CHHATTISGARH

SOUTH DIVISION

CENTRAL DIVISION

ANDHRA
PRADESH

Odisha's 30 districts were divided into three administrative divisions

- ✓ North division with its headquarter at Sambalpur.
- ✓ Central division with its headquarter at Cuttack.
- ✓ South division with its headquarter at Berhampur.

- RECENT AND PLEISTOCENE
- TERTIARY
- DECCAN TRAP
- GONDWANA AND VINDHYAN
- PRE-CAMBRIAN

- Odisha lies in the peninsular shield which is composed of Gondwana rocks.
- Coastal Plains are of recent origin which is built by sediments brought by the rivers during Pleistocene and recent periods.
- Precambrian rock system is also part of Odisha.

- Odisha is an extensive plateau which slopes gently into coastal plain along the Bay of Bengal.
- River Mahanadi which flows from West to East through the plateau divides the State into two parts.
- Northern part is an extension of Chotanagpur plateau
- Southern part is extension of Eastern Ghats range.

RELIEF FEATURES

Western Rolling Uplands

Physical divisions of Odisha:

- ✓ Orissa Coastal Plains
- ✓ Middle Mountains
- ✓ Rolling Uplands
- ✓ Subdued Plateau

Central Plateau

Odisha Coastal Plains

- Middle mountains are extensions of Eastern Ghats.
- Covers about 3/4th of the area of the State.
- Deep and broad valleys of mountains are cut by various rivers of the State.

Middle Mountains & Highlands

- Plateau region can be divided into the Panposh-Keonjhar-Pallahara plateau and Nawrangpur-Jeypore plateau.

- Rolling uplands are an outcome of continuous river action.
- Lower in elevation than plateaus.
- Grouped as- Rajgangpur uplands, Jharsuguda uplands, Bargarh, Bolangir-Titilagarh-Patnagarh, Bhawanipatna, Malkangiri uplands and Rairangpur uplands.

BAITARANI

- Originates from Gonasika or Guptaganga hills.
- Also known as Vaitarani.
- Major portion of the river basin lies within the state of Odisha but a small patch of the upper reach lies in Jharkhand.

BUDHABALANGA

- Also known as Balanga.
- Rises in the Similipal hills and plunges through Barehipani waterfalls.
- River basin lies entirely in Odisha.
- Palpala, Chipat are its tributaries.

**MAHANADI**

- Hirakud dam is constructed on it at Sambalpur.
- After reaching Dholpur in Odisha, rivers roll towards the Eastern Ghats and passes the Satkosia Gorge.
- Later it meets the plains of Odisha and reaches Cuttack.
- Empties into Bay of Bengal at Paradeep.

BRAHMANI

- Seasonal river in Odisha.
- Formed by the confluence of the Sankh and South Koel.
- Together with the Baitarani river, it forms a large delta.
- Empties into Bay of Bengal at Dhamra.

BANSHADHARA

- Also known as Vamsadhara.
- Rises in Kalahandi district
- Joins with Bay of Bengal at Kalingapatnam, A.P
- Mahendratana is its major tributary.

