

ETHICS, INTEGRITY & APTITUDE

MODULE – 28

EMOTIONAL INTELLIGENCE

EMOTIONAL INTELLIGENCE

To put civil services values into practise,
Civil Servants need Emotional Intelligence.

EMOTIONAL INTELLIGENCE

The Industrial Societies in present times only recognise success. To attain success, individuals.

- Go through Struggle to reach top position and retain those positions in competition.
- Expects an individual to be efficient all the time(to best of their abilities) which results in profit maximization.

- But it leads to uncertainties like
 - No peace of mind – No presence of mind- Inefficiency in work – get rejected or go through depression and pressure
- Earlier IQ is the major parameter to assess an individual.

Pressure leads to:

- Abuse of others
- Damage human relations
- Life style diseases.

- 1 Modern industrial societies are characterized by high levels of insecurity and uncertainty.
- 2 It has become difficult and almost impossible for people to perform to best of their abilities always.
- 3 Capitalism has no place for inefficient resources. Failure to perform results in negative emotions like frustration, anger, fear, uncertainty and depression.
- 4 This will further reduce performance levels. It is the service sector dominating the GDPs of countries around the world since 1980s.

5 Since 1990s, the rise of service sector necessitated to deals with humans – EI became necessary.

6 Efficiency of organisation in service sector depends on the ability of human resources. Leadership has found it difficult to motivate their employees.

7 Organizations have recognized the fact that intelligence is necessary but not sufficient to ensure or maximize the efficiencies of their employees. What is needed is Emotional Intelligence.

8 The reality is that Happiness should be source but not destination. Happiness gives success.

Emotional Intelligence comprised of a broad range of abilities, including

- awareness of one's own emotions,
- the ability to regulate moods,
- the recognition of emotion in others,
- the ability to motivate oneself in the face of frustration,
- the ability to control impulses and delay gratification and
- the ability to empathize.

COMPONENTS OF EI

1.SELF-AWARENESS

- **Complete awareness** about our true self emotions, feelings and sentiments.

2.SELF-REGULATION

- **Regulating our emotions** . Eg: Never make promise when you are happy and never make promise when you are angry.
- **Anger(against exploitation)** can always be used as constructive emotion.
- **Anger Management**: Show anger for sake of people and organization but not to impact oneself.

3.EMPATHY

- **Empathy**

COMPONENTS OF EI

4. MOTIVATION

- When we feel **deficiency** of particular need, **we expect to move** (from existing position)
- You will move when you are not **satisfied with existing position**.
- Services – Rewards (needs) – security.

- **Internal** – Challenges for being honest – penalised
- **External** – Rewards and awards. Eg : Organizations – promotions, increments and salaries, awards.

5. SOCIAL SKILLS

- **Policy implementation** – need broad consensus – use communication skills to ensure board consensus.
- **Participation of stake holders** (Output gets transformed to outcomes)
Eg : Swachh Bharat Abhiyan is criticised because of **absence of participation**. Role models are not sincere.
- **Convince Political Executive** : **Lakhs of Crores being spent** on loss making industries can be spent on health and education.

ETHICS, INTEGRITY & APTITUDE

NEED OF EMOTIONAL INTELLIGENCE

1 Emotional Intelligence contributes to about 80% of the factors that predict life success because it reflects how a person applies knowledge to the immediate situation.

2 Individuals with high Emotional Intelligence are poised, outgoing and cheerful. They have Empathy for others, express their feelings directly but appropriately, and have a capacity for developing relationships.

3 The capacity to understand and decipher emotions is correlated with choosing and succeeding in a meaningful line of work as well as with success in building lasting and significant relationships.

4 This is not just true of adults. Adolescent who have more advance emotional abilities show lower stress levels, fewer signs of aggression and demonstrate a smaller likelihood of involvement with drugs and alcohol.

MAX WEBER'S BUREAUCRATIC THEORY OF ORGANIZATION

- 1 Max Weber, a German sociologist had come out with his bureaucratic theory of organization as a solution to the problems faced by Germany in the early part of 20th Century.
- 2 It had capitalism, GDP and PCI were very high. Industrialism took place. But it was facing problems on political and administrative fronts. There was lot of political instability in Germany during this period.
- 3 In administration, they had spoils system i.e., people were appointed to positions of power on the basis of their proximity to political executive.
- 4 Administration was characterized by high levels of corruption, nepotism, favouritism, personal biases and prejudices. There was complete absence of rule of law.
- 5 Max Weber had come out with a solution to problems faced by Germany with his bureaucratic theory of organization.

