

INTERNAL SECURITY

MODULE - 5

TERRORISM – ROLE OF EXTERNAL STATE AND NON-STATE ACTORS

MODERN DAY ONLINE TERRORISM – CYBER EXTREMISM

- Considerable shift in the modus operandi of the terror outfits in their way of recruitment, training etc.
- Potential youth were smuggled outside the country to undergo further indoctrination.
- However, now everything is online from radicalisation to recruitment to training which is far more dangerous.

TERRORISM – ROLE OF EXTERNAL STATE AND NON-STATE ACTORS

RADICALISATION

- It is a process by which an individual or group, being dissatisfied with the current scenario, adopts an increasingly extreme political, social or religious ideology to change things as per his/their beliefs, which could also involve violence.
- If unchecked, it can lead to extremist discourse in the society.

DE - RADICALISATION

It is a process by which an already radicalised person is brought back into mainstream society.

COUNTER RADICALISATION

It is the process by which vulnerable persons are prevented from getting radicalised.

TERRORISM – ROLE OF EXTERNAL STATE AND NON-STATE ACTORS

WAY FORWARD TO CHECK ONLINE TERROR

BIG DATA

- 1 An international consensus among nations and various IT related organisations to follow certain guidelines in regulating internet usage.

- 2 Strict laws should be enacted to create deterrence for being involved into any kind of radicalisation.

- 3 Empowered investigation and judicial process to punish those involved in such activities.

- 4 Technology like big data can be used to catch phrases related to radicalisation and delete any such content.

- 5 To avoid children falling prey to radicalisation verify the age of viewer before allowing to watch any adult video.