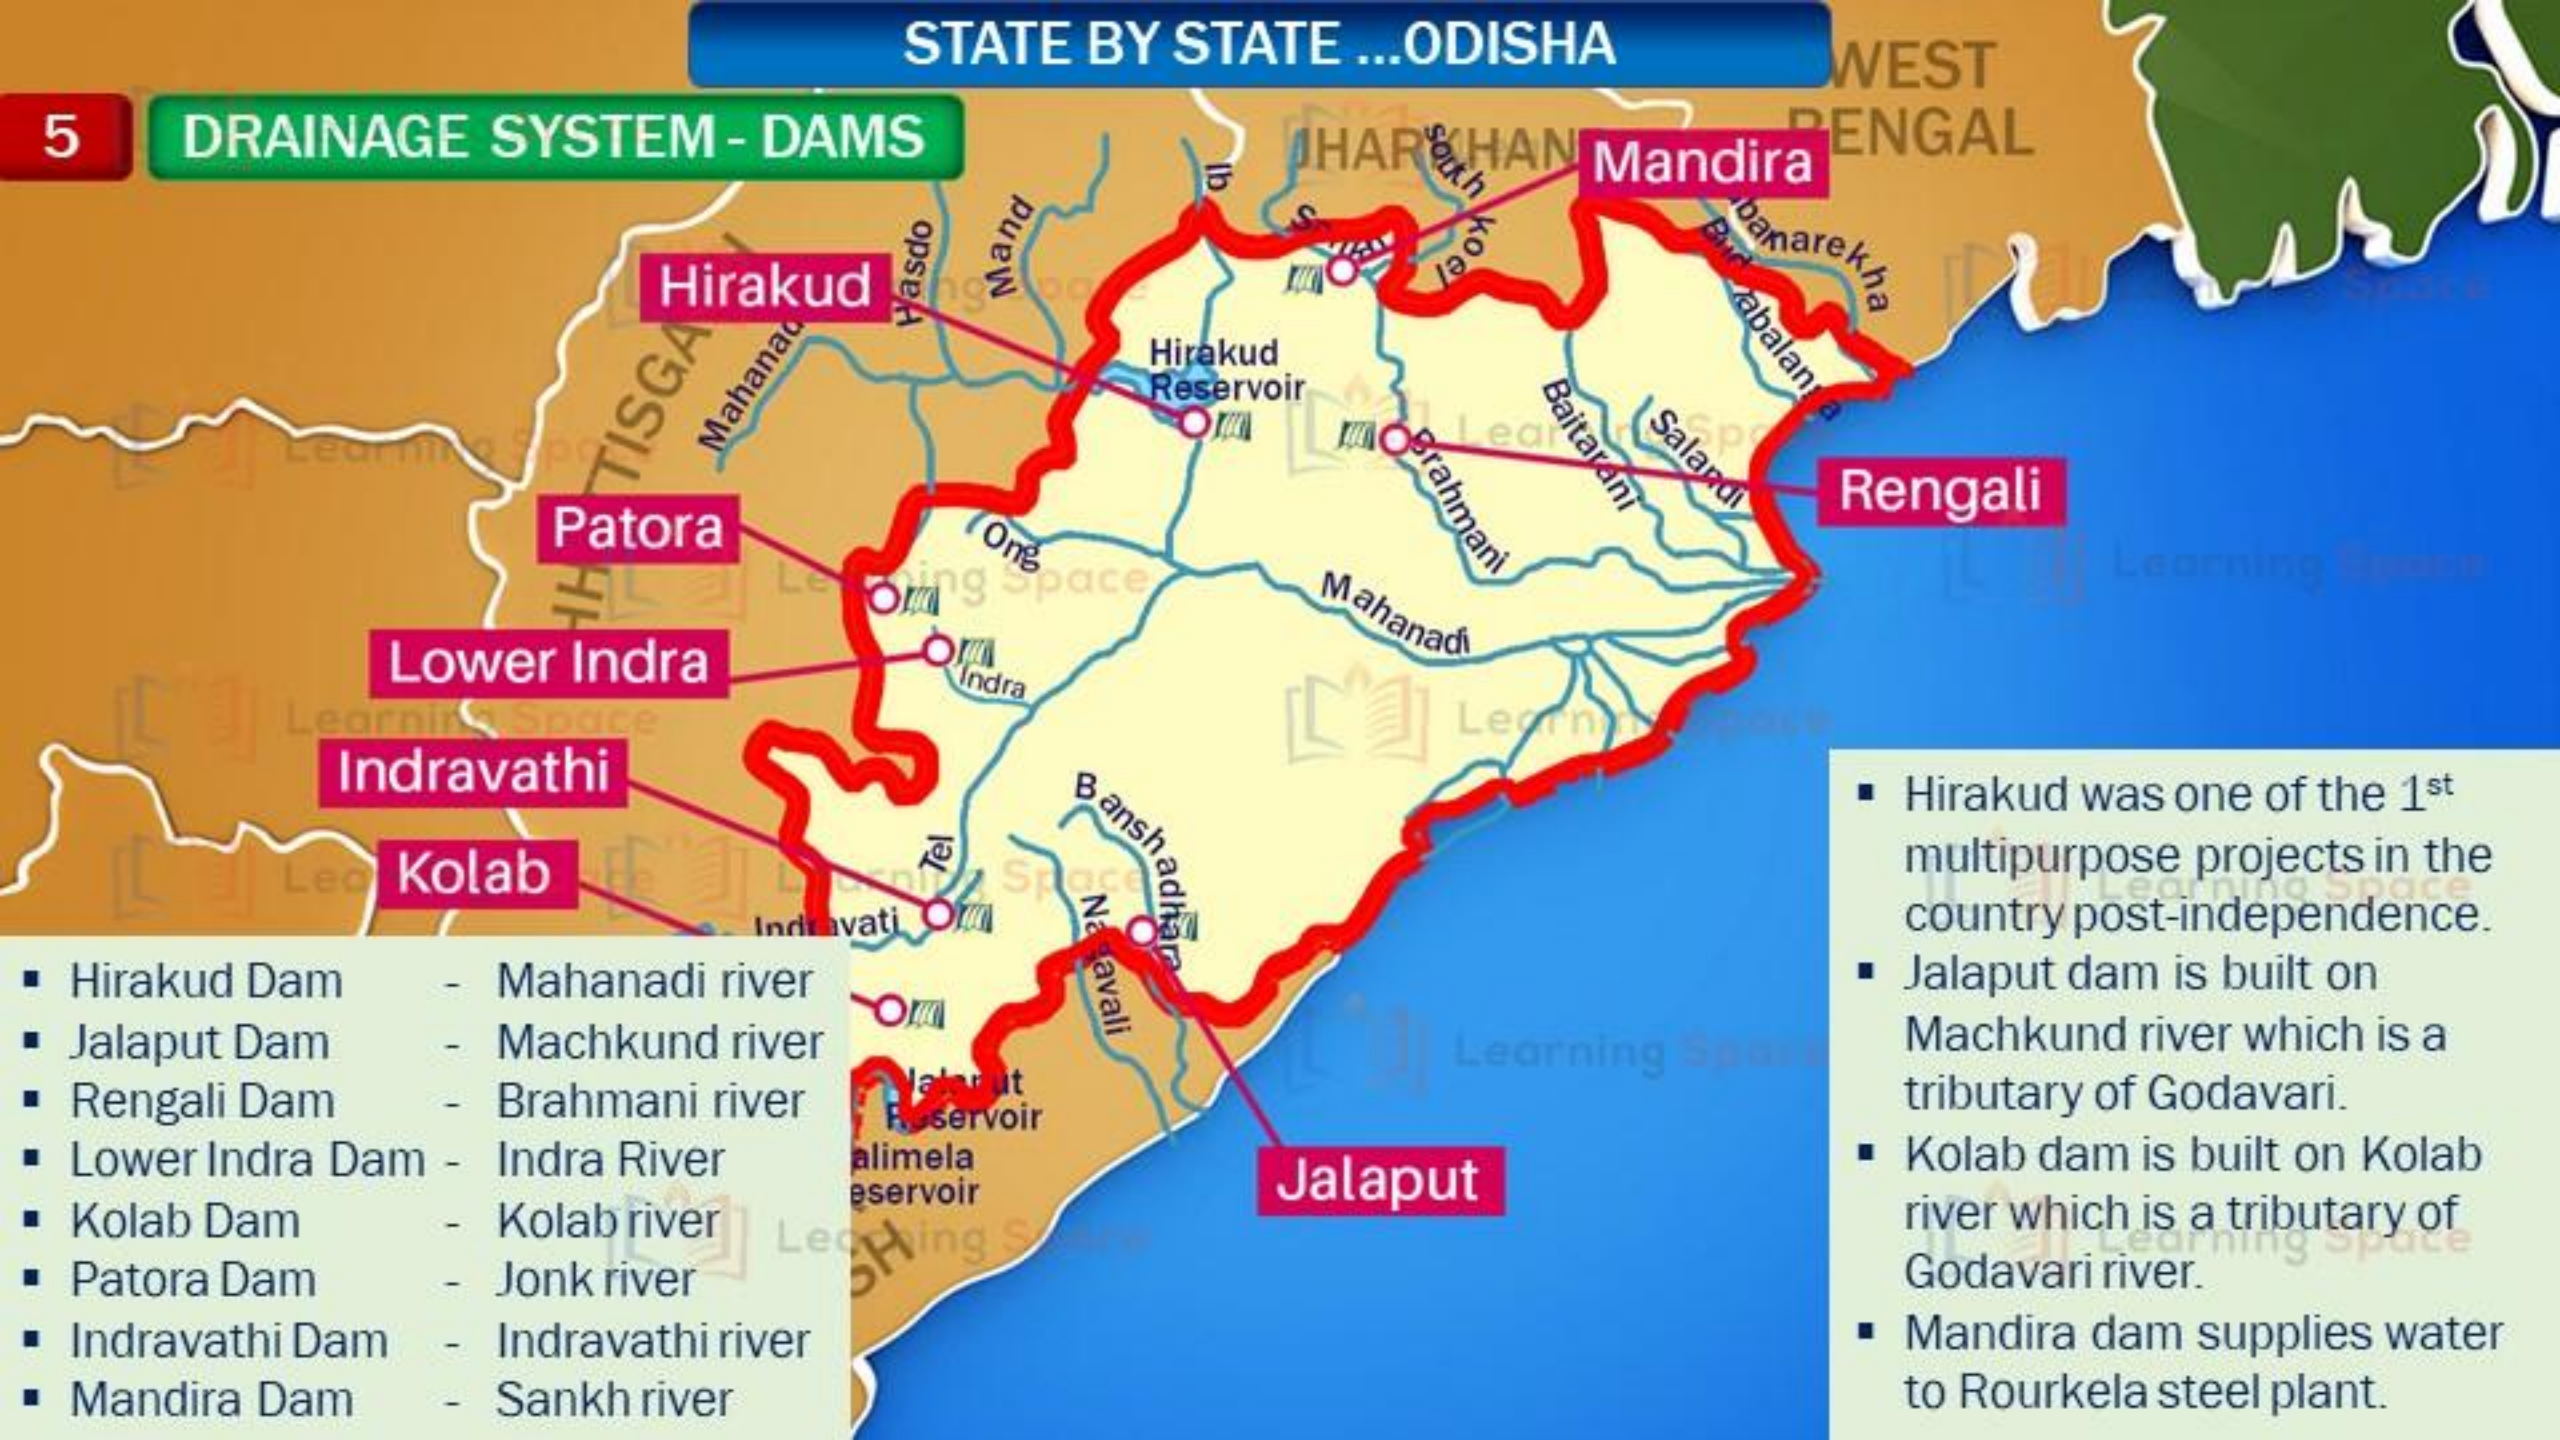

NAGAVALLI

- Forms a prime river of North eastern A.P and southern Odisha.
- Origin of Nagavali River lies in Eastern Ghats in Kalahandi district of Odisha.
- Other name for Nagavali River is Langulya.
- Nagavali river basin hosts the Niyamgiri hills where the Bauxite mining had been made proposed

- Subarnarekha is a rainfed river which flows through Jharkhand, W.B, Odisha and finally joins Bay of Bengal.
- Indravati river rises in Kalahandi district and flows at the border of Odisha-Chhattisgarh and finally joins with Godavari.
- Sabari river, also known as Kolab river rises at Sinkaram hill ranges in Odisha and finally meets Godavari in A.P.

DRAINAGE SYSTEM - DAMS

- Hirakud Dam - Mahanadi river
- Jalaput Dam - Machkund river
- Rengali Dam - Brahmani river
- Lower Indra Dam - Indra River
- Kolab Dam - Kolab river
- Patora Dam - Jonk river
- Indravathi Dam - Indravathi river
- Mandira Dam - Sankh river

- Hirakud was one of the 1st multipurpose projects in the country post-independence.
- Jalaput dam is built on Machkund river which is a tributary of Godavari.
- Kolab dam is built on Kolab river which is a tributary of Godavari river.
- Mandira dam supplies water to Rourkela steel plant.

