MODULE - 11

Annihilate : *To destroy something completely so that nothing is left*

103

Example :
The Atom bomb attacks on
Hiroshima and Nagasaki in
Japan in 1945 **annihilated**
both these cities.

Annihilate : *To destroy completely leaving nothing.*

103

Example :
The recent tornado
annihilated everything in
its path.

Annihilate : *To defeat completely*

103

Example :
In the recent football match, Team-A, which was considered the favourite, was **annihilated**.

Intuitive : *Based on feelings rather than facts or proof/able to know or understand something because of feelings rather than facts or proof*

104

Example :
Doctors normally start the treatment by following **intuitive** approach, when patient complains about certain traits.

Intuitive : *Based on feelings rather than facts or proof/able to know or understand something because of feelings rather than facts or proof*

104

Example :
Judges never take **intuitive** approach while giving judgements.

Intuitive : *Based on feelings rather than facts or proof/able to know or understand something because of feelings rather than facts or proof*

104

Example :
Society judges right and wrong with **intuitive** sense.

Anecdotal : *The information is not based on facts or careful study*

105

Example :
Traditional medical practitioners primarily rely on **anecdotal** information rather than on conducted clinical trials and this is the bane of the traditional medical systems.

Proximate : Closest in time, place, relationship to something.

106

Example :
Our two houses are
proximate.

Proximate : Closest in time, place, relationship to something.

106

Example :

The problem with climate change is that it seems less **proximate** than terrorism.

Proximate : Closest in degree or order, especially in a chain of causes and effects.

106

Example :
The interest of the company is in **proximate** things rather than ultimate goals.

Proximate Cause : Something that is considered to be the direct cause of damage, loss, or injury

107

Example :
The **proximate cause** of the forest fire was lightning.

Proximate Cause : Something that is considered to be the direct cause of damage, loss, or injury.

107

Example :

The **proximate cause** for recession in several advanced countries was structurally flawed mechanism of easy money policies.

Robust : *Strong and healthy/unlikely to break or fail*

108

ভারতীয় স্টেট ব্যাঙ্ক
भारतीय स्टेट बैंक
State Bank Of India

जीवन दीप शाखा
जीवन दीप शाखा
JEEVAN DEEP BRANCH

Example :

At present, Indian Public Sector Banks look **robust**.

Robust : *Strong and healthy/unlikely to break or fail*

108

Example :

He is 80 and looks **robust** and healthy enough to take part in the half-marathon.

Robust : *Full of flavour/strong and healthy*

108

A photograph of a cup of coffee on a saucer. The cup is white with a blue floral pattern and a gold rim. It is filled with a frothy, light brown beverage. The saucer is white with a blue floral pattern and a gold rim. To the left of the cup is a gold wrapper with the word "Gavottes" written on it. To the right of the cup is a gold spoon resting on a white napkin. The entire set is on a dark wooden table.

Example :
The Darjeeling tea is particularly **robust**.

Robust : *Full of flavour/strong and healthy*

108

Example :
Indian traditional bulls have
robust health.

Fragile : Which can be easily damaged or broken

109

Example :
We should take utmost care of **fragile** objects, when the luggage is shifted from one place to another.