TERRORISM – ROLE OF EXTERNAL STATE AND NON-STATE ACTORS

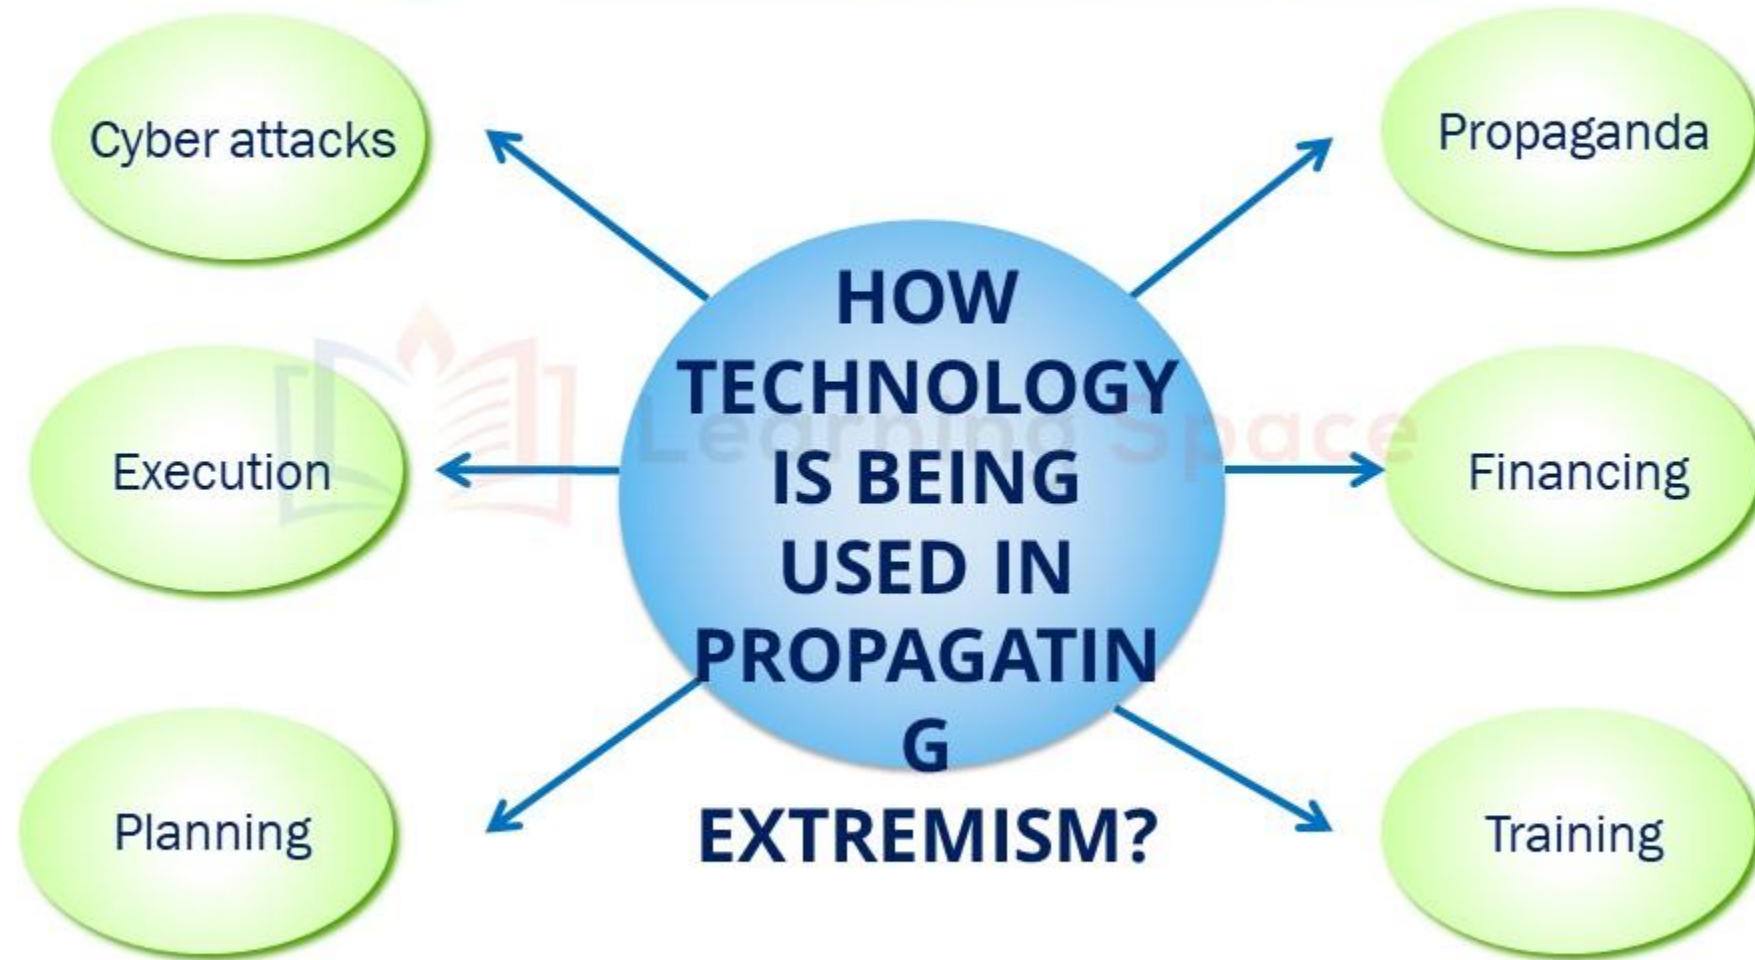

WAY FORWARD TO CHECK ONLINE TERROR

- 6 Strong online surveillance capability with a multi pronged strategy of involving NGOs, civil society etc.
- 7 Increase in intelligence sharing capabilities between agencies.
- 8 Parents, family should monitor the usage internet activities of their children.
- 9 Professional counsellors to counsel against radicalisation of youth
- 10 Training of police forces to develop counter terror capabilities with state of the art technologies.

TERRORISM – ROLE OF EXTERNAL STATE AND NON-STATE ACTORS

TECHNOLOGY AND EXTREMISM

TERRORISM – ROLE OF EXTERNAL STATE AND NON-STATE ACTORS

STRENGTHENING TECHNOLOGICAL FRAMEWORK TO COUNTER EXTREMISM

Recently, a document called "Christchurch Call to Action" was signed by 26 countries to combat online terrorism. It proposed following measures:

Christchurch Call to Action:

It outlines collective, voluntary commitments from governments and online service providers intended to address the issue of violent extremist content online and to prevent abuse of the internet, while maintaining international human right laws.