RAINFALL

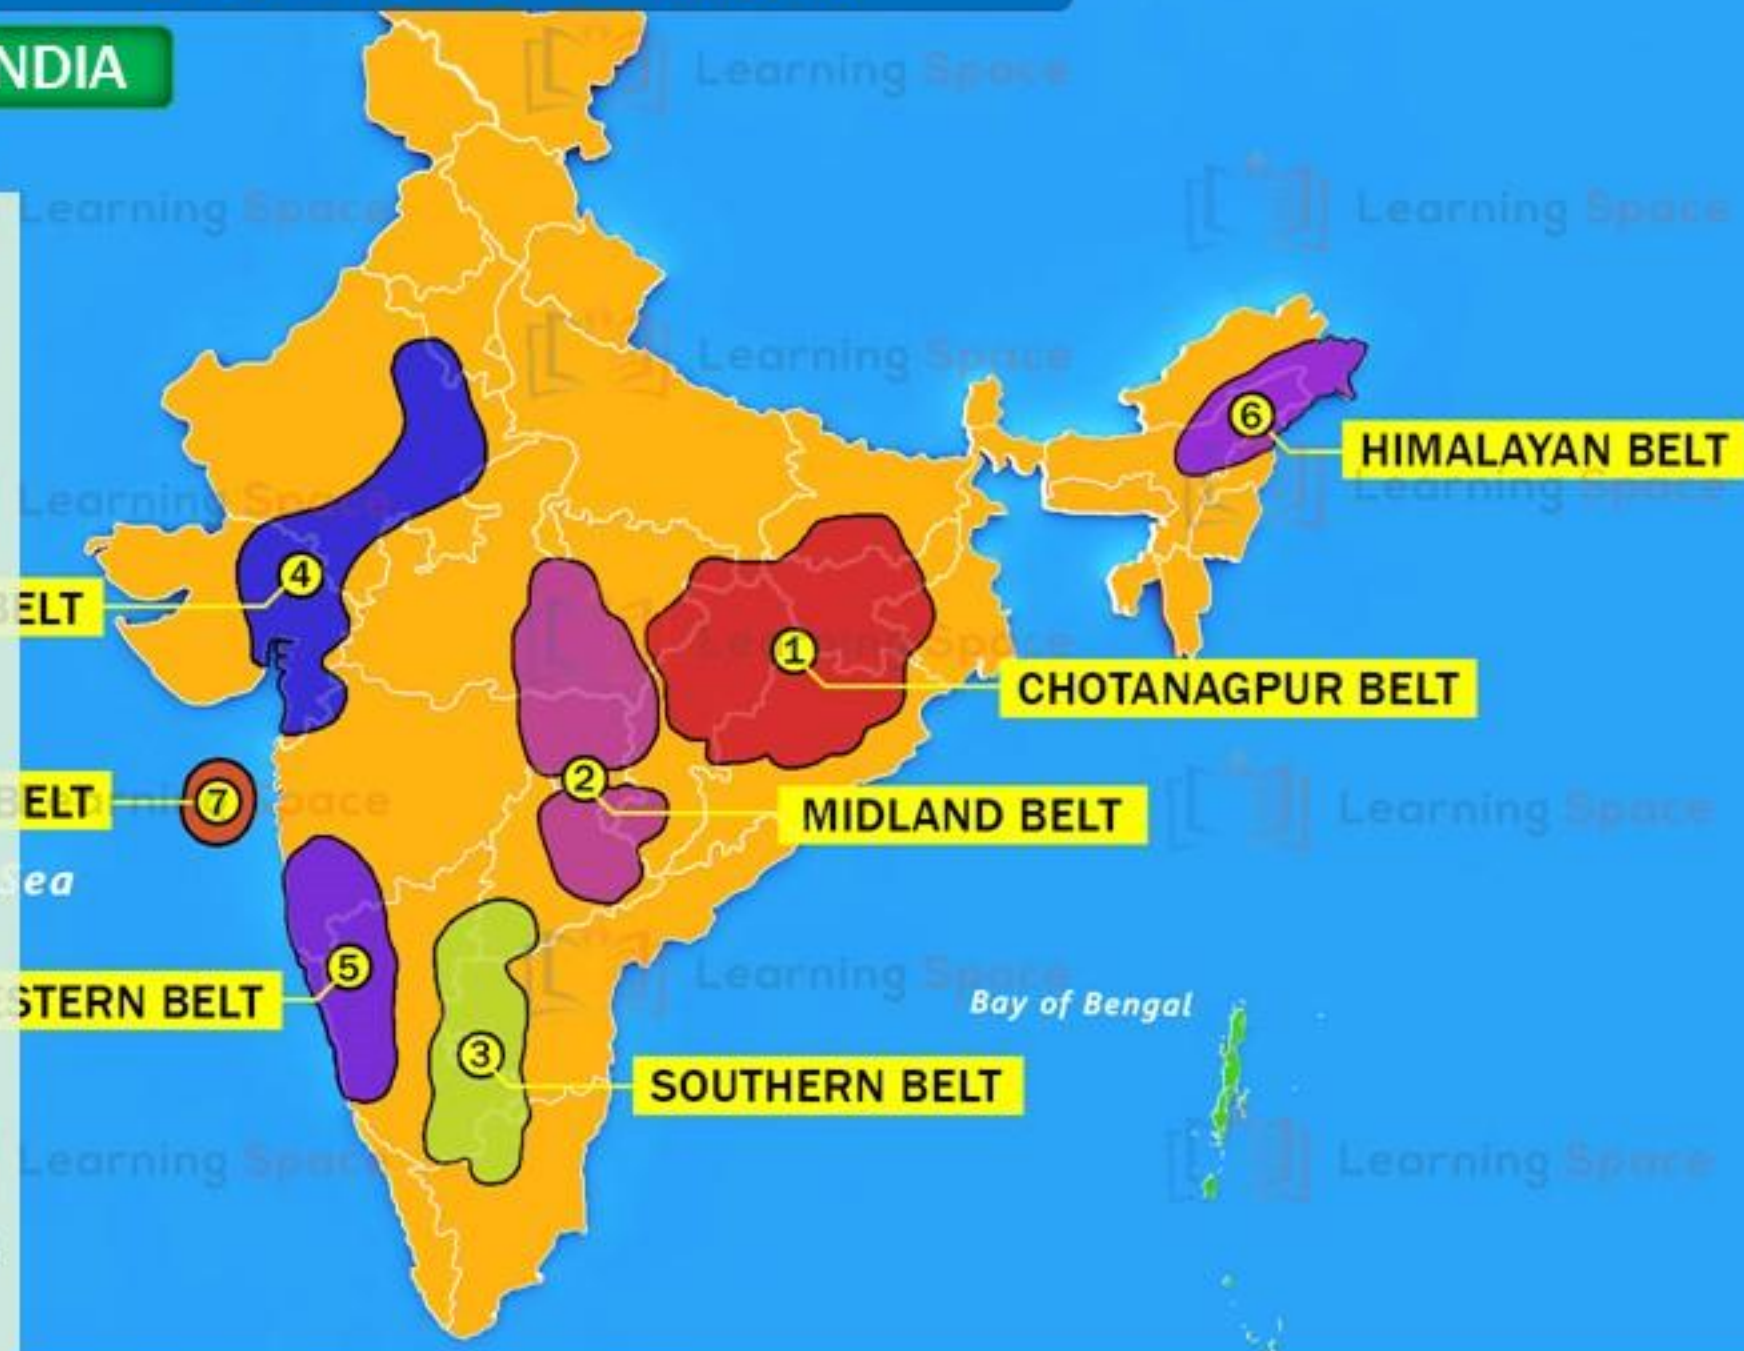

- Odisha experiences a Tropical Monsoon type of Climate.
- Majority of rainfall to the State is received during the period of Southwest monsoon from June to September.

- Rice is the dominant crop in Odisha.
- Wheat, Ragi, Maize, Bajra are other major cereals grown in the State.
- Cultivation of rice is mostly confined to Coastal plains whereas other cereals are cultivated in the middle mountainous and rolling uplands and plateaus of Orissa.
- Pulses are grown in irrigated tracts of river deltas.
- Jute and Sugarcane are the most important cash crops.
- Tea, Coffee, Rubber are concentrated in the hill slopes of Eastern Ghats.