Fragile : *Easily destroyed or ended or made to fail.*

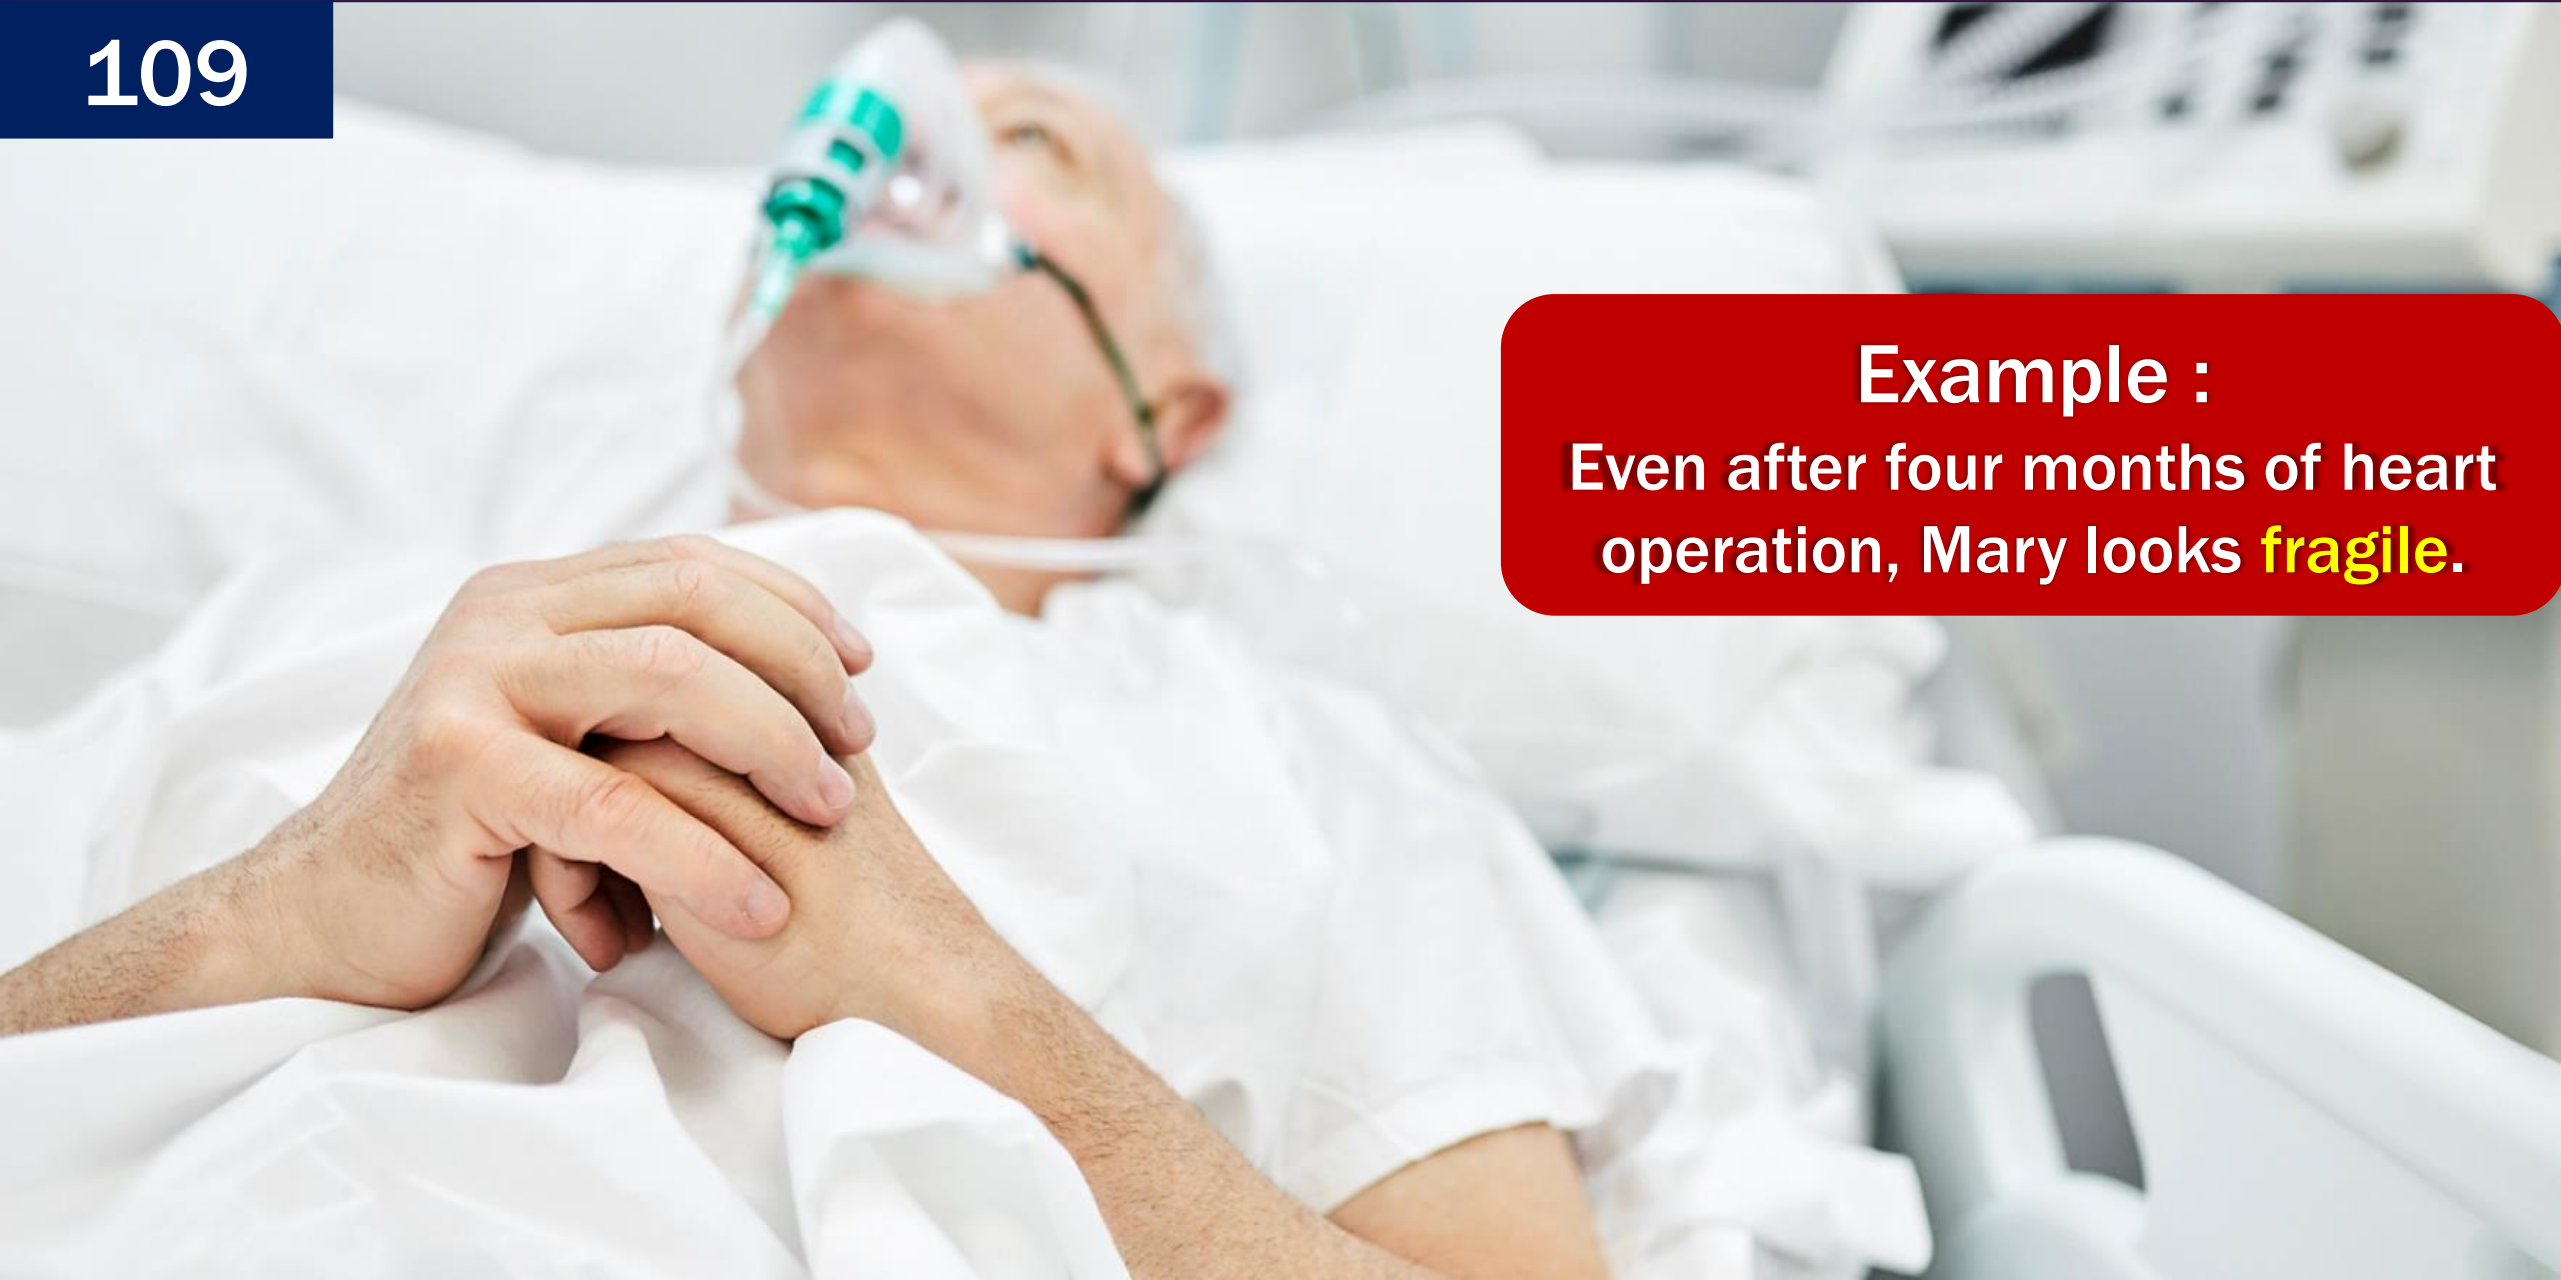

109

Example :
When there are competing ethnic groups, the peace will be **fragile**.

Fragile : *Weak or poor/in poor health physically or mentally*

109

Example :
Even after four months of heart operation, Mary looks **fragile**.

Bulwark : *Something that protects from dangerous or unpleasant situations*

110

Example :

In the recent massive layoffs in the ed-tech sector, Rakesh also lost the Job, but his earlier savings acted as a **bulwark.**

Bulwark : Solid wall like structure constructed for defence

110

Example :
Breakwaters will act as a **bulwark** in the harbour against sea waves.

Bulwark : *Strong support or protection*

110

Example :
Democratic principles stand as a **bulwark** against the tyranny of the state and the tyranny of the majority.

Impossible : *It cannot happen or it cannot be achieved*

111

संघ लोक सेवा आयोग
UNION PUBLIC SERVICE COMMISSION

Example :

As Ramesh exhausted all six attempts of UPSC Civil Services examination, it is **impossible** to become an IAS officer.

DELHI POLICE

DELHI POLICE

Impossible : *An impossible person behaves very badly or is extremely difficult to deal with*