**CHRISTCHURCH
CALL**

TO ELIMINATE TERRORIST
& VIOLENT EXTREMIST
CONTENT ONLINE

Role of online service providers:

- ✓ Updating terms of use, code of conduct, community standards to prohibit violent content spreading among the people
- ✓ User Reporting of Terrorist and Violent Extremist Content
- ✓ Prevent the upload & dissemination of terrorist and violent extremist content, with a mechanism for automatic identification.
- ✓ Publishing on a regular basis transparency reports regarding detection and removal of terrorist content

TERRORISM – ROLE OF EXTERNAL STATE AND NON-STATE ACTORS

STRENGTHENING TECHNOLOGICAL FRAMEWORK TO COUNTER EXTREMISM

Recently, a document called "Christchurch Call to Action" was signed by 26 countries to combat online terrorism. It proposed following measures:

Role of Government and civil society:

- ✓ Shared Technology Development
- ✓ Collaborate with industry, governments, educational institutions, and NGOs to help educate the public about terrorist and extremist violent content online

Combating Hate & Bigotry:

- ✓ Support research and academic efforts to better understand and attack root causes of extremism and supporting capability and capacity of NGOs to promote pluralism.

TERRORISM – ROLE OF EXTERNAL STATE AND NON-STATE ACTORS

ATTEMPTS TO REVIVE KHALISTAN MOVEMENT

Khalistan movement is a Sikh separatist movement seeking to create a separate country called Khalistan in the Punjab region as a homeland for Sikhs.

1 The 1980s and early 90s witnessed very intense pro Khalistan movement backed by ISI.

2 This got further strengthened by the backing from the Sikh community in US, UK and Canada.

3 As a result, a fresh wave of Sikh radicalisation is seen in quite a few western nations.

4 Security agencies say the Khalistan Liberation Force, an extremist organisation active in the 1980s, was revived in 2009 in Malaysia under pressure from ISI.

5 KLF has been banned and brought in the First Schedule of UAPA in 2018.

6 The Sikh community led by US based "Sikh for Justice" also called for Referendum 2020.

TERRORISM – ROLE OF EXTERNAL STATE AND NON-STATE ACTORS

HINDUTVA-INSPIRED RIGHT WING TERRORISM

- It is also pertinent to remember the Hindutva inspired right-wing organisations that have been accused of involvement in terrorist attacks, including the Malegaon blasts, Mecca Masjid bombing (Hyderabad), Samjhauta Express bombings and the Ajmer Sharif dargah blast.
- This so called “right wing terrorism” is supposed to have developed as a **reaction to ISI sponsored terrorism and alleged Muslim appeasement** by the Government of India.

TERRORISM – ROLE OF EXTERNAL STATE AND NON-STATE ACTORS

Sophisticated means of communication helped terrorists to quickly promote their ideology and hate campaign

Intolerance in society due to increasing population and decreasing resources

Increasing globalisation of the society

Targets of terrorism are more widespread than ever before

More technology available to conduct acts of terror

International recognition and support to terrorist groups

Links between terrorism and organised crime to earn easy money

REASONS FOR SPREAD OF TERRORISM

FUNDING FOR TERRORISM

6 The financial network operates through Hawala transactions.

5 Earnings from drug trafficking and issuing of fake Indian currency notes (FICN)

4 Mobilization of funds through organised criminal activities, extortion etc.

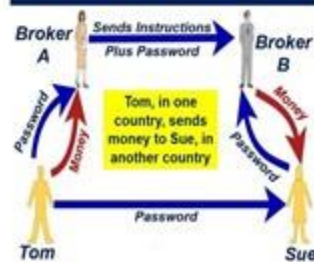

STATE SPONSORED TERRORISM

1 Money from drugs and contraband, donations and charities from Jihadi Islamic fundamentalists across the globe.

2 From Kashmiri diaspora and other NGOs which acts as a part of Pakistan's proxy war against India.

3 Indian Mujahideen gets state sponsorship in the form of financial support.

Hawala

FUNDING FOR TERRORISM

1 Most insurgencies of the North-East receive funding from extortion and taxation which is a local source.

2 This is supplemented by trafficking of drugs, weapons and counterfeit currency.

3 The insurgencies in this region have limited states sponsored funding and raising funds through private sources is the norm.