MINERAL BELTS IN INDIA

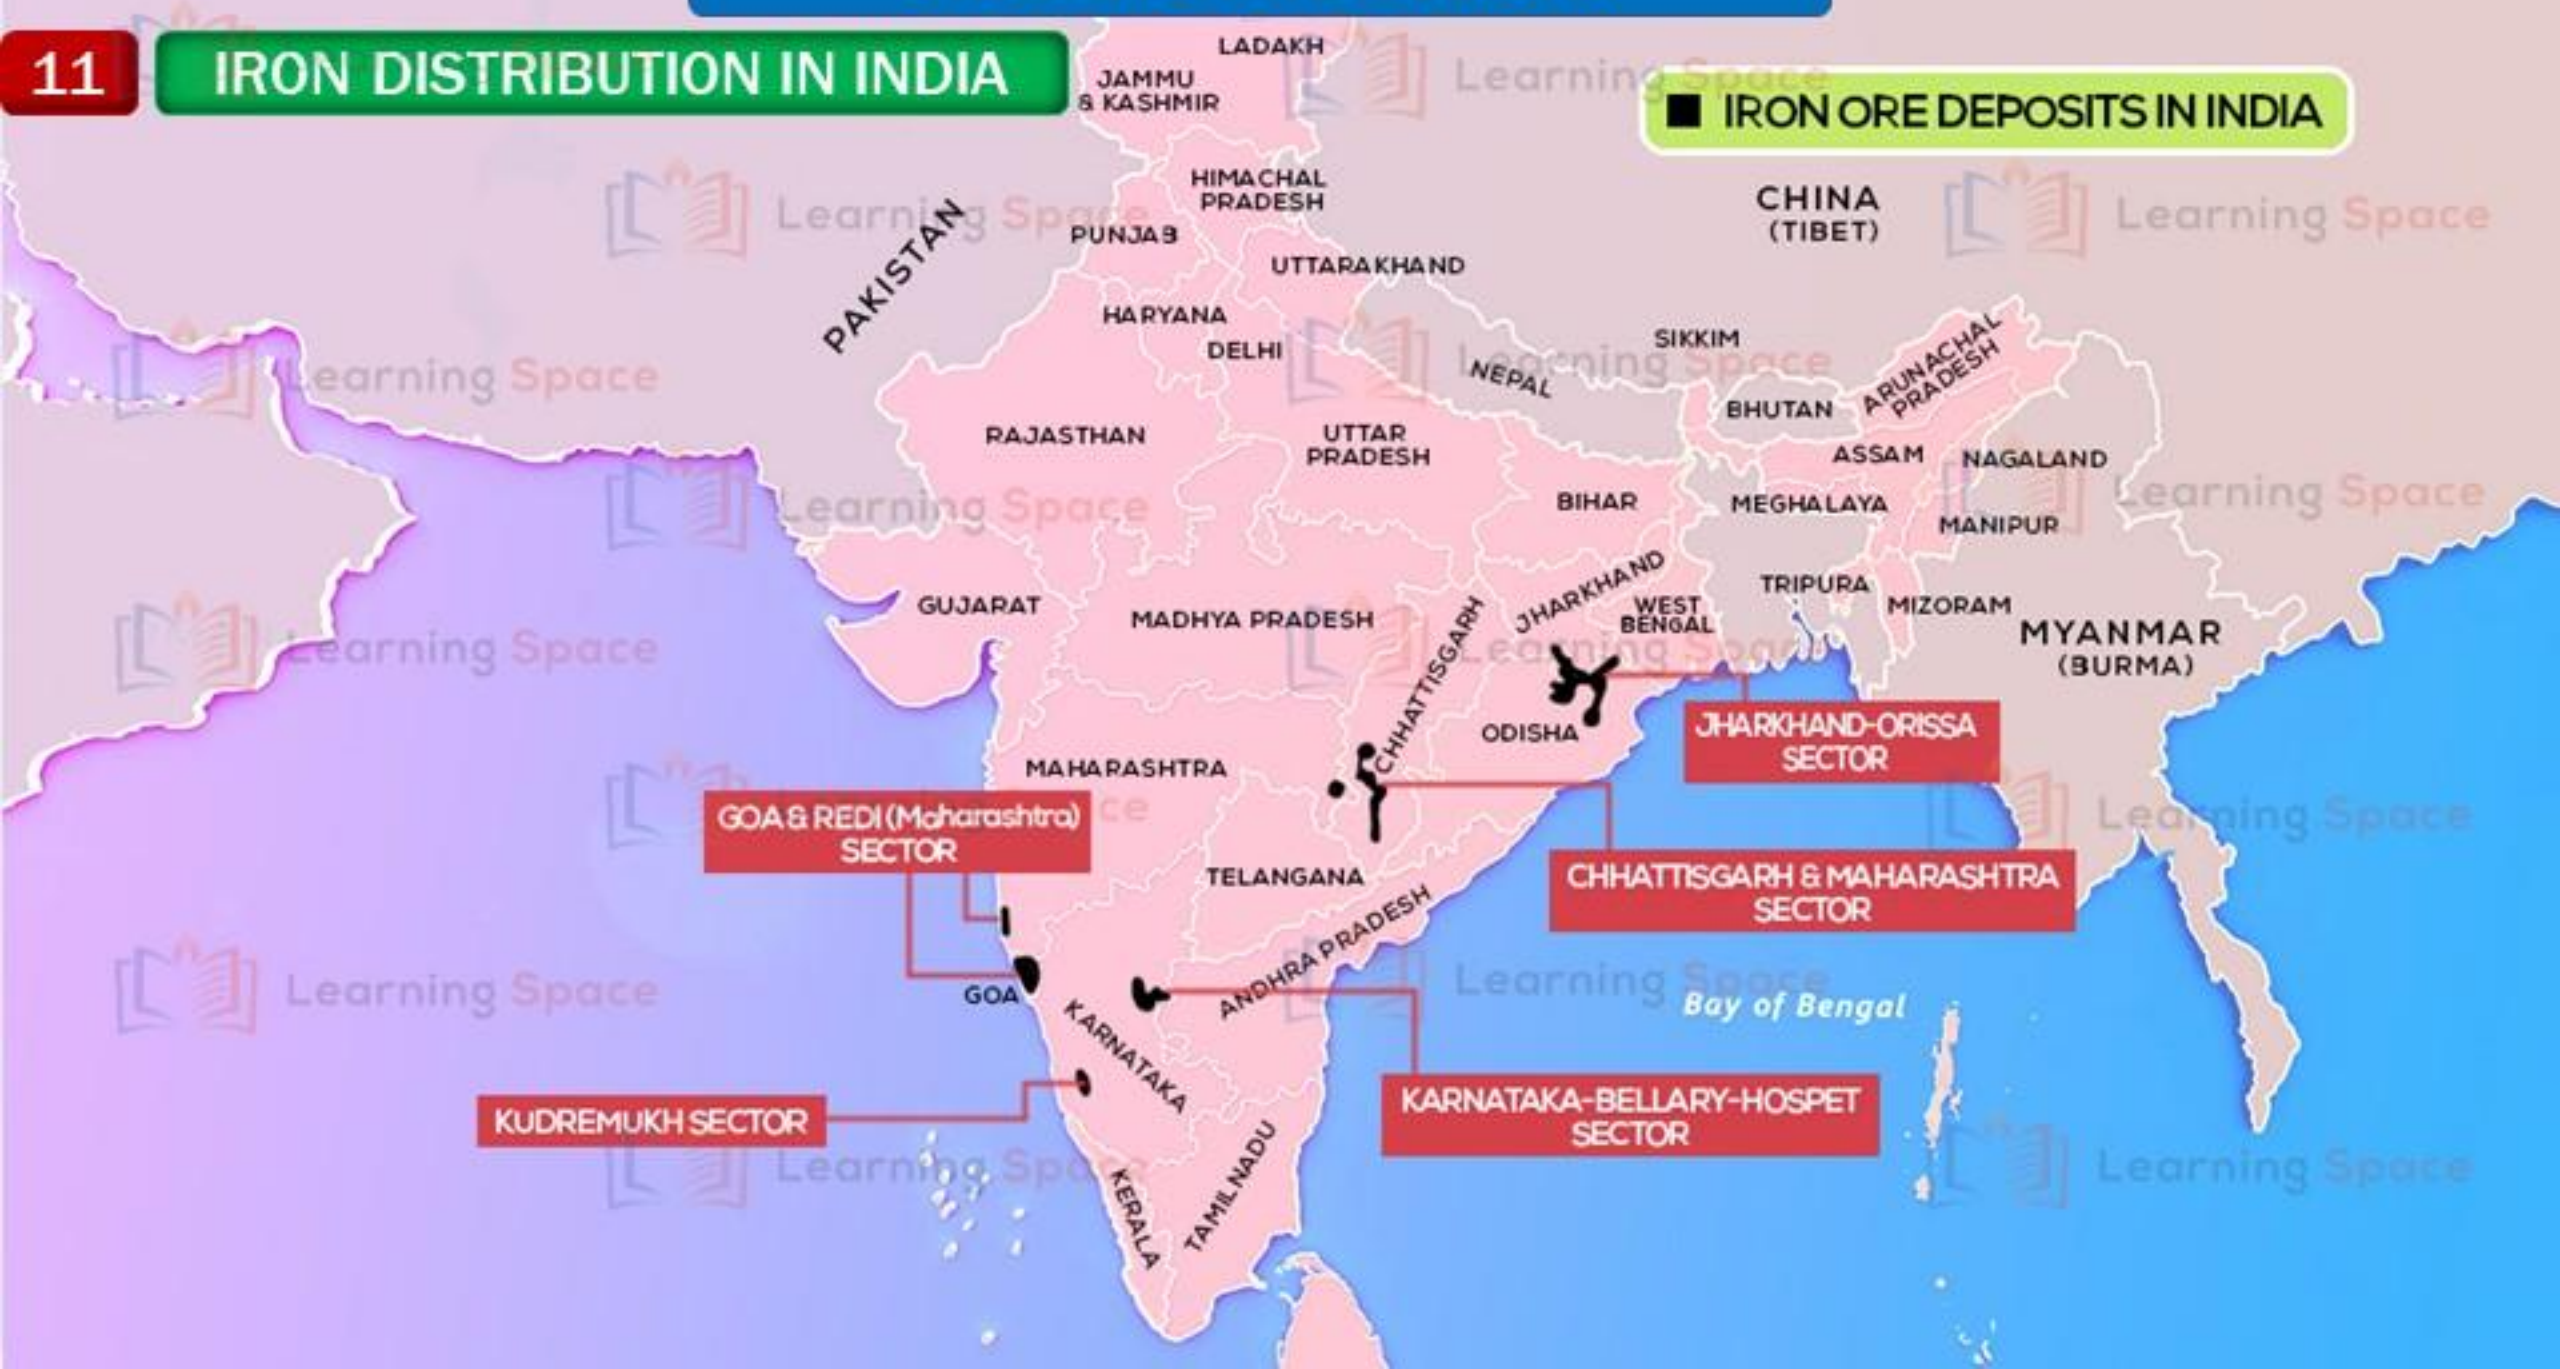

- Odisha is one of the most mineral-rich states in India and belongs to Chotanagpur mineral belt.
- Odisha has rich reserves of minerals like iron, coal, bauxite, manganese, nickel, chromite, limestone, dolomite, graphite, China clay, tin ore, etc.
- Keonjhar district is famous for huge iron-ore formations.
- Odisha accounts for over 55 per cent of India's bauxite reserves, making it an ideal location for setting up aluminium and aluminium-based companies.
- Odisha is the largest producer of Manganese, Chromite, Bauxite in India.