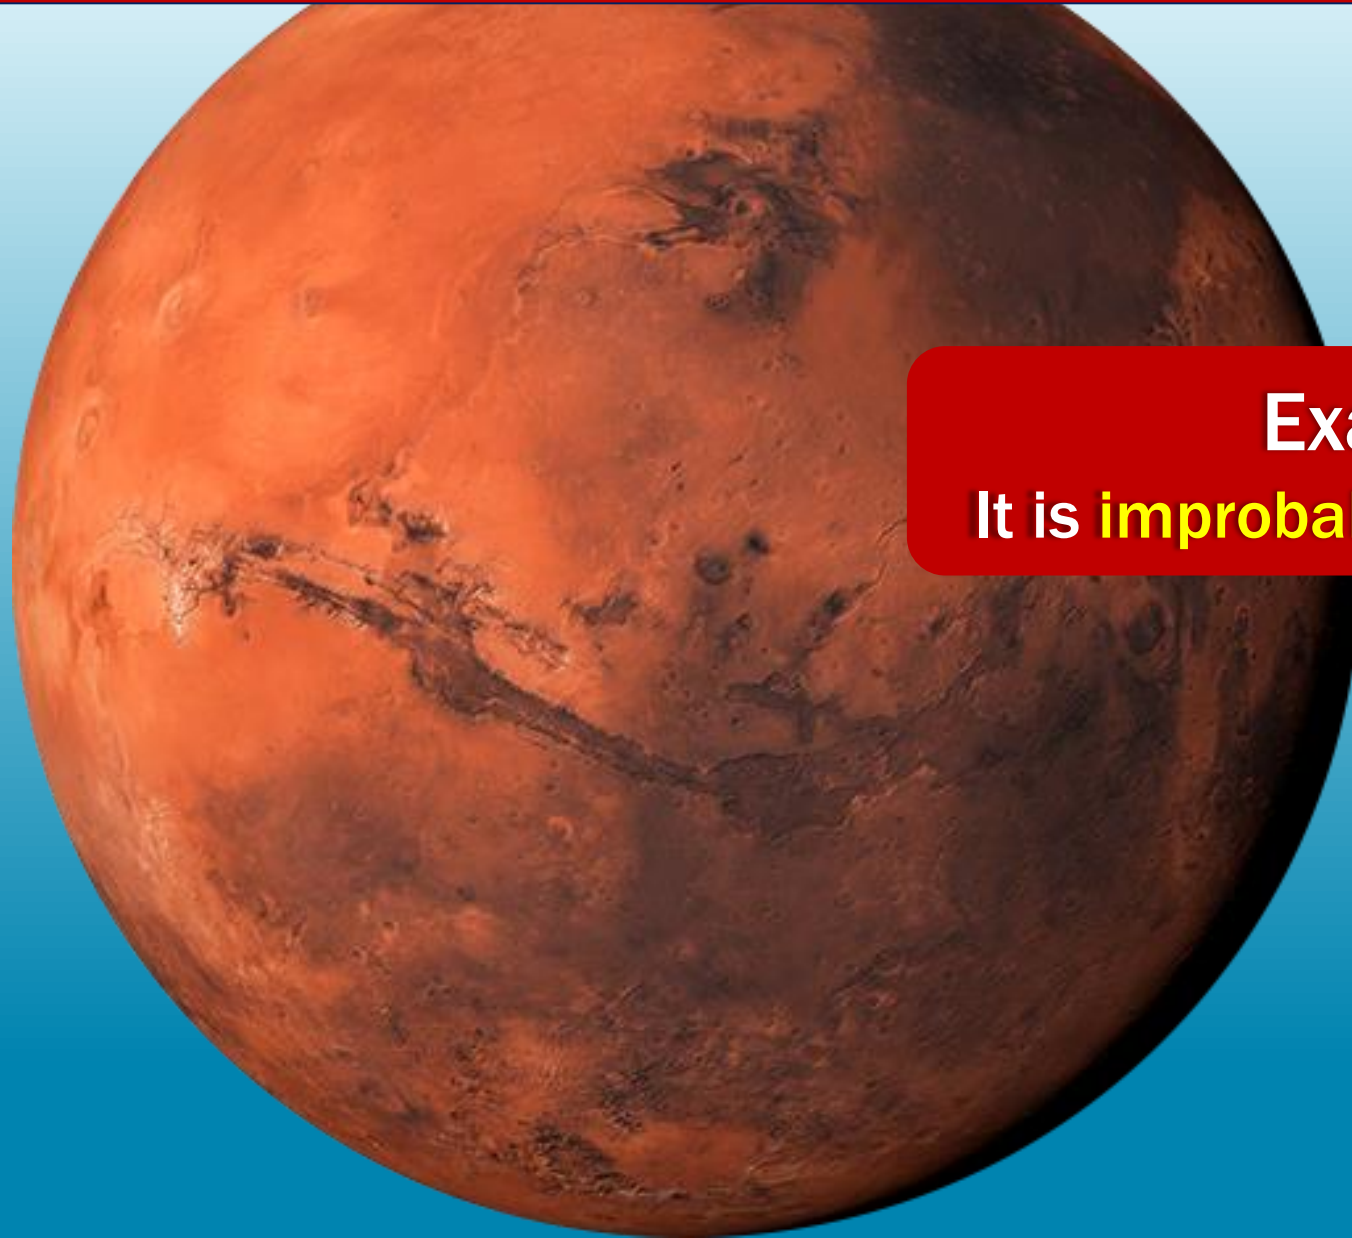

111

Example :
Rakesh left the Job because his boss was **impossible**.

Improbable : *Not likely to happen or be true/not probable*

112

Example :
It is **improbable** to live on Mars.

Improbable : *Not likely to happen or be true/not probable*

112

Example :

She achieved the **improbable** feat of life span spread across three centuries having been born in 1899 and dying in 2001.

Impregnable : *It is so strongly built/defended that it cannot be entered by force*

113

Example :
The Prime Minister's security is **impregnable**.

Impregnable : *It is so strongly built/defended that it cannot be entered by force*

113

Example :
In the Medieval period of India,
several **impregnable** forts were
built.

CHECKING NIPAH

Kerala appears to be reining in the virus. It's time strategies are developed to prevent it from resurfacing

THE NIPAH VIRUS has surfaced in Kerala for the fourth time in the past five years. Two people in Kozhikode district have succumbed after being infected by the pathogen. The district authorities have shut down educational institutions and cordoned off seven villages as containment zones. Neighbouring states have been put on alert. Kerala had used these measures with a fair degree of success during the past Nipah outbreaks. Even then, it needs to be vigilant against the virus, which, though not as infectious as influenza or Covid, can turn lethal very fast. In severe cases, patients develop respiratory distress and brain fever and the case fatality rate can be as high as 75 per cent. There is no vaccine against the pathogen and treatment, even in hospital settings, is limited to targeting the symptoms.

