National Institute of Disaster Management

Home Minister

National Disaster Response Force

INSTITUTIONAL FRAMEWORK AT STATE LEVEL

- 1** The DM Act, mandates that each State Government shall take necessary steps for integration of measures for prevention of disasters or mitigation into state development plans, allocation of funds, and establish Early Warning Systems (under NDMP)
- 2** As per the DM Act of 2005, each state in India shall have its own institutional framework for disaster management and shall prepare its own Disaster Management Plan.
- 3** As per the DM Act, each State Government shall establish a State Disaster Management Authority (SDMA) with the Chief Minister as the Chairperson.
- 4** For the UT of Delhi, the Lieutenant Governor and the Chief Minister shall be the Chairperson and Vice-Chairperson respectively.
- 5** In case of other UTs, the Lieutenant Governor or the Administrator shall be the Chairperson of that Authority.

STATE DISASTER MANAGEMENT AUTHORITY (SDMA)

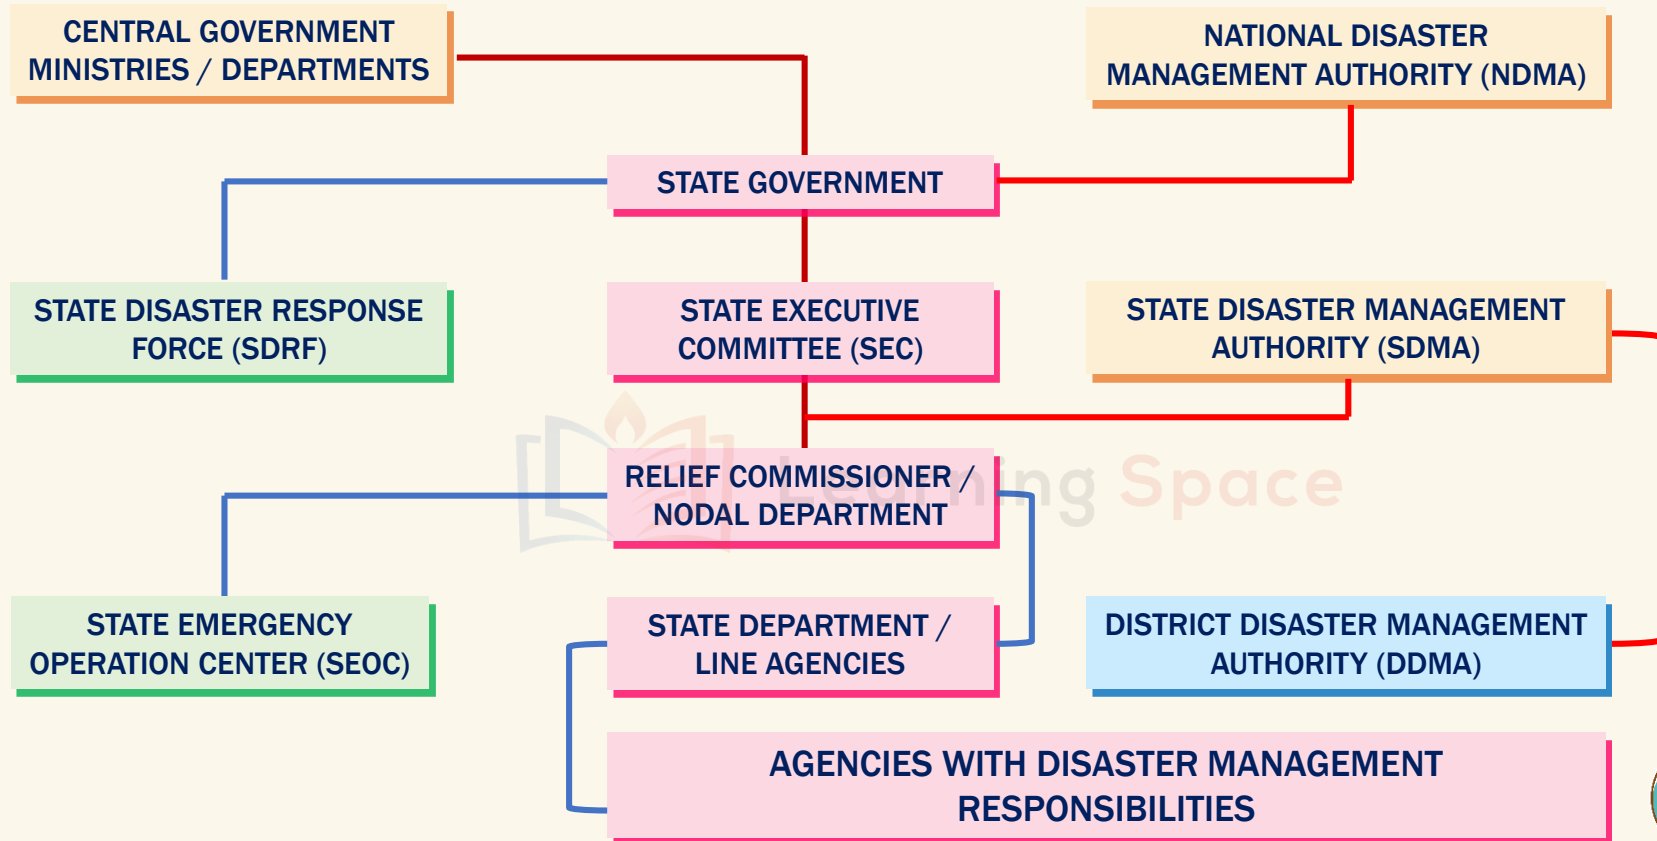

STATE EXECUTIVE COMMITTEE KEY ROLES

- The State Governments constitute a State Executive Committee (SEC), headed by the Chief Secretary, to assist the SDMA in the performance of its functions.
- The SEC will coordinate and monitor the implementation of the National Policy, the National Plan, and the State Plans for disaster management.
- It will also provide information to the NDMA relating to different aspects of disaster management

STATE LEVEL DISASTER MANAGEMENT COORDINATION MECHANISM

DISTRICT DISASTER MANAGEMENT AUTHORITY (DDMA)

- 1 As per provisions of the NDM Act, each State Government establishes a District Disaster Management Authority for every district in the State.

