MODULE - 24

Stricture : *Statement of severe criticism / disapproval.*

230

Example :

The **strictures** of Comptroller and Auditor General (CAG) of India, normally, do not have any impact on the Governments.

Stricture : *A severe moral or physical limit.*

230

Example :
Gender stereotypes lead to **strictures** on women's rights and education.

Breach : *An act of breaking a law, promise, agreement or relationship.*

231

**TATA
CONSULTANCY
SERVICES**

Example :
Rakesh was fired for **breach** of
conduct rules.

Breach : *An act of breaking a law, promise, agreement or relationship.*

231

Example :
The security **breaches** in Prime Minister's convoy are quite serious.

Fraternity : *Feeling of friendship and support.*

232

Example :

In the present-day era of fractured geopolitical environment, **fraternity** among the nations is missing.

Fraternity : *A group of people, who have the same job or interest.*

232

Example :

Doctors' **fraternity** is up in arms against the directive to prescribe the generic names of medicines.

Perpetuate : To cause something to continue

233

Example :

Easy availability of guns is **perpetuating** gun violence in United States of America.

Lax : *Without much care, attention or control.*

234

**Directorate General
of Civil Aviation**

Example :

There is a general feeling that the Directorate General of Civil Aviation (DGCA) is quite **lax** in investigating unsatisfactory incidents pertaining to the airlines.

Lax : *Not strong enough*

234

An aerial photograph of a tropical coastline. The ocean is a deep blue, with white waves breaking onto a sandy beach. The beach is a light tan color, and the water near the shore is a lighter, turquoise blue. A green, hilly coastline is visible on the right side of the image.

Example :
Along the coastline of India, the security is quite **lax**.

Aver : To say that something is certainly true.

235

Example :
The lawyer **avered** that his client was innocent.

Predicament : *An unpleasant / confusing situation that is difficult to get out of or solved.*

236

Example :
Educated poor without jobs are
in a real **predicament**.

Predicament : *An unpleasant / confusing situation that is difficult to get out of or solved.*

236

Example :

Radha is in a bit of **predicament** as the timing of the marriages of her two best friends coincides.

Virtue : *A good moral quality in a person or the general quality of being morally good.*

237

Example :
Patience and consistent
behaviour are good **virtues**.

Virtue : *An advantage or benefit.*

237

to grab a takeout coffee' drinkers easy targets for petty theft.

If you are heading out to exercise (or to pretend to exercise) please remember the following.

1. **ID.** Carry some form of identification on your person.
2. **Tell Someone.** Let someone know when and where you are going. If possible connect via an app like STRAVA so they can track you.
3. **Rerouting.** It may drive Google Maps crazy but don't listen to her. Vary your route as much as possible.
4. **Visibility is important.** We're all hiding behind masks and buffs now... but we still need to be seen. So wear reflective sports gear.
5. **Tracking.** If you take your phone with you (sometimes not advisable, but if you do...) download the Marshall Panic App. It will send your precise GPS location to our control room if you hit the button, so we can come and find you. (t's and c's apply)

Stay safe out there, and call us In Case Of Anything. We've got your back.

Example :
Caution is a useful virtue.

IN CASE OF ANYTHING
086 162 7732

Bipartisan : *Cooperation between two political parties that usually oppose each other's policies.*

238

Example :

On the issue of supporting Israel with military aid, there is **bipartisan** support in the United States of America Congress.

Bipartisan : *Cooperation between two political parties that usually oppose each other's policies.*

238

Example :

As far as diplomatic relations with its immediate neighbourhood is concerned, India failed to get **bipartisan** support from several countries.

Bipartisan : *Cooperation between two political parties that usually oppose each other's policies.*

238

Example :

Bill related to increase in the salaries of the Members of the Parliament normally gets **bipartisan** backing in Parliament.

Exceptional : *Outstanding / unusually good*

239

Example :

Anita showed **exceptional** talent as a Kuchipudi dancer.

Exceptional : *Outstanding / unusually good*

239

Example :

In countries like Japan and Germany, the deadlines for projects are sacrosanct and will be extended only in the **exceptional** circumstances.

HYOGO PREFECTURE

NORTH
PACIFIC

Exceptionalism : *The belief that something, especially a country or its system of Government, is unusually good or successful.*

240

Example :

There is a popular belief in American **exceptionalism**.

UN report on groundwater extraction drives home the need for demand side management, responsible use of aquifers

A REPORT PUBLISHED, last week, by United Nations University has warned that 27 of the 31 aquifers in the country are depleting faster than they can be replenished. The alarm bells have been ringing for at least a decade. In 2016, the Mihir Shah Committee argued that there is little “understanding of river systems or their interconnections with the health of catchment areas or groundwater”. Several other reports, including those commissioned by the Niti Aayog and the Central Water Commission, have underlined the poor state of the country’s aquifers. Conversations in the wake of these studies pushed the Union Jal Shakti Ministry to initiate the Atal Bhujal Yojana in 78 water-stressed districts. The programme, which commenced in 2020, aims to bring about behavioural changes at the community level in seven states. It’s a welcome initiative and Ministry data does show that groundwater extraction for irrigation, domestic and industrial uses came down by about 6 billion cubic metres in 2022 from 2020. However, the gravity of the crisis is such that much more is required from the Centre and the states.

India pumps up the most groundwater globally — more than China and the US combined. According to the Central Ground Water Board, about 70 per cent of the water used in the country is from groundwater sources. The emphasis on the use of tubewells and borewells played an important role in ensuring food security. But as the Shah Committee pointed out, there has been little emphasis on institutional innovations in the water sector. The link between power subsidies and the falling water table in states such as Punjab has been long apparent. Yet, addressing demand-side management remains a complex problem. The UN report shows that 78 per cent of the wells in the state are overexploited.

In recent years, researchers have joined the dots between groundwater extraction and the climate crisis. The problem could become acute in the country’s southwest, where aquifers of hard rock already impose limits on recharging. Hotter temperatures could leave less moisture to soak in the soil and replenish groundwater sources. In recent years, the Centre has been trying to promote less thirsty crops like millets and the use of efficient watering techniques. But because borewells and tubewells are covered structures, people don’t realise the gravity of the crisis till it’s too late. The use of technologies that allow people to monitor the water available in their borewells could be the first step to nudge them to manage aquifers responsibly. These could be the catalyst for bringing about behavioural changes.