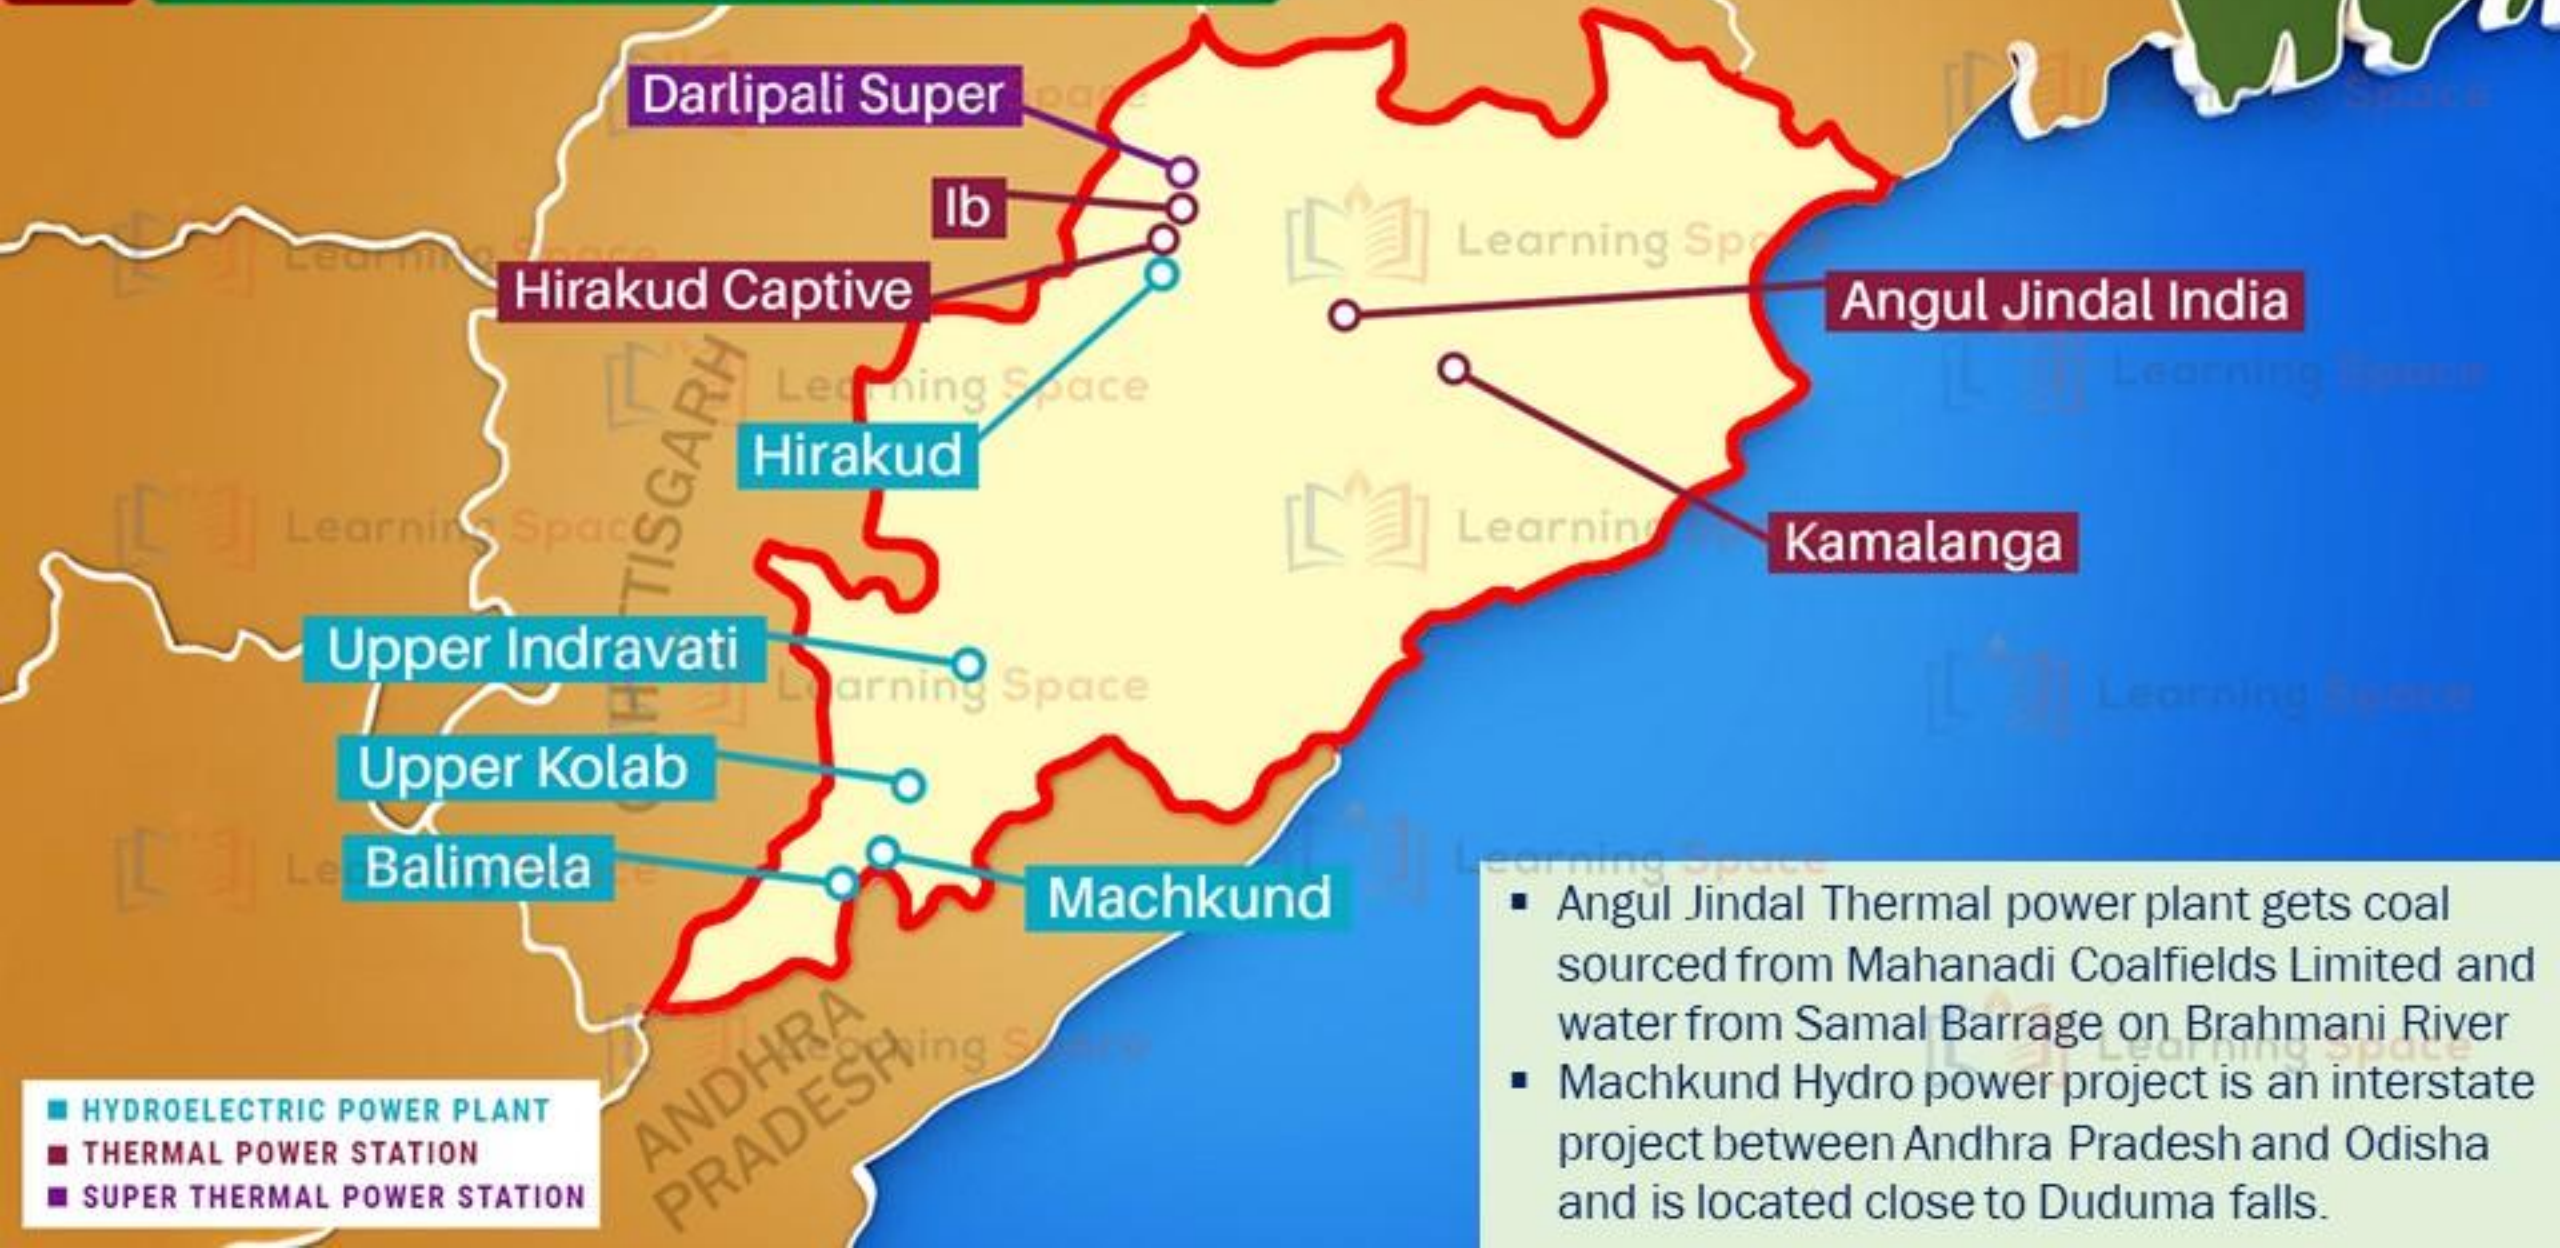

Major Coalfields
of India

■ IRON ORE DEPOSITS IN INDIA

CHHATTISGARH

Paradip Port

SEA PORTS

ANDHRA
PRADESH

- Natural deep-water port located in Jagatsinghpur district of Odisha.
- Situated at the confluence of Mahanadi in Bay of Bengal.
- Situated at a strategic midpoint between Kolkata and Visakhapatnam.
- Paradip port is administered by autonomous corporation of Paradip port trust wholly owned by GOI.

BHITARKANIKA NP

- Gahirmatha Beach and Marine Sanctuary lies to the East of Bhitarkanika NP and separates it from Bay of Bengal.
- Brahmani and Baitarani rivers flow through NP.
- Bhitarkanika NP is home to huge Saltwater crocodile population.

Similipal

Bhitarkanika

- Similipal is a National park, Biosphere reserve as well as Tiger reserve.