- 2 At the district level, District Disaster Management Authority (DDMA), headed by the District Collector/District Magistrate, is responsible for overall coordination of the disaster management efforts and planning.
- 3 The State Government appoints an officer not below the rank of Additional Collector/Additional District Magistrate of the district to be the Chief Executive Officer of the District Disaster Management Authority.
- 4 The DDMA prepares the Disaster Management plan for the District and monitors its implementation. It also ensures that the guidelines laid down by the NDMA and the SDMA are followed by all the district-level offices.

DISTRICT DISASTER MANAGEMENT AUTHORITY (DDMA)

LOCAL AUTHORITIES

- 1** The local authorities constitute of Panchayati Raj Institutions (PRI), Municipalities, District and Cantonment Boards, and Town Planning Authorities.
- 2** These bodies control and manage civic services and ensure capacity building of their employees for managing disasters.
- 3** They are also responsible for carrying out relief, rehabilitation and reconstruction activities in the affected areas.
- 4** They are also involved in the preparation of their disaster management plans as per the national and state guidelines

FINANCIAL ARRANGEMENTS UNDER NDM ACT, 2005

NATIONAL DISASTER RESPONSE FUND

- It is a fund managed by the Central Government for meeting the expenses for emergency response, relief and rehabilitation.
- If the requirement of funds for relief operations is beyond the funds available in the State Disaster Response Fund account, additional Central assistance is provided from National Disaster Response Fund.

