Hindsight says that there were several alternatives for investments in early 2000s.

It is easy to criticize with the benefit of **hindsight**.

Hindsight

The ability to understand an event or situation only after it has happened

ENGLISH WORD POWER WITH SIMPLE EXAMPLES!

99

Ubiquitous

The mobile phone, most **ubiquitous** of consumer electronic appliances, entered a new era with the invention of smart phone.

The **ubiquitous** spread of English affected several languages across the world.

**Ubiquitous***Seeming to be everywhere*

ENGLISH WORD POWER WITH SIMPLE EXAMPLES!

100 & 101

There is strange **morbidity** in his nature, where he takes grim pleasure through self-torture.

Morbidity

*Attitude/quality/
state of mind marked
by excessive gloom.*

Morbidity/Mortality

Parasitic protozoans and helminths represent two major groups of infectious agents that are responsible for considerable **morbidity** in human and animal populations.

Morbidity

*ill health/relative incidence
of a particular disease in a
specific locality.*

ENGLISH WORD POWER WITH SIMPLE EXAMPLES!

100 & 101

His father's death made him more aware of his own **mortality**.

Mortality

The thought process indicating that people do not live for ever

Morbidity/Mortality

Infant **mortality** is much higher in the poorest regions of the city.

Mortality

Number of deaths within a particular area over a specified period of time.

ENGLISH WORD POWER WITH SIMPLE EXAMPLES!

102

Haemorrhage

XXX died in the road
accident due to brain
haemorrhage.

Haemorrhage

*Large flow of blood from a damaged blood vessel/to lose
large amount of blood in short time.*

ENGLISH WORD POWER WITH SIMPLE EXAMPLES!

102

Haemorrhage

Several Public Sector Enterprises in India have been **haemorrhaging** precious public money for several years.

Haemorrhage

To lose large amount of something, such as money over a period of time and be unable to stop this happening

LICENCE RAJ DOT COM

Moves such as restrictions on laptop imports risk turning back the clock, undermine the promise of Digital India

IN THE PRE-1991 era, Indian governments routinely relied on repressive policies such as quotas and higher tariffs in order to curb imports. Infosys founder N R Narayana Murthy once famously recounted how he had to wait for three years and undertake several trips to Delhi to import a computer because of the strict licensing regime. The adverse consequences that such policies had on the economy have been well documented. Despite that, in a move that harks back to this socialist past, the government of India on Tuesday issued an order requiring licences to import laptops, tablets and other devices with immediate effect. This could open the door for imposition of similar licensing requirements in other sectors, increasing the space for bureaucratic discretion. Such controls on economic activities will only diminish the vibrancy of the economy that was unleashed after the '91 reforms.

The move is ostensibly aimed at promoting domestic manufacturing and curbing imports from China. In 2022-23, imports of personal computers, laptops etc stood at \$5.3 billion, with China accounting for an overwhelming share of these. However, as no warning or time has been given to equipment manufacturers (as per some reports, the government might delay its implementation by at least a month), this decision will lead to unnecessary disruption in the immediate term, create supply shortages and drive up prices of equipment. While it may force companies to manufacture in the country considering the huge market that India offers, there may be cost disadvantages. Moreover, it is one thing for the government to adopt policies that facilitate the creation of a computer manufacturing ecosystem in the country and quite another to use a sledgehammer approach to achieve its goals. In a country with a vibrant IT services sector, with a government that envisions Digital India, and one that has sought to encourage the start-up ecosystem, this is an uncalled-for decision.

Unfortunately, it is not a one-off. The policy establishment has in recent years drawn inspiration from the country's socialist past far too often. For instance, the government has recently banned the exports of rice and imposed stock holding limits on pulses. It had also brought spending by credit card under the liberalised remittance scheme — now in abeyance — which meant that transactions via cards outside India would attract a higher rate of TCS (tax collected at source). Such moves indicate that even as the rest of the country has travelled well beyond its socialist past, the establishment hasn't, at least not adequately. It still tends to cling to the old playbook. This tendency threatens to undo the economic gains that have accrued to the country from the dismantling of the licence permit raj in the decade of the '90s.