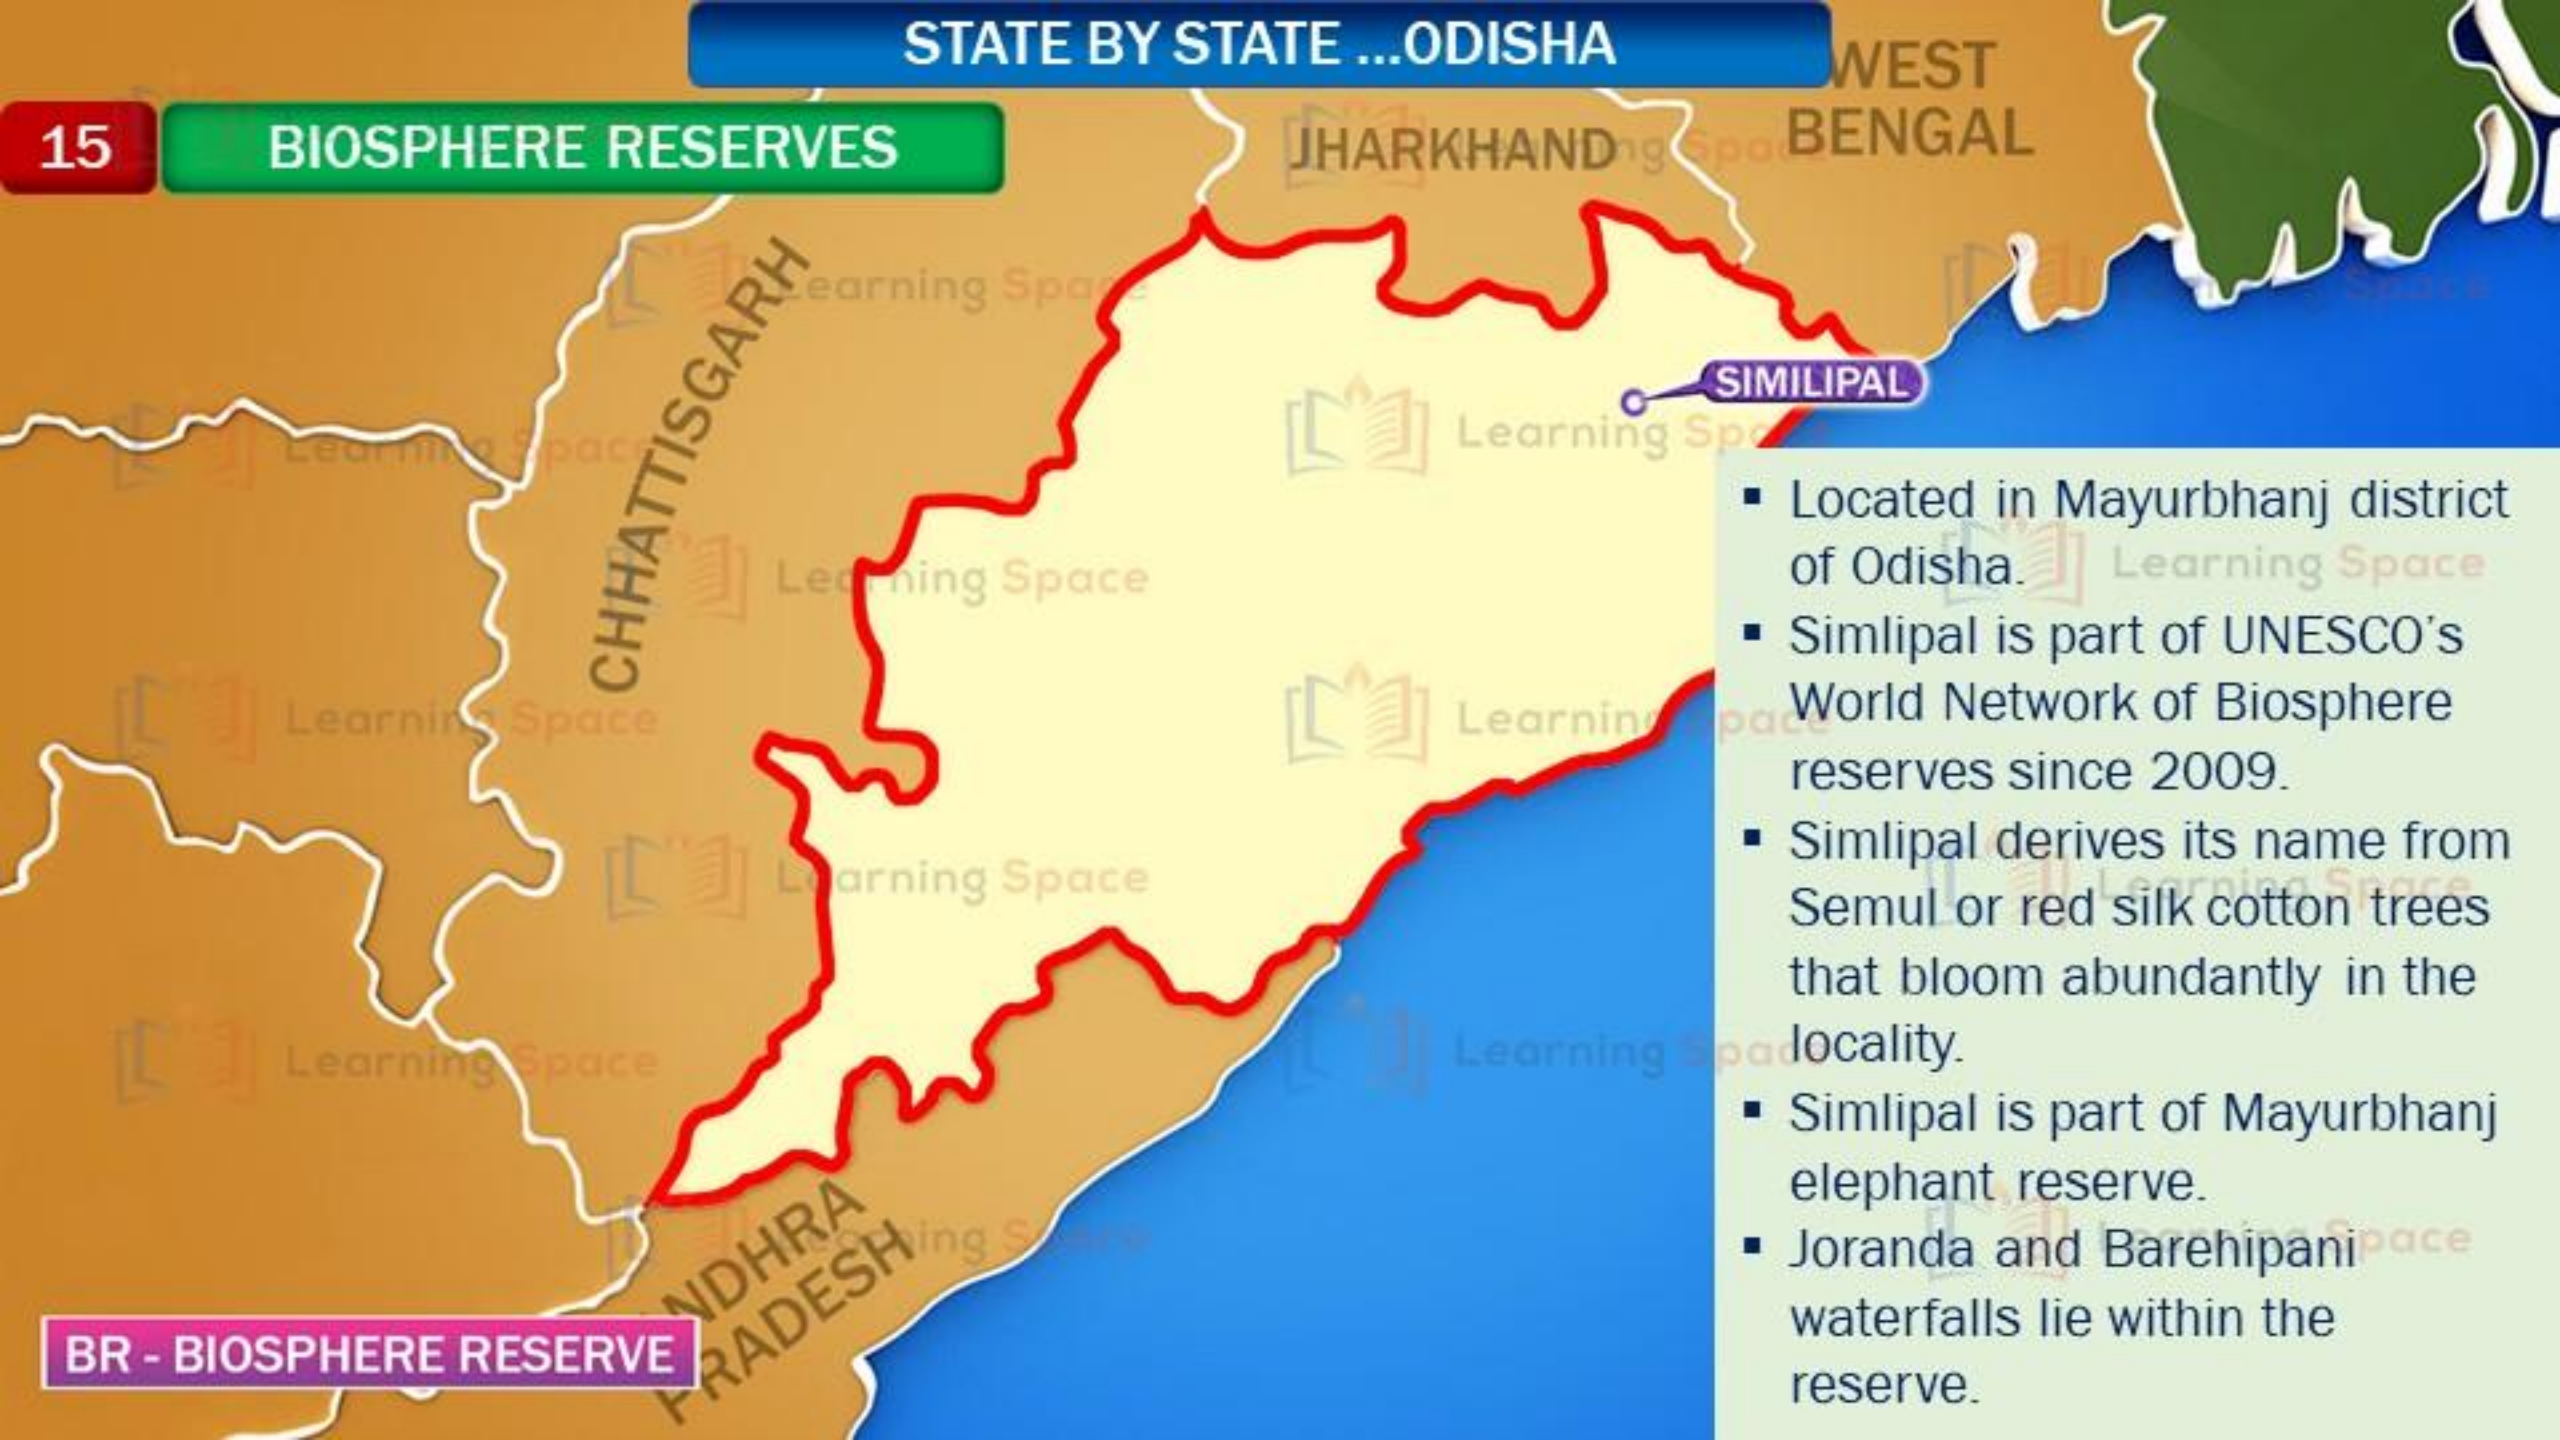

- Nandankanan is the only zoological park in India to become an institutional member of World Association of Zoos and Aquarium (WAZA) and is only place for conservation breeding of Indian pangolin in India.
- Nalbana WLS is located in core area of Chilika lake and is famous for migratory birds.
- Gahirmatha WLS is famous for Arribada of Olive Ridley Turtles.

- Bhitarkanika Mangroves were designated a Ramsar Wetland of International Importance in 2002.
- It is famous for Salt water crocodiles and Olive Ridley sea turtles.

- Chilika lake is a brackish water lake at the mouth of Daya river.
- Chilika Lake was the first Indian wetland to be designated international importance under the Ramsar Convention.
- Previously Chilika lake was placed in the Montreux record due to siltation but was later removed from it in 2002 after lake restoration.