STATE DISASTER RESPONSE FUND

- The SDRF is used only for meeting the expenditure for providing immediate relief to the victims of disasters.
- The state-specific disasters within the local context in the State, which are not included in the notified list of disasters, are also eligible for assistance from State Disaster Response Fund.

FINANCIAL ARRANGEMENTS UNDER NDM ACT, 2005

NATIONAL DISASTER MITIGATION FUND

- 1** The objective of creation of National Disaster Mitigation Fund (NDMF) is for the projects exclusively for the purpose of mitigation.
- 2** The projects are already served by the existing Centrally Sponsored Schemes / Central Sector (CS) Schemes such as Pradhan Mantri Krishi Sinchai Yojana, National Mission on Sustainable Agriculture, Namami Gange-National Ganga plan, Water Resource Management etc.

The National Disaster Mitigation Fund (NDMF) has not been set up at present as there are sufficient schemes to take care of mitigation measures in different projects and the need for creation of separate NDMF has not been felt.

THE NATIONAL DISASTER MANAGEMENT PLAN, 2016

- The Vision of the Plan is to “Make India disaster resilient, achieve substantial disaster risk reduction, and significantly decrease the losses of life, livelihoods, and assets – economic, physical, social, cultural and environmental
- It provides a framework and direction to the government agencies for all phases of disaster management cycle.
- The plan specifies who is responsible for what at different stages of managing disasters.

DISASTER MANAGEMENT

MAJOR HIGHLIGHTS OF THE NATIONAL DISASTER MANAGEMENT PLAN, 2016

TIME FRAME ENVISAGED IN THE NDMP

SHORT-TERM (T1)	T1 (2022)		
MEDIUM-TERM (T2)	T1/T2	T2(2027)	
LOG-TERM (T3)	T1/T2/T3	T2/T3	T3(2030)

- 1 For each hazard, the approach used in this national plan incorporates the four priorities enunciated in the Sendai Framework
- 2 It covers all phases of disaster management: Prevention, Mitigation, Response and Recovery and covers human induced disasters like chemical, nuclear etc.
- 3 It plans for short medium and long run respectively 5, 10, and 15 years to deal with disasters. The implementation of the measures in the plan must be completed within the short (T1), medium (T2), and long-term (T3), ending by 2022, 2027, 2030 respectively

MAJOR HIGHLIGHTS OF THE NATIONAL DISASTER MANAGEMENT PLAN, 2016

- 4** It is designed in such a way that it can be implemented in a scalable manner in all phases of disaster management.

- 5** The plan has a regional approach, which will be beneficial not only for disaster management but also for development planning.
- 6** Ministries are given role for specific disasters e.g. Ministry of Earth Sciences is responsible for Cyclones
- 7** It identifies major activities such as early warning, information dissemination, medical care, fuel, transportation, search and rescue, evacuation, etc. to serve as a checklist for agencies responding to a disaster.

SOME MAJOR DISASTERS AND THE RESPONSIBLE NODAL MINISTRIES

	DISASTER	NODAL MINISTRY
1	Avalanches	Ministry of Defence (MOD) – Border Road Organisation (BRO)
2	Cyclone	Ministry of Earth Sciences (MOES)
3	Drought	Ministry of Agriculture and Farmers Welfare (MAFW)
4	Earthquake	Ministry of Earth Sciences (MOES)
5	Industrial and Chemical	Ministry of Environment, Forests and Climate Change (MEFCC)
6	Urban Floods	Ministry of Housing and Urban Affairs (MHUA)
7	Landslides	Ministry of Mines (MOM)
8	Biological Emergencies	Ministry of Health and Family Welfare (MAFW)

INTERNATIONAL COOPERATION

SENDAI FRAMEWORK FOR DISASTER REDUCTION 2015-30

OVERVIEW

- The Sendai Framework was adopted at the Third UN World Conference in Sendai, Japan, on March 18, 2015.
- It is the successor instrument to the Hyogo Framework for Action 2005-2015.
- It is a non-binding agreement, which the signatory nations, including India, will attempt to comply with on a voluntary basis.
- The Sendai Framework, the Sustainable Development Goals 2015 – 2030 in September, and the UNCOP21 Climate Change (Paris Accord) have a common theme in all the three global agreements that looks into post 2015 agenda.