The Nipah virus was first identified during an epidemic that affected pig farmers in Malaysia and Singapore in 1999. Two years later, the pathogen claimed more than 40 lives in West Bengal. ICMR surveys have shown that the virus has a natural reservoir in fruit bats. One plausible theory is that it spreads after contact with secretions containing the virus on trees, fruits, date palm sap, juice or toddy. The infection can spread from human to human through close contact at home or in hospitals. Though the risk of super spreader events is currently low, experts caution against complacency. Each outbreak creates possibilities of the virus mutating and brings with it the risks of the emergence of a strain that transmits more efficiently. That's why the WHO has classified Nipah as a virus of concern.

Efforts are on to develop antidotes to the disease in several parts of the world, including India. The WHO also suggests that countries with Nipah hotspots develop strategies to anticipate, monitor and control outbreaks. It is important, for instance, to understand what is happening in the virus's animal reservoir before it spills over to humans. Experts believe that checking zoonotic diseases, Nipah for example, will require cross-disciplinary collaborations between professionals in human, animal and environmental health. To understand Nipah, it is important to identify patterns of the virus's circulation in fruit bats and document the spillover events between species. Studies show that though most fruit bats carry Nipah, only a minuscule number of them release the pathogen into the environment. But we do not know why and when they do so. There is much to be done in understanding the virus. The world's experience with Covid should be a warning that the task shouldn't be postponed for long.