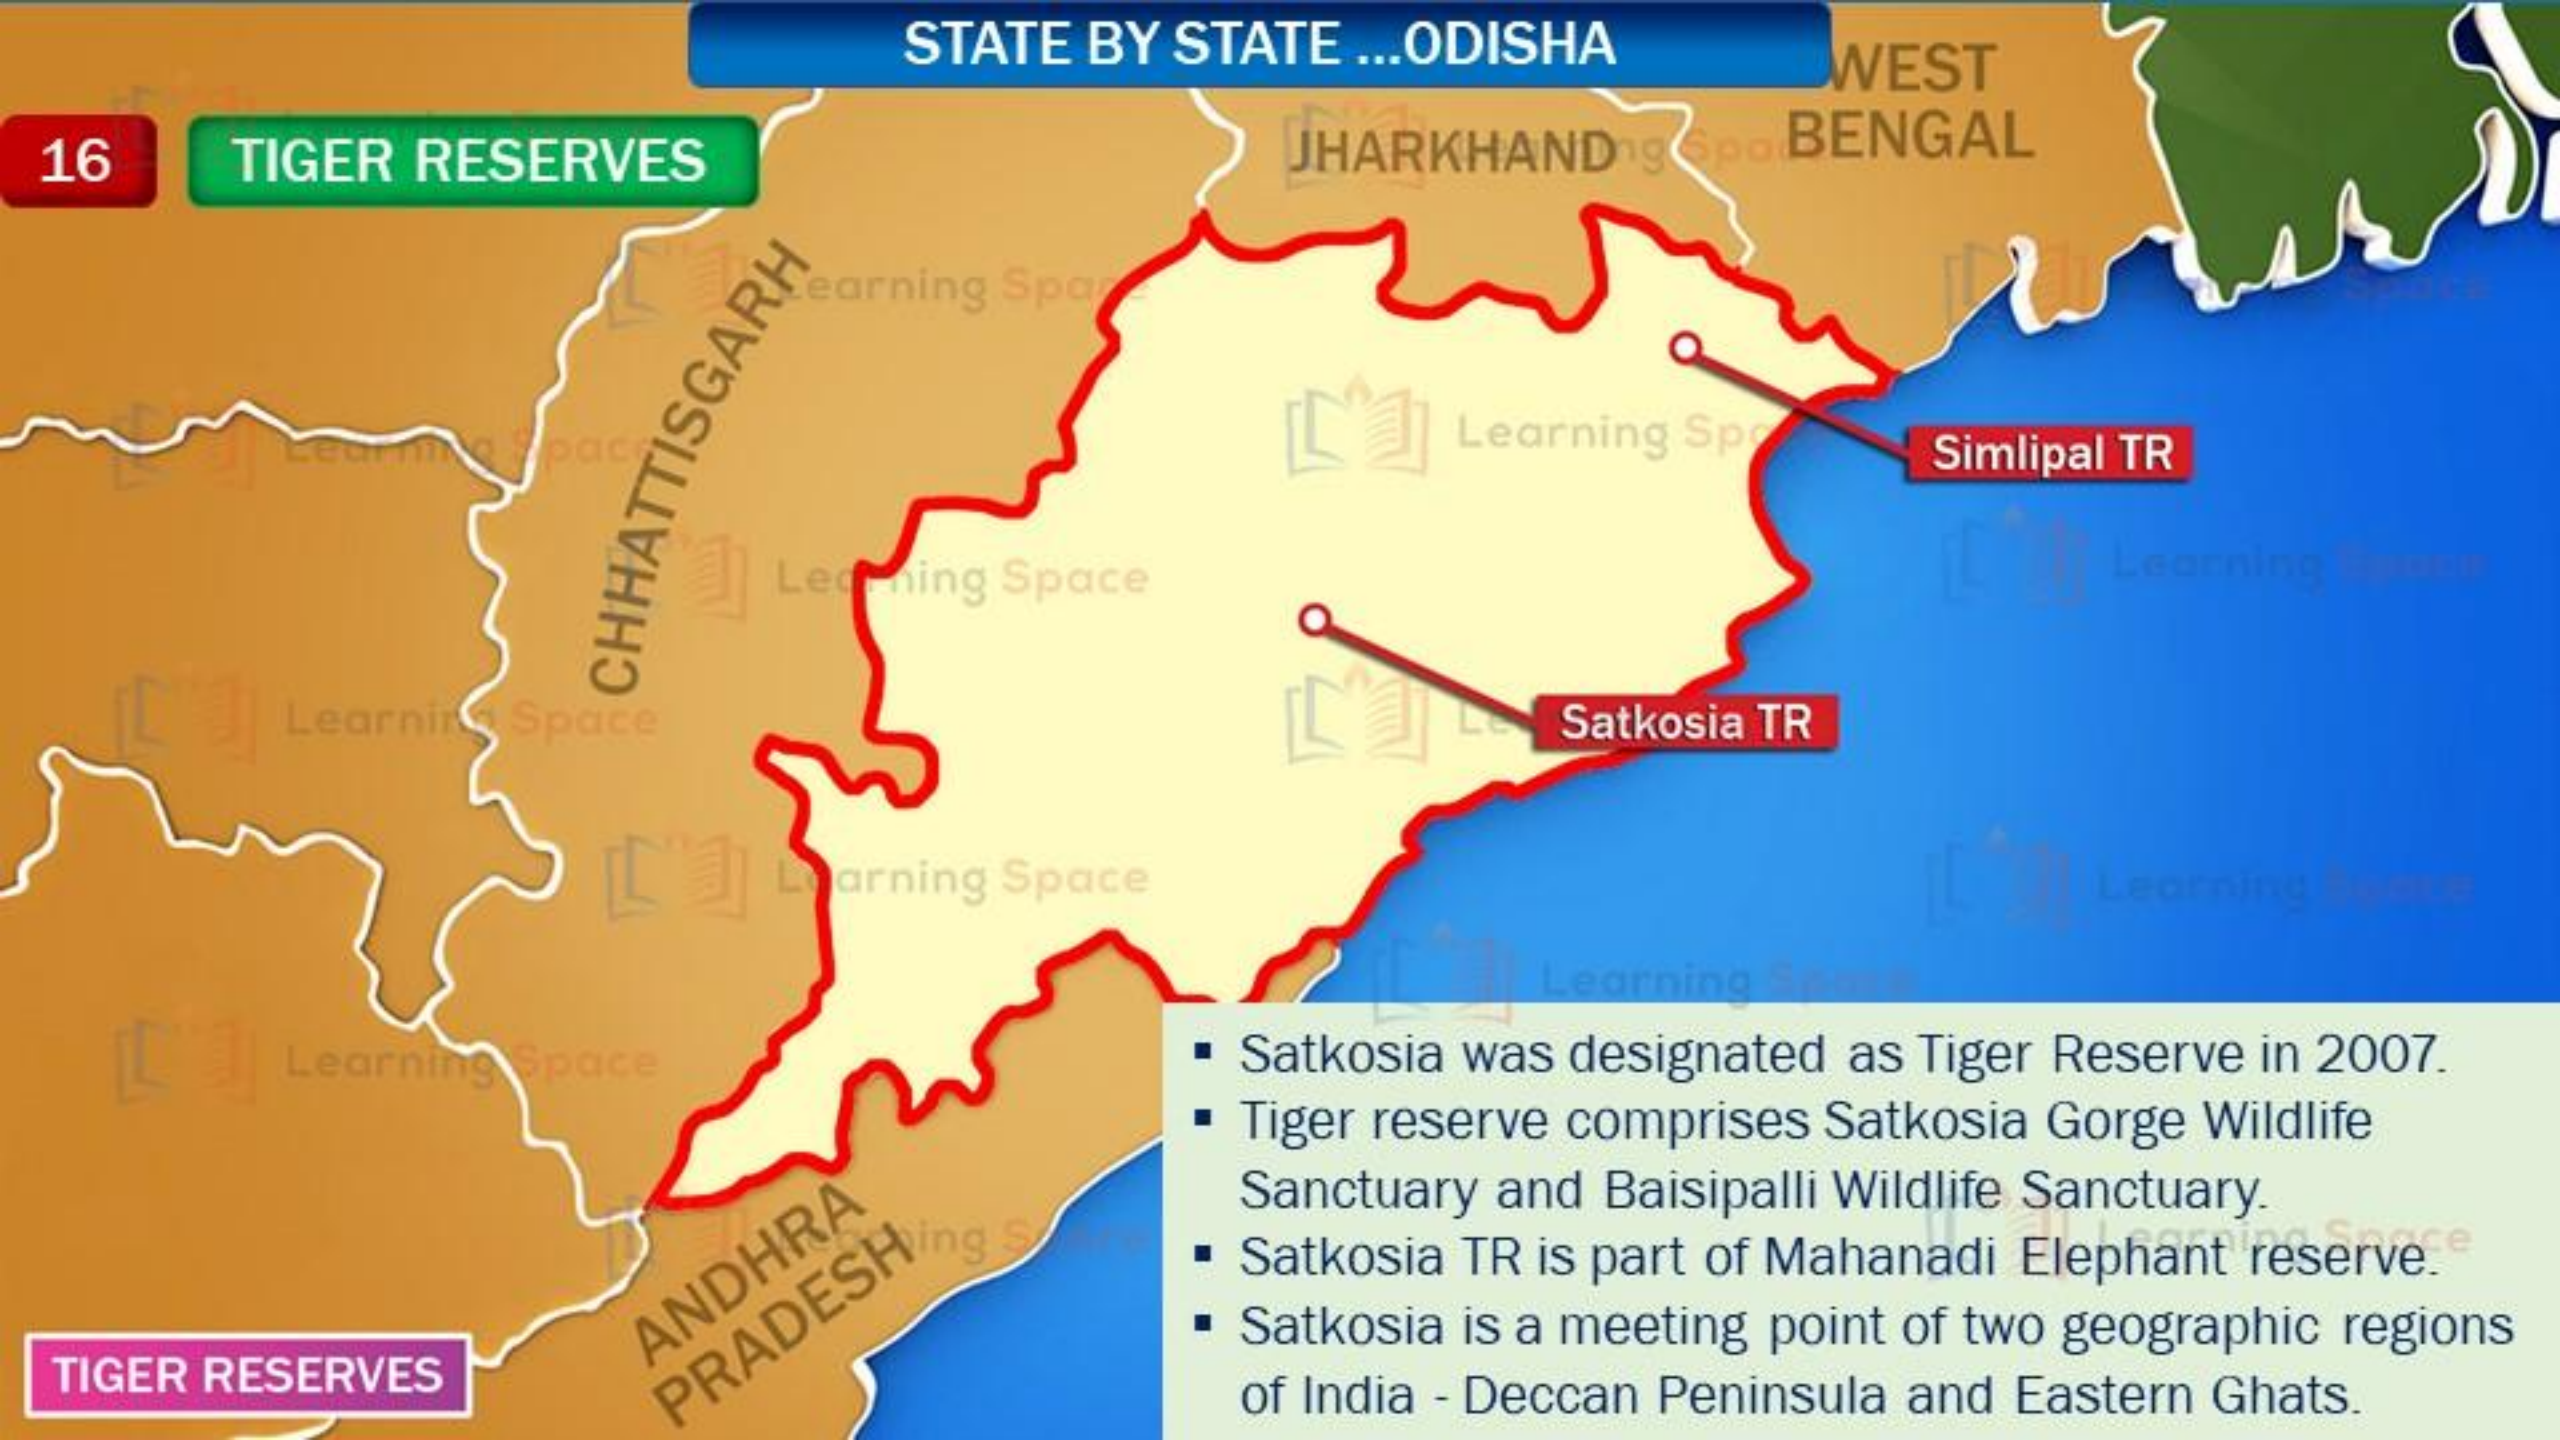

- Located in Mayurbhanj district of Odisha.
- Simlipal is part of UNESCO's World Network of Biosphere reserves since 2009.
- Simlipal derives its name from Semul or red silk cotton trees that bloom abundantly in the locality.
- Simlipal is part of Mayurbhanj elephant reserve.
- Joranda and Barehipani waterfalls lie within the reserve.

STATE BY STATE ...ODISHA

Konark Sun Temple

- Located in Puri.
- Belongs to 13th century A.D.
- Constructed by Narasimhadeva I of Eastern Ganga dynasty.
- Also known as Black Pagoda.
- Temple is designed in the shape of a chariot with two rows of 12 wheels on each side of the temple
- Seven horses in the front symbolize the seven days of the week.

- The Important sites in this tourism circuit are
 - ✓ Puri's Lord Jagannath Temple,
 - ✓ Konark's Sun temple and
 - ✓ Bhubaneswar's Lingaraj temple
- Rath Yatra of Lord Jagannath held in the month of Ashada in Puri is the most prominent festival of Odisha.

Bhubaneswar Temple

Konark Sun Temple

Jagannath Temple

Puri, Konark, Bhubaneswar form three vertices of "**Golden triangle**" of Odisha's tourism circuit.

SAURA PAINTINGS

- Ritualistic wall mural paintings by Saura tribe of Odisha
- Similar to Warli paintings
- Saura wall paintings are called Italons or ikons and are dedicated to Idital, the main deity of the Sauras.
- Painting is done mostly in white, and backdrop in red or yellow.

PATTACHITRA

- Patta means canvas/cloth and chitra means picture.
- Paintings show a mix of classical and folk elements
- Themes of these paintings are inspired from Jagannath, Vaishnava, Shakti and Shaiva cults.
- Raghurajpur in Odisha is famous for this art form.
- Pattachitra on palm leaf is known as Talapattachitra

RAVANCHHAYA

- Popular form of shadow puppetry in Odisha.
- Puppets are made of deer skin and depict bold, dramatic postures.
- Don't have any joints attached to them, making it a more complex art.
- Use of non-human puppets, such as trees and animals is a prominent feature.

 Learning Space

PAIKA

- Martial folk dance performed in the southern parts of Odisha.
- Word Paika signifies battle.
- Paika is a form of long spear.
- Dancers are armed with wooden spears and shields and show off their skills in infantry like formations.

 Learning Space

DASKATHIA

- Popular folk theatre of Odisha.
- Two narrators – Gayaka (chief singer) and Palia (co-narrator) are present.
