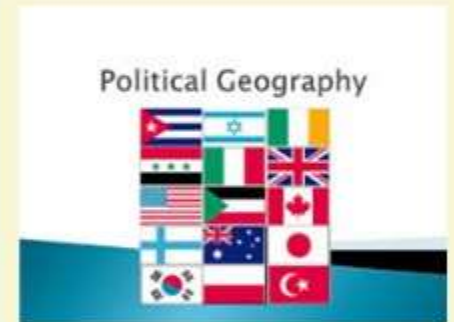

HISTORICAL GEOGRAPHY

The geographical features and historical processes.

POLITICAL GEOGRAPHY

BRANCHES OF GEOGRAPHY

BIOGEOGRAPHY

The interface between physical geography and human geography

PLANT GEOGRAPHY

Studies the spatial pattern of natural vegetation in their habitats.

ZOO GEOGRAPHY

The study of animals and their habitats

ECOLOGY

Scientific study of the habitats, characteristics of species

ENVIRONMENTAL GEOGRAPHY

Environmental problems such as land degradation, pollution and concerns for conservation.

BRANCHES OF GEOGRAPHY

BIOGEOGRAPHY

The interface between physical geography and human geography