ACTION AREAS

- Understanding Disaster Risk using relevant data and information
- Strengthening disaster risk governance such as national and local platforms for disaster risk reductions
- Investing in disaster risk reduction for resilience including finance and logistics
- Enhancing disaster preparedness for effective response and to “**Build Back Better**” in recovery, rehabilitation and reconstruction

United Nations Office for Disaster Risk Reduction (UNISDR) was created in 1999 to implement UN Disaster Risk Reduction strategy.

WHY SENDAI FRAMEWORK FOR DISASTER REDUCTION 2015-30 IS SO SIGNIFICANT?

- 1** For the first time the goals are defined in terms of outcome-based targets instead of focusing on sets of activities and actions.
- 2** It places governments at the center of disaster risk reduction with the framework emphasizing the need to strengthen the disaster risk governance.
- 3** In addition to social vulnerability, it pays considerable attention to environmental aspects through a strong recognition that the implementation of integrated environmental and natural resource management approaches is needed for disaster reduction
- 4** It places almost equal importance on all kinds of disasters and not only on those arising from natural hazards.
- 5** There is significant shift from earlier emphasis on disaster management to addressing disaster risk management itself by focusing on the underlying drivers of risk.
- 6** Disaster risk reduction, more than before, is seen as a policy concern that cuts across many sectors, including health and education

The shift in ideology from managing disasters to getting better prepared for the risk of any disaster

