MAJOR MISSIONS OF OTHER COUNTRIES

MARS 2020 MISSION OF NASA

- Mars 2020 is a Mars rover mission by NASA that includes the Perseverance rover and the Ingenuity helicopter drone.
- It was launched on 30 July 2020 and will touch down on Mars on 18 February 2021.
- Perseverance will investigate Mars surface geological processes and history, including the assessment of its past habitability, the possibility of past life on Mars, and the potential for preservation of biosignatures within accessible geological materials.

MAJOR MISSIONS OF OTHER COUNTRIES

MARS 2020 MISSION OF NASA

- The Perseverance rover's design is derived from the Curiosity rover.
- The Curiosity rover has been a huge success. After landing on Mars in 2012, the rover has lasted much longer than the original design life (3045 Earth days), and has travelled farther on Mars (23 km) than any robot before it.
- Mars 2020 was the third of three space missions sent toward Mars during the July 2020 Mars launch window, with missions also launched by the national space agencies of the United Arab Emirates (Hope orbiter) and China (Tianwen-1, with an orbiter, lander, and rover).

United Arab Emirates

وكالة الإمارات للفضاء
UAE SPACE AGENCY

All three are expected to arrive at Mars in February 2021.

HOPE ORBITER (UAE)

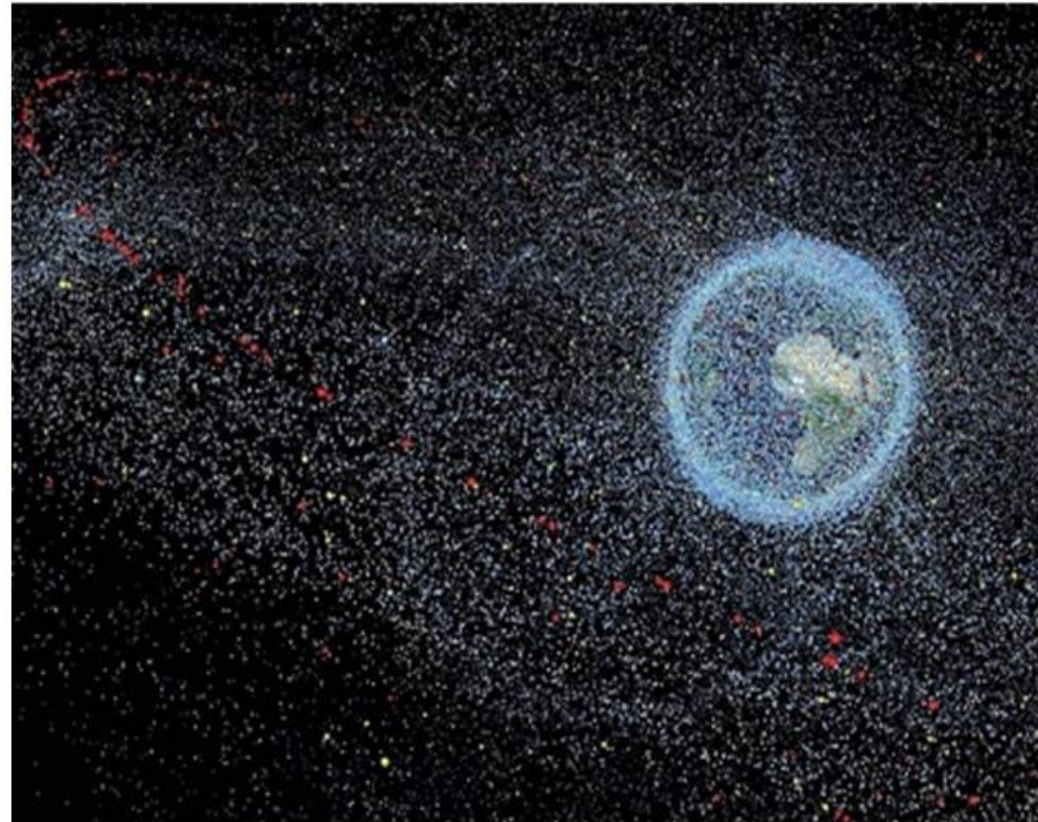

TIANWEN-1 (CHINA)

MAJOR MISSIONS OF OTHER COUNTRIES

SPACE DEBRIS

- Space debris consists of old satellites, their parts and fragments from collisions. Used upper stages of rockets are a significant source of space debris.
- It is estimated that there are several thousands of large artificial bodies in the orbit around the earth including operational satellites. There are millions of smaller objects.
- Collision with debris has become a major hazard for satellites.