- Narration is accompanied by a dramatic music composed using a wooden musical instrument called Kathia.
- Close variant of this form is Chhaiti Ghoda which uses two musical instruments Dhol and Mohuri and three narrators.

KUNDHEI NATA

- Form of String Puppetry.
- Kundhei Nata literally means Doll Dance.
- Also called Gopa Lila and exhibits love story of Lord Krishna and Radha.
- Puppets made up of light wood and are dressed in long flowy skirts and have many joints.
- Costumes of Kundhei resemble those worn by actors of the Jatra traditional theatre.

MANKIDIA

- Nomadic Tribal groups.
- Ethnic offshoot of Birhor tribe.
- Specialize in catching monkeys (called Mankada in Odia)
- Live in temporary settlements called Tandia or Tanda and headed by Dehury.

BONDA

- Also known as Bondo, Remo, Bondo Poraja.
- Belong to Munda ethnic group.
- Live in the isolated hill regions of the Malkangiri district of Odisha.
- Bondas are divided into two groups-Lower Bondas, Upper Bondas

JUANGS

- Belong to Austroasiatic ethnic group.
- Found mainly in the Gonsaika hills of Keonjhar district

OLIVE RIDLEY TURTLES

- **IUCN:** Vulnerable
- Smallest and most abundant of all sea turtles found in the world.
- Inhabit warm waters of the Pacific, Atlantic and Indian oceans.
- Rushikulya beach and Gahirmatha in Odisha is famous for mass nesting of Olive Ridleys known as Arribadas.

SAMBAR DEER

- **IUCN:** Vulnerable
- State animal of Odisha.
- Native to Indian subcontinent.
- Nocturnal in nature and mainly active at twilight or at night.
- At the time of danger, Sambar stamps its feet and make a unique ringing call known as "pooking" or "belling".

KANDHAMAL HALDI

- Indigenous to South Odisha.
- Popular for its healing properties.
- Gives strong aroma and has a high medicinal value.
- Has more oleoresin and volatile oil contents compared to other turmeric varieties.

PIPLI APPLIQUE WORK

- Originated from Pipli village
- Applique means 'to put on'.
- Applique umbrellas and canopies were prepared by the Gajapatis for the annual Rath Yatra of Jagannath

KALIA SCHEME

- KALIA stands for “Krushak Assistance for Livelihood and Income Augmentation”
- Income support scheme by Odisha Government for farmer’s welfare.
- Scheme is seen as a viable alternative to farm loan waivers.
- Under the scheme, around Rs.10,180 crores will be spent over three years.
- Even landless laborers, sharecroppers are eligible under the scheme.
