AN OVERVIEW OF THE AGRICULTURE AND
ALLIED SECTORS IN INDIA – PART IV

MODULE - 54

MAJOR CEREALS

PADDY – PROMINENT PRODUCING STATES

AVG. PRODUCTIVITY – KG/HA

India – 2,659
World – 4,679

WHEAT – PROMINENT PRODUCING STATES

AVG. PRODUCTIVITY – KG/HA

India – 3,507
World – 3,425

MAJOR COARSE CEREALS

MAIZE – PROMINENT PRODUCING STATES

AVG. PRODUCTIVITY – KG/HA

India – 3,070
World – 5,924

BAJRA – PROMINENT PRODUCING STATES

Rajasthan and Uttar Pradesh accounts for around 60% of the Bajra production. It is the largest millet produced in the country.

OVERALL COARSE CEREALS – PROMINENT PRODUCING STATES

AVG. PRODUCTIVITY – KG/HA

India – 1,954

MAJOR PULSES

CHANA (GRAM) – PROMINENT PRODUCING STATES

Chana

R

**AVG. PRODUCTIVITY –
KG/HA**

India - 956
World - 965

ARHAR – PROMINENT PRODUCING STATES

Arhar

K

**AVG. PRODUCTIVITY –
KG/HA**

India - 729
World - 852

URAD – PROMINENT PRODUCING STATES

Madhya Pradesh accounts for around one-third of the Urad production

MOONG – PROMINENT PRODUCING STATES

Rajasthan accounts for around half of the moong production

Madhya Pradesh accounts for around one-third of total pulses production

MAJOR OILSEEDS

SOYBEAN – PROMINENT PRODUCING STATES

GROUNDNUT – PROMINENT PRODUCING STATES

**AVG. PRODUCTIVITY –
KG/HA**

India – 1,192
World – 2,791

**AVG. PRODUCTIVITY –
KG/HA**

India – 1,422
World – 1,611

MAJOR OILSEEDS

RAPESEED / MUSTARD – PROMINENT PRODUCING STATES

AVG. PRODUCTIVITY – KG/HA

India – 1,200 – 1,500
World – More than 2,000

TOTAL OILSEEDS – PROMINENT PRODUCING STATES

SUGARCANE – PROMINENT PRODUCING STATES

**AVG. PRODUCTIVITY –
KG/HA**

India – 78,200
World – 73,000

COTTON – PROMINENT PRODUCING STATES

**AVG. PRODUCTIVITY –
KG/HA**

India – 520
World – 793

INDIA'S AGRICULTURAL EXPORTS AT \$ 50 BILLION IN 2021-22

INDIA'S AGRICULTURAL TRADE (IN \$ BN)

	Exports	Imports	Surplus
2012-13	41.73	18.98	22.75
2013-14	43.25	15.53	27.72
2014-15	39.08	21.15	17.93
2015-16	32.81	22.58	10.23
2016-17	33.70	25.64	8.05
2017-18	38.90	24.89	14.01
2018-19	39.20	20.92	18.28
2019-20	35.60	21.86	13.74
2020-21	41.90	21.65	20.24
2021-22	50.24	32.42	17.82

COMPOSITION OF MAJOR EXPORTS AND IMPORTS IN 2021-22

INDIA'S TOP AGRI-IMPORT ITEMS (IN \$ MN)

SOME OF INDIA'S TOP AGRI-EXPORT ITEMS (IN \$ MN)

	2021-22
Marine products	7772.36
Non-basmati rice	6133.63
Basmati rice	3537.49
Sugar	4602.65
Spices	3896.03

	2021-22
Vegetable oils	18991.62
Fresh fruits	2460.33
Pulses	2228.95
Spices	1299.38
Cashew	1255.46
Natural rubber	1032.71
Alcoholic beverages	693.23
Raw cotton	559.55

GLOBALLY, SOYBEAN , MAIZE ARE THE PROMINENT GENETICALLY MODIFIED CROPS

IN INDIA, AFTER THE INTRODUCTION OF Bt COTTON PRODUCTION INCREASED SUBSTANTIALLY!

SUCCESS OF BT COTTON

PER CAPITA AVAILABILITY OF MILK, MEAT AND EGGS ARE ON CONSISTENT INCREASE!

Figure 20: Per Capita Availability of Milk (gram per day), Meat (kg per year) and Eggs (number per annum)

Source: Based on data received from Department of Animal Husbandry & Dairying

MILK PRODUCTION IN INDIA HAS SEEN CONSISTENT INCREASE!

Figure 21: Trend of Milk Production in India (Million Tonnes)

Source: Based on data taken from the National Dairy Development Board and DAHD.

