A COMPREHENSIVE COVERAGE

MODULE - 11

WETLANDS - 4

- Keoladeo National Park also known as the Bharatpur Bird Sanctuary in Rajasthan is a famous bird sanctuary.
- Due to its strategic location in the middle of **Central Asian migratory flyway** and presence of water, it is one of the major wintering areas for large numbers of migratory birds from Afghanistan, Turkmenistan, China and Siberia.
- Around 366 species of birds, including the rare Siberian Crane, have been recorded in the park.
- The sanctuary is one of the richest bird areas in the world and is known for nesting of resident birds and visiting migratory birds.
- It is also a **UNESCO World Heritage Site**.
- Keoladeo is a man-made and man-managed wetland. The wetlands of Keoladeo are not natural, they are dependent on the monsoon and on water pumped in from outside.
- The park consists of dry grasslands, woodlands and swamps. These diverse habitats are home to 366 bird species.

LOKTAK LAKE

- Loktak lake is the largest freshwater lake in NE India.
- It contains unique Phumdis. Phumdis are floating islands, exclusive to the Loktak Lake.
- They cover a substantial part of the lake. They are masses of vegetation, soil and organic matter, in different stages of decay.
- The largest phumdi is in the southeastern part of the lake, covering an area of 40 km². This constitutes the world's only floating national park, named Keibul Lamjao National Park.
- The Keibul Lamjao National Park is a national park in the state of Manipur. It is 40 km² in area. It is the only floating park in the world, it is part of Loktak Lake. The park was formed to preserve the endangered deer known as Sangai.

WETLANDS INTERNATIONAL

- Wetlands International is a global NGO that works to sustain and restore wetlands and their resources.
- It is an independent, not-for-profit organization, supported by governments and businesses from around the world.
- Wetlands International's work ranges from research, advocacy and engagement with governments, corporate and international policy fora and conventions.

NATIONAL PLAN FOR CONSERVATION OF AQUATIC ECOSYSTEMS (NPCA)

- NPCA was launched in 2013 by merging two erstwhile schemes viz. National Lake Conservation Plan (NLCP) and National Wetlands Conservation Programme (NWCP) to run a single integrated programme.
- It was launched as a centrally sponsored scheme with Central and State Government sharing cost in 70:30 ratio (90:10 for North East States).
- The main objectives of the new scheme are holistic conservation & restoration of lakes & wetlands for achieving – water quality enhancement, besides improvement in biodiversity and the ecosystem.

NATIONAL PLAN FOR CONSERVATION OF AQUATIC ECOSYSTEMS (NPCA)

- In 2019, the Government has identified 130 wetlands for priority restoration in the next five years and asked states to submit their respective integrated management plan.
- Each of these wetlands will be restored under NPCA.
- Apart from this, the government also proposed the concept of 'Wetland Health Card' to be introduced to monitor the entire ecosystem based on multiple parameters.
- In order to increase community engagement, the government declared to form 'Wetland Mitras' (the group of self-motivated individuals) for taking care of the identified wetlands across the country.