FUNDING FOR OTHER INSURGENT ACTIVITIES

6 The funds are used to smuggle weapons, explosives and technology based equipment like satellite radios.

5 Limited state sponsorship to Naxalism and they have also not profited substantially from globalised financial environment.

4 They also take a share from big infrastructure projects like roads, national highways, dams etc.

INSTITUTIONAL FRAMEWORK TO TACKLE TERRORISM

1. NATIONAL INVESTIGATION AGENCY

- 1 NIA is a federal agency to combat terrorism which was established soon after the 26/11 Mumbai attacks.

- 2 It has concurrent jurisdiction to probe terror attacks in any part of the country which includes challenges to the country's sovereignty and integrity, bomb blast, hijacking of aircraft and attacks on nuclear installations
- 3 It has various advantages over other investigation agencies such as the Central Bureau of Investigation (CBI), which has to seek the permission of a state government before investigating a case against a central government employee in that state.
- 4 Whereas, the NIA has powers to take suo motu cognisance of terrorist activity in any part of India and to register a case, to enter any state without needing permission from its government, and to investigate and arrest people.

INSTITUTIONAL FRAMEWORK TO TACKLE TERRORISM

2. NATGRID

- 1 It is an integrated intelligence grid that will link the databases of several ministries of the government.
- 2 It is a counter terrorism measure that will utilize technologies like Big Data, Data Analytics to study and analyse the huge amount of data generated from various intelligence agencies.
- 3 The combined data will be made available to agencies like Research and Analysis Wing, the Intelligence Bureau, Central Bureau of Investigation, Financial Intelligence Unit, etc.

INSTITUTIONAL FRAMEWORK TO TACKLE TERRORISM

WHY WAS IT IN NEWS?

The ambitious NATGRID project wants to link social media accounts to the huge database of records related to immigration entry and exit, banking and telephone details among others.

CRITICISM OF NATGRID

- Possible violation of privacy.
- State agencies and police forces are not given access to NATGRID
- NATGRID can be misused by terrorist forces.
- Will become weapons of waging psychological wars of ideologies.
- Possible leakage because of hacking.

WHY DO WE NEED NATGRID?

- Extraction of information in a crude conservative manner becomes difficult in this era of technological progress.
- It keeps a tab on persons with suspicious backgrounds.
- After every terrorist incident many innocents are rounded up. To avoid this, an organised information backup of suspected terrorist will avoid any human rights violations.

INSTITUTIONAL FRAMEWORK TO TACKLE TERRORISM

3. REVAMPING OF MULTI AGENCY CENTRE

- 1 MAC is a centre for counter terrorism whose mandate is to share terrorism related intelligence on a day to day basis.
- 2 MAC was created at Delhi and Subsidiary Multi Agency Centres (SMAC) were created in various states comprising of representative from various security agencies for streamlining intelligence reports.
- 3 MAC in the Intelligence Bureau shares intelligence with various agencies including the police, CAPFs, defence and financial intelligence agencies.
- 4 It also acts as a database in the form of National Memory Bank related to counter-terrorism intelligence.

4. OTHER INSTITUTIONAL FRAMEWORKS

- Following the Operation Blue Star in 1984 the National Security Guards (NSG) was created as a special commando force for combating terrorist activities. NSG personnel are also called as Black Cats.
- After 26/11 attacks, the Coastal Security Guards were revamped.
- The task of guarding the Indian coastline right from the shoreline has been entrusted to the Coast Guard. However, the responsibility of overall maritime security rests with the Indian Navy.
- National Technical Research Organisation (NTRO) was setup in 2004 under the National Security Advisor in the PMO's office.
