

WORLD HISTORY

MODULE - 4

RENAISSANCE-2

RENAISSANCE

RENAISSANCE ART

- Art in the Middle Ages was dominated by the Christian religion and Church.
- During the Renaissance importance was given to the love of nature and human body.
- Although the spirit of humanism prevailed, the subject matter of the most of the Renaissance art was Christian.
- Renaissance painting bloomed most profusely in Italy.
- Leonardo da Vinci, Michelangelo and Raphael were the dominant personalities among the Renaissance painters.

RENAISSANCE ART

LEONARDO DA VINCI

- He was one of the most versatile men of his time, was an artist, poet, musician, and engineer.
- Hence, he is known as the “Renaissance Man”.
- Born in Florence, he visited several countries.
- He was patronized by the Duke of Milan.
- His famous paintings were the Mona Lisa and the Last Supper.

RENAISSANCE ART

MICHELANGELO

- He was both a painter and sculptor.
- He lived in Florence and patronized by the Medici family. Later, he went to Rome.
- The magnificent frescoes on the ceiling of the Sistine Chapel in the Vatican represent his most brilliant achievement in painting.
- This work contains 145 pictures with 394 figures, some of which are as much as ten feet high.
- His painting, The Last Judgement is considered the best in the world.

RENAISSANCE ART

RAPHAEL

- He achieved a rare blending of devotional feeling with a sense of beauty.
- He produced a great number of paintings, of which the most familiar is the Madonna.

WORLD HISTORY

RENAISSANCE ART

VENETIAN SCHOOL

- The Venetian School is an excellent example of the secularization of the Renaissance art. Artistic expression in Venice was worldly and materialistic.
- Titian and Tintoretto were the greatest painters of Venice.

RENAISSANCE SCULPTURE

- 1** The art of sculpture had also witnessed progress during the Renaissance period.
- 2** It was more original and beautiful.
- 3** One of the most familiar examples of the Renaissance architecture is St. Peter's Church of Rome.

RENAISSANCE SCULPTURE

LORENZO Ghiberti

- He is the pioneer of the Renaissance sculpture.
- The magnificent doors at the Baptistery of Florence were his master piece.
- Michael Angelo appreciated the beauty of these doors as worthy to the gates of the Paradise.

DONATELLO

He produced the statue of St. George in Florence and that of St. Mark at Venice.

RENAISSANCE SCULPTURE

MICHELANGELO

- Besides being a painter, he was a celebrated sculptor.
- He produced some of his best sculptures for the Medici family in Florence.
- He was also the creator of the statue of David in Florence.

BRUNELLESCHI AND ROBBIA

They were the other famous sculptors of this period.

RENAISSANCE SCIENCE

- 1** The spirit of modern science was born with the Renaissance.
- 2** Science in the Middle Ages struggled against superstitions.
- 3** The Renaissance brought about a critical observation of natural phenomena.
- 4** This spirit of learning took root in science.

RENAISSANCE SCIENCE

FRANCIS BACON

- He is considered the father of modern science.
- He denounced the deductive method and advocated the inductive method in scientific research.

DESCARTES

- He brought out convincingly the necessity of questioning everything.
- He contributed the idea of doubt, and doubt was the forerunner of a new age in science.

RENAISSANCE SCIENCE

COPERNICUS

- He established the heliocentric theory.
- According to this theory the heavenly bodies do not revolve about the earth as believed during that period but around the sun.

KEPLER

- He formulated mathematical laws to support the conclusions of Copernicus.
- He also stated that the planets revolve around the sun in elliptical orbits.

RENAISSANCE SCIENCE

GALILEO

Through the invention of the telescope brought new evidence to support the Copernican theory.

NEWTON

- He concluded that the movements of all celestial bodies were controlled by gravitation.

- With the new astronomical knowledge that was available, the old Julian calendar was reformed in 1582 by Pope Gregory XIII.

RENAISSANCE SCIENCE

VESALIUS

- He was a Netherlander.
- Wrote a treatise on human anatomy.

WILLIAM HARVEY

- He discovered the blood circulation, a prime contribution to medical science.
- In this period, chemistry became something more than alchemy.

HELMONT

- He discovered the carbon dioxide.

RENAISSANCE EXPLORATION

- 1** While many artists and thinkers used their talents to express new ideas, some Europeans took to the seas to learn more about the world around them.
- 2** In a period known as the Age of Discovery, several important explorations were made.
- 3** Voyagers launched expeditions to travel the entire globe.
- 4** They discovered new shipping routes to the Americas, India and the Far East, and explorers trekked across areas that weren't fully mapped.
- 5** Famous journeys were taken by Ferdinand Magellan, Christopher Columbus, Amerigo Vespucci (after whom America is named), Marco Polo etc.

RENAISSANCE RELIGION

- 1** Humanism encouraged Europeans to question the role of the Roman Catholic church during the Renaissance.
- 2** As more people learned how to read, write and interpret ideas, they began to closely examine and critique religion as they knew it.
- 3** Also, the printing press allowed for texts, including the Bible, to be easily reproduced and widely read by the people, themselves, for the first time.

RENAISSANCE RELIGION

MARTIN LUTHER

- 1** He is a German monk, led the Protestant Reformation – a revolutionary movement that caused a split in the Catholic church.
- 2** Luther questioned many of the practices of the church and whether they aligned with the teachings of the Bible..
- 3** As a result, a new form of Christianity, known as Protestantism, was created.

END OF THE RENAISSANCE

- 1** Scholars believe the demise of the Renaissance was the result of several compounding factors.
- 2** By the end of the 15th century, numerous wars had plagued the Italian peninsula.
- 3** Spanish, French and German invaders battling for Italian territories caused disruption and instability in the region.
- 4** Also, changing trade routes led to a period of economic decline and limited the amount of money that wealthy contributors could spend on the arts.

END OF THE RENAISSANCE

5 Later, in a movement known as the Counter-Reformation, the Catholic church censored artists and writers in response to the Protestant Reformation.

6 Many Renaissance thinkers feared being too bold, which stifled creativity.

7 Furthermore, in 1545, the Council of Trent established the Roman Inquisition, which made humanism and any views that challenged the Catholic church an act of heresy punishable by death.

8 By the early 17th century, the Renaissance movement had died out, giving way to the Age of Enlightenment.

RESULTS OF THE RENAISSANCE

- 1** The Renaissance remained the symbol of the beginning of the modern age.
- 2** The spirit of enquiry and the consequent scientific inventions produced important changes in the life of humanity.
- 3** The invention of the Mariner's Compass and other astronomical faiths led to the Geographical discoveries.
- 4** The impact of these discoveries was profound in the political and economic life of the people.
- 5** The reasoning spirit had resulted in the Reformation and changed the outlook of the people towards religion.