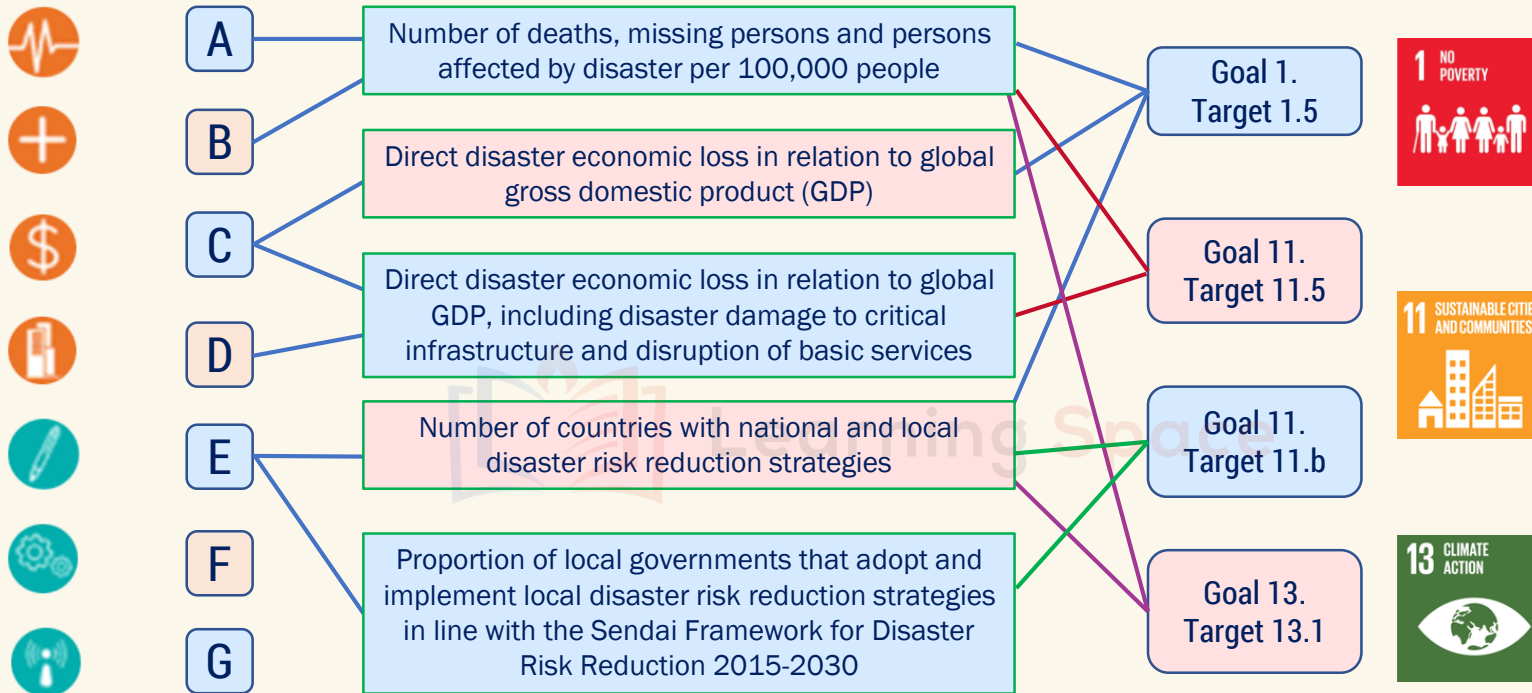

SEDAI FRAMEWORK FOR DISASTER RISK REDUCTION 2015-2030

DISASTER MANAGEMENT

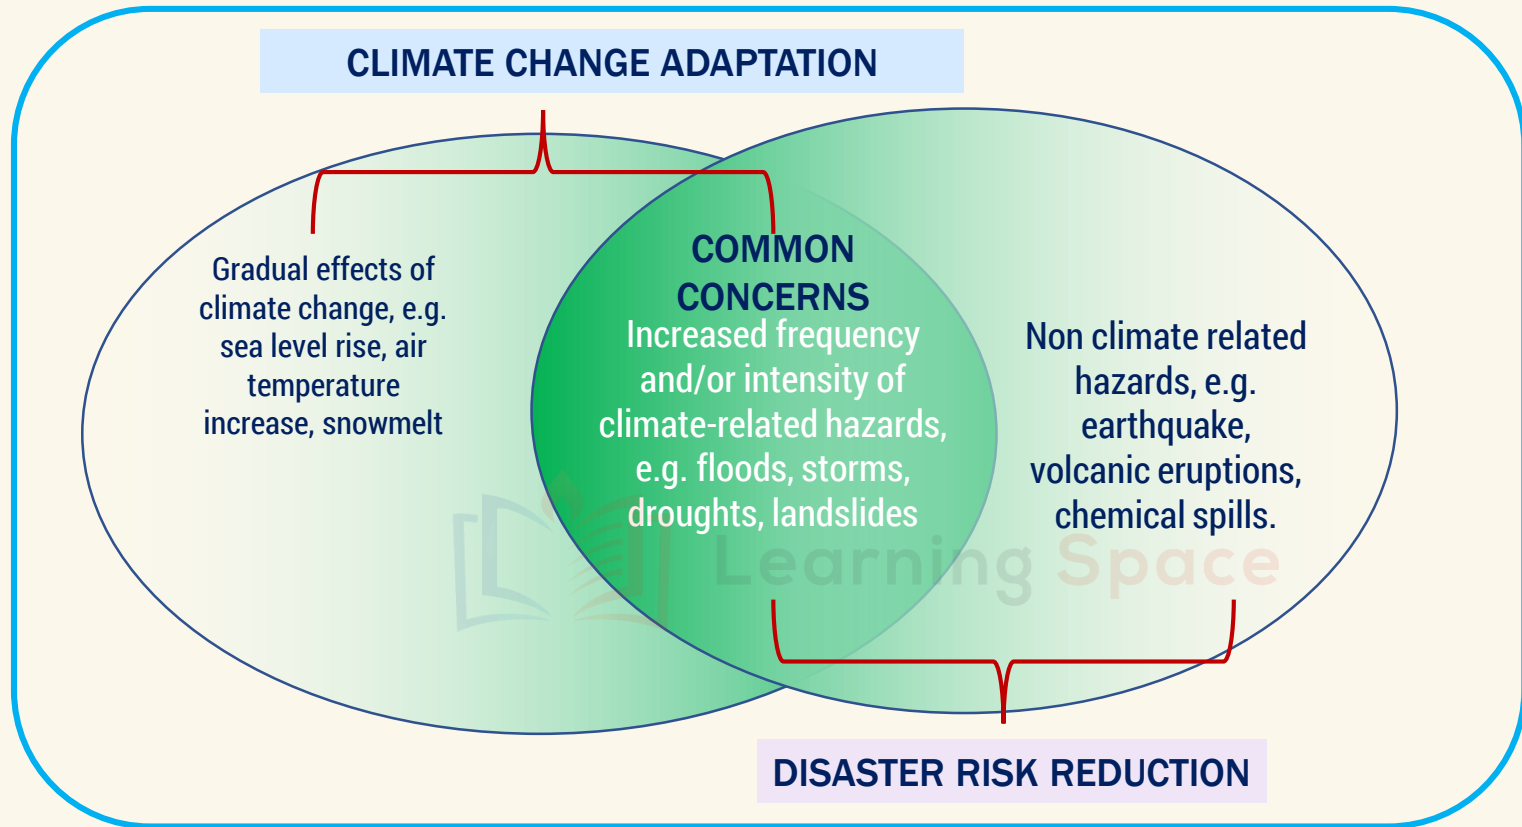

SUSTAINABLE DEVELOPMENT GOALS

COHERENCE AND MUTUAL REINFORCEMENT OF SDGs AND SENDAI FRAMEWORK

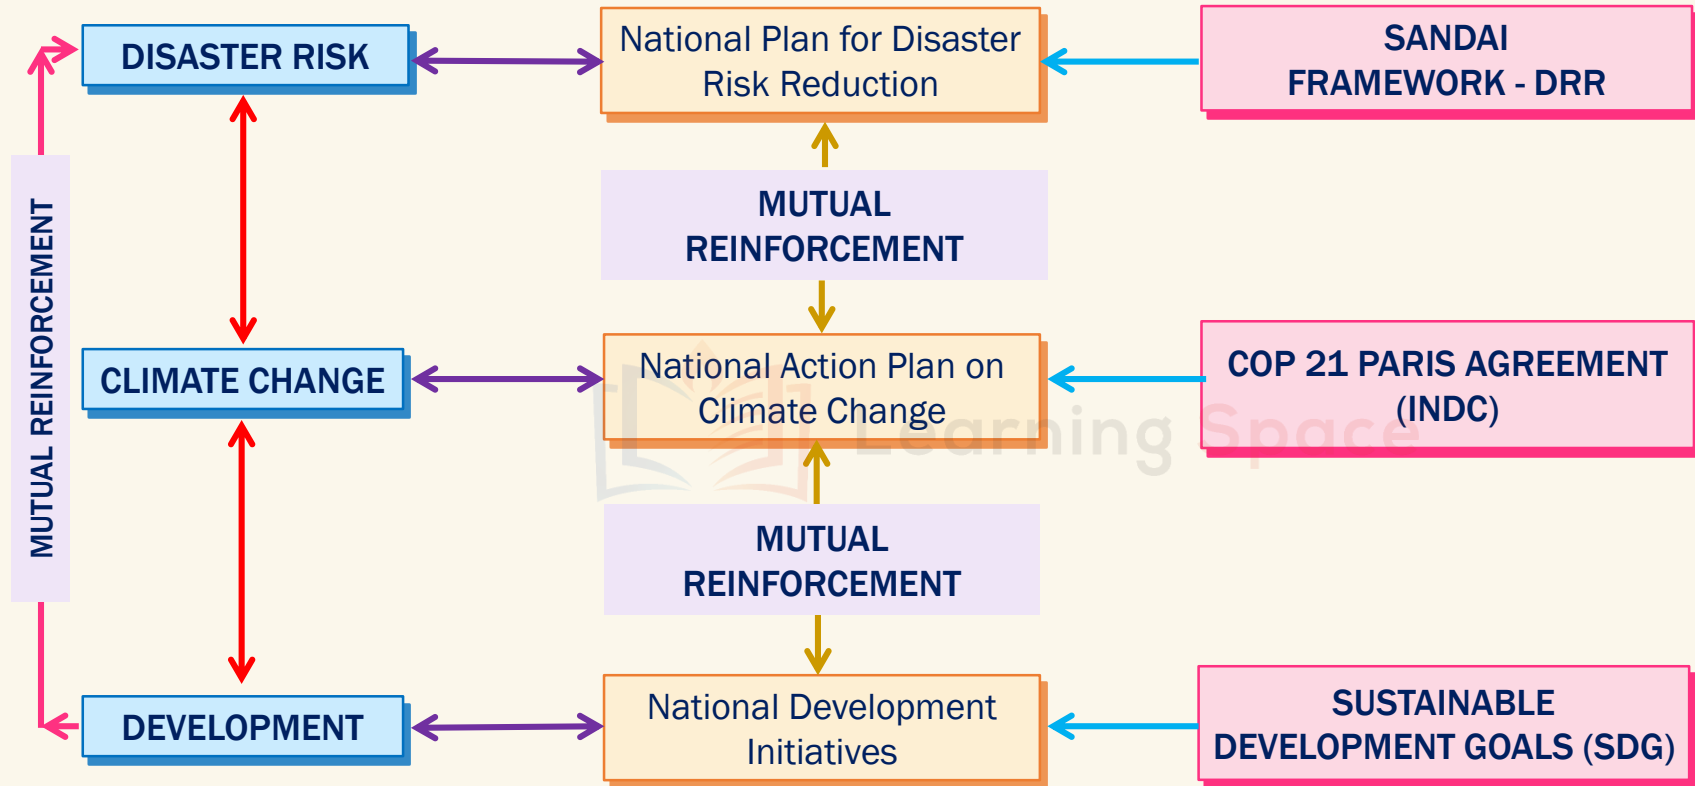

COHERENCE AND MUTUAL REINFORCEMENT OF COP 21 AND SENDAI FRAMEWORK

COHERENCE AND MUTUAL REINFORCEMENT OF THREE GLOBAL FRAMEWORKS WITHIN NATIONAL INITIATIVES

WHY DISASTER RISK MANAGEMENT IS MORE STRESSED THAN DISASTER MANAGEMENT?

- 1 DRR and resilience are recurring common themes in the three global agreements.
- 2 All three agreements share a common aim of making development sustainable.

- 3 The most significant shift recognised in the Sendai Framework is a strong emphasis on disaster risk management in contrast to disaster management.
- 4 These three agreements recognize the desired outcomes in DRR as a product of complex and interconnected social and economic processes, which overlap across the agendas of the three agreements.
- 5 Intrinsic to sustainable development is DRR and the building of resilience to disasters. Further, effective disaster risk management contributes to sustainable development.

RELATED QUESTIONS THAT CAN BE ANSWERED AFTER READING THE MODULE

- 1** Disaster management has evolved into a multipronged approach for disaster risk reduction and mitigation . Examine
- 2** Discuss the structure of the State Disaster Management Mechanism. (Or) Compare the key roles between Central and State Disaster Management Mechanism.
- 3** What is disaster risk and how is it evaluated? Why disaster risk management is more stressed than disaster management?
- 4** Disaster Risk Reduction and resilience are recurring common theme in the three global agreements to Sendai Framework for Disaster Risk Reduction, the Sustainable Development Goals 2015-2030 and the Paris Agreement on Climate Change at COP-21. Justify the statement.