*Data is provisional

Dairy is the single largest agricultural commodity, contributing to around 5% of the national economy and employing more than eight crore farmers directly. India is ranked first in milk production contributing 23% of global milk production. It has grown at Compound Annual Growth Rate (CAGR) of about 6% during the past 6-7 years.

HUGE INTER-STATE VARIATIONS IN MILK PRODUCTION AND AVAILABILITY IS THE REAL CONCERN!

Figure 22: Inter-State Variability in Milk Production (in million tonnes) & Per Capita Availability of Milk (gram per day) during the Year (2020-21*).

Source: DAHD.

*Data is provisional

India is the largest producer of milk in the World.

PROMINENT REASONS FOR THE SUCCESS OF DAIRY SECTOR IN INDIA

- The co-operative model with organizational innovation helped achieving scale and reduced the logistics cost. It facilitated higher price realization for the dairy farmers.
- However, import tariffs on value added dairy products in our country are around 64% (approx.). It helps protect the domestic dairy industry.

There is no Minimum Support Price (MSP) for Milk. The price of Milk is largely determined by the overall forces of demand and supply.

AVERAGE YIELD OF INDIAN CATTLE

Exotic Cows (kg/day)	Crossbred Cows (kg/day)	Indigenous Cows (kg/day)	Non-Descript Cows (kg/day)	Indigenous Buffalo (kg/day)	Non-Descript Buffalo (kg/day)	Goat (kg/day)
11.67	7.85	3.85	2.50	6.34	4.35	0.45

MILK SECTOR ... MAIN STAY OF SMALL AND MARGINAL FARMERS!

- India is the **largest producer** of Milk in the World, with an estimated production of about **208 million tonnes** in 2020-21, and the closest competitor is **U.S.** @ around **100 million tonnes**.
- The dairy sector is **dominated** by **small farmers**, with an average herd size of **4-5 animals**.
- The overall growth in the dairy sector for the last **20 years** has been between **4-5% per annum**, and lately it has accelerated to even **6%**. In comparison, **cereals** have been growing at about **1.6% per annum**.

Chart 1.2: Species-Wise Milk Contribution in 2018-19

Production of cow milk has grown at a faster rate

(million tonnes)

COWS AND BUFFALOES CONTRIBUTE EQUALLY!

It is incidental to note that cow milk production is growing faster than buffalo milk production. Cow milk is growing at Compound Annual Growth Rate (CAGR) of 6%, whereas buffalo milk is growing at 4%.

CENTRE LAUNCHED GREEN-AG PROJECT

WHAT ARE THE FIVE STATES IDENTIFIED?

Mizoram, Rajasthan, Odisha, Madhya Pradesh and Uttarakhand.

- The Union Government launched the Green-Ag Project to reduce emissions from agriculture and ensure sustainable agricultural practices. It is funded by the Global Environment Facility.
- The Department of Agriculture, Cooperation, and Farmers' Welfare under the Ministry of Agriculture & Farmers' Welfare is the national executing agency.
- Other key players involved are Food and Agriculture Organization and the Union Ministry of Environment, Forest and Climate Change.

FIVE LANDSCAPES IDENTIFIED

- Madhya Pradesh ... Chambal Landscape
- Mizoram ... Dampa landscape
- Odisha Similipal landscape
- Rajasthan ,.... Desert National Park landscape
- Uttarakhand Corbett-Rajaji landscape

It will ensure 49 million tonnes carbon dioxide equivalent sequestered or reduced through sustainable land use and agricultural practices.

WHAT IS THE MAIN PURPOSE OF GREEN-AG PROJECT?

- The project seeks to mainstream biodiversity, climate change and sustainable land management objectives and practices into agriculture.
- This is to catalyse transformative change of India's agriculture to support national and global environmental benefits and conservation of critical biodiversity and forest landscapes.
- Without compromising India's ability to strengthen rural livelihoods, how to achieve global and environmental benefits - is the main theme.

TRICYCLAZOLE AND GLYPHOSATE ARE QUITE OFTEN IN THE NEWS!

TRICYCLAZOLE

- Tricyclazole is a fungicide used by the farmers. India has not banned it.
- A few years ago, European Union reduced the maximum Pesticide Residue Limit to 0.01 mg per kg from 0.03 mg per kg earlier. India objected as this is against the guidelines of CODEX Alimentarius, which is the global food standards body.
- Due to this, our basmati rice exports are facing headwinds.

GLYPHOSATE

- It is not banned in India. It is into the news in the context of illegal HT Bt Cotton. Some of the states like Kerala banned Glyphosate, but states can ban only up to a maximum of 60 days.
- When HT Bt cotton variety is cultivated, it withstands the spraying of Herbicide i.e., glyphosate. It kills only the weeds and does not affect the cotton crop.
- Hence the farmers save a few thousand rupees per acre by avoiding the manual de-weeding.
