A COMPREHENSIVE COVERAGE

MODULE – 45

SCIENCE AND TECHNOLOGY INNOVATION POLICY 2013

SCIENCE AND TECHNOLOGY INNOVATION POLICY 2013

AIM To make India one of the top five global scientific powers by 2020.

THE KEY FEATURES OF THE STI POLICY 2013

- **Promoting the spread of scientific temper amongst all sections of society.**
- Making careers in science, research and innovation attractive enough for talented and bright minds.
- **Establishing world class infrastructure for R&D** for gaining global leadership in some select frontier areas of science.
- **Linking contributions of Science Research and innovation system with the inclusive economic growth agenda** and combining priorities of excellence and relevance.

SCIENCE AND TECHNOLOGY INNOVATION POLICY 2013

AIM To make India one of the top five global scientific powers by 2020.

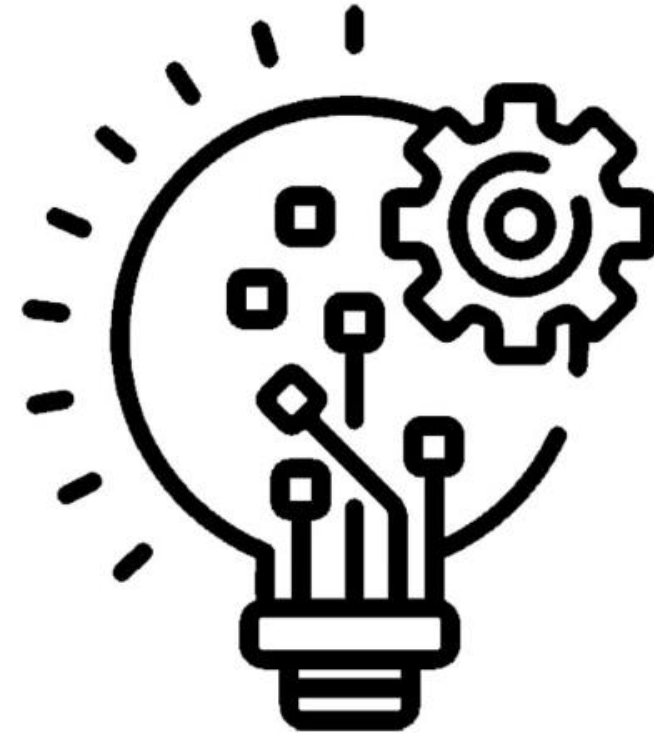

THE KEY FEATURES OF THE STI POLICY 2013

- **Creating an environment for enhanced private sector participation in R&D.**
- Enabling conversion of R & D outputs with societal and commercial applications.
- Supporting S&T based high risk innovations.
- Fostering resource optimized **cost-effective innovations.**
- Creating a mechanism where innovations are respected and rewarded.
- **Creating a robust national innovation system.**

ASPIRATIONS OF THE POLICY

- Raising Gross Expenditure in Research and Development to 2% from the present 1% of the GDP by encouraging enhanced private sector contribution.
- **Increasing the number of Full Time R&D personnel in India by at least 66% of the present strength in 5 years.**
- Increasing accessibility, availability and affordability of innovations, especially for women, differently abled and disadvantaged sections of society.

ASPIRATIONS OF THE POLICY

- **Many mechanisms are envisaged** to be deployed **to realize the policy aspirations**, some of the mechanisms are:
 - ✓ Promoting **establishment of large R&D facilities in PPP mode** with provisions for co-sharing IPRs generated under PPP.
 - ✓ **Permitting multi stakeholders participation in R&D system.**
 - ✓ Treating R&D in the private sector at par with public institutions for availing public funds. And establishing sound mechanisms of R&D funding.
 - ✓ **Modifying IPR policy** to provide for March-in-Rights for social good when supported by public funds.
 - ✓ Creating provisions for **sharing of IPRs between inventors and investors.**

ASPIRATIONS OF THE POLICY

MARCH-IN-RIGHTS

- These rights give the federal government the **right to grant other entities licenses or give licenses to themselves** if the government aided the owner of a patent with funding.
- This **allows the government to grant a license to even the patent owner's competitor** if the government feels it is necessary to do so.
