

GOVERNANCE

e-GOVERNANCE – THE SMART WAY FORWARD

MODULE - 6

MONITORING AND EVALUATION

1 Monitoring of e-Governance projects should be done by the implementing organization during implementation in the manner in which project monitoring is done for large infrastructure projects.

2 Even after the project has been implemented, constant monitoring would be required to ensure that each component is functioning as per the design.

3 Evaluation of success or failure of e-Governance projects may be done by independent agencies on the basis of parameters fixed beforehand.

INSTITUTIONAL FRAMEWORK FOR COORDINATION AND SHARING OF RESOURCES/ INFORMATION

- 1 The Departments of Information Technology at the Union and State Government levels should provide institutional support to other departments and organizations in implementation of e-Governance projects identified and conceptualized by them.

INSTITUTIONAL FRAMEWORK FOR COORDINATION AND SHARING OF RESOURCES/ INFORMATION

2 The DIT should focus on the following:

- i** Conducting an **e-preparedness audit** for each organization.
- ii** Enforcing **standardization**.
- iii** Assisting in co-ordination when e-Governance projects transcend an organisation's functional domain.
- iv** Carrying out **evaluation** of e-Governance projects.

v Acting as a repository of best practices and encouraging horizontal replication of successful projects.

vi Helping in selection of technological solutions.

INSTITUTIONAL FRAMEWORK FOR COORDINATION AND SHARING OF RESOURCES/ INFORMATION

- 3** The Second Schedule to the Government of India Allocation of Business Rules, 1961 may be suitably amended to incorporate these elements with regard to the subject matter of 'e-Governance'.

सत्यमेव जयते
Government Of India

PUBLIC-PRIVATE PARTNERSHIP (PPP)

- 1 Several components of e-Governance projects lend themselves to the Public-Private Partnership (PPP) mode. In all such cases (PPP) should be the preferred mode.
- 2 The private partner should be selected through a transparent process. The roles and responsibilities of government as well as the private partner should be clearly laid down in the initial stage itself, leaving no room for any ambiguity.

MISSION MODE PROJECT ON COMPUTERISATION OF LAND RECORDS

- 1** Surveys and measurements need to be carried out in a mission mode utilizing modern technology to arrive at a correct picture of land holdings and land parcels and rectification of outdated maps.
- 2** This needs to be accompanied by an analysis of the existing mechanism for updating land records - which varies from State to State - to be supplanted by an improved and strengthened mechanism which ensures that all future transactions in titles are immediately reflected in the land records.

MISSION MODE PROJECT ON COMPUTERISATION OF LAND RECORDS

3 Such a system should be able to **detect changes in titles** through various means - namely, succession, will, partition, gift, survivorship etc. and **update records accordingly**.

4 The **dispute resolution mechanism** with regard to land titles needs to be strengthened in order to be compatible with the demands made on it.

5 In case of urban areas, a similar exercise needs to be undertaken especially since measurements and surveys have not been done in many of such areas and even record of titles is not available in most cities.

PASSPORT & VISA MMP

- 1 The entire passport issue process needs to be put on an e-Governance mode in phases.
- 2
 - As the processes which precede and follow the police verification have already been re-engineered and put in e-Governance mode, this may be integrated with online police and citizen identification data bases.
 - In the mean time, the process of police verification should be streamlined and made time bound.

UNIQUE NATIONAL IDENTITY NUMBER/CARD

- 1 The proposed Unique ID Authority should evolve a database of UIDs on the basis of permanent identifiers such as date of birth, place of birth etc.

LEGAL FRAMEWORK FOR E-GOVERNANCE

- 1 A clear road map with a set of milestones should be outlined by Government of India with the ultimate objective of transforming the citizen-government interaction at all levels to the e-Governance mode by 2020.
- 2 This may be enshrined in a legal framework keeping 'in consideration the mammoth dimension of the task, the levels of required coordination between the Union and State Governments and the diverse field situations in which it would be implemented.

LEGAL FRAMEWORK FOR E-GOVERNANCE

3 The legal framework should, inter alia, include provisions regarding:

i Definition of e-Governance, its objectives and role in the Indian context

ii Parliamentary oversight mechanism

iii Mechanism for co-ordination between government organizations at Union and State levels

iv Role, functions and responsibilities of government organizations with regard to e-Governance initiatives, especially business process re-engineering

v Financial arrangements

LEGAL FRAMEWORK FOR E-GOVERNANCE

3 vi Specifying the requirements of a strategic control framework for e-Government projects dealing with the statutory and sovereign functions of government

vii Framework for digital security and data protection

viii Responsibility for selection and adoption of standards and interoperability framework