FEATURES OF THEORY OF BUREAUCRATIC
ORGANIZATION (STATUS QUOSST MINDSET)

1. Recruitment on basis of merit through open competitive examinations.
2. Complete separation of individual income from organization assets.
3. Bureaucrats are paid regular salaries for the work they do. They can't own assets of organization.
4. Scientific training.
5. Rationality
6. Political and value neutrality.
7. Impersonal detachment – Relationship based on Hierarchy, not personal.
8. Hierarchy
9. Written communication – To fix accountability on part of bureaucrat who gives orders.
10. Rules and Regulations.
11. Sphere of competence.
12. Anonymity.

HIERARACHY

1

- Relation between superior and subordinate in organization. Superior has authority to give orders and subordinate has responsibility to implement orders.

2

- No organization can survive without hierarchy (Almost all Societies are Hierarchical).

RATIONALITY

“Selecting right kind of instruments to achieve desired ends”.

EMOTIONAL INTELLIGENCE

Ensure stability & continuity

- a
 - Because Germany at that time has already witnessed Industrial revolution,
 - Became a developed society, Capitalistic needs (Political stability and Policy continuity)
 - No major changes were required
 - b
 - **Instruments** : Rules and Regulations
In letter and spirit = Rule of Law that enables rationality.

EMOTIONAL INTELLIGENCE

OBJECTIVE OF WEBERIAN BUREAURACY

c Rationality calls for Political neutrality and Value neutrality.

1 They must sacrifice personal values in favour of organizational rationality. Must implement decisions taken by organization. Eg: Rules to collect land from farmers for SEZ by district collector has to be done.

2 Weberian bureaucratic theory of organization proved to be extremely successful, especially in developed countries.

3 Value neutral bureaucracy was able to strictly implement rules and regulations. It could achieve the objective of stability and continuity.

4 Immediately after 2nd World War, most of the countries got independence from their imperial masters.

5 Because of centuries of exploitation, these countries suffered in the form of high levels of poverty, backwardness, unemployment, illiteracy and others.

OBJECTIVE OF WEBERIAN BUREAURACY

6 They were in need of rapid growth and development. Developed countries provided financial assistance and also suggested Weberian bureaucracies as part of state led development.

7 Most of the countries adopted for Weberian bureaucratic structures for their administrative systems. But by 1990s, they had completely failed.

8 State centric bureaucracy dominated development process had failed to bring about socio-economic transformation, raising questions about applicability of Weberian bureaucratic model in developing nations.

EMOTIONAL INTELLIGENCE

 Learning Space

- 9 It is believed that a value neutral bureaucracy can't be an efficient instrument to bring about socio-economic transformation.
- 10 What is needed is Emotional Intelligence. Bureaucracy must have empathy, Social skills, internal motivation, self-awareness and regulation to become successful.

- 11** Value neutral bureaucracy can be an efficient instrument to perform regulated functions like maintenance of law and order and generation of revenue. But for development administration what is required is value committed bureaucracy for which EI is essential.
- 12** Bureaucracy norms should be replaced with democratic values which arise from EI.

CONFLICT

BUREAUCRATIC ATTITUDES	DEMOCRATIC VALUES (Needs Emotional Intelligence)
Rule orientation	Outcome orientation
Stability and continuity	Change with continuity (stability in India Status quo like poverty, illiteracy, unemployment etc.). Socio-economic transformation is needed
Based on high levels of secrecy	Transparency and openness
Importance to hierarchy	Participatory decision making irrespective of hierarchical levels
Centralization of power	Decentralization of power

CONFLICT

BUREAUCRATIC ATTITUDES	DEMOCRATIC VALUES (Needs Emotional Intelligence)
Value neutrality	Value commitment
Economy and efficiency	Effectiveness and equity
Reactive or inactive	Proactive and dynamic bureaucracy
Political neutrality	Commitment to ideals of Constitution
Only morally responsible	Legally accountable to citizens
Treat people as subjects to be governed	People should be treated as citizens to be empowered.

Regulatory Functions – Bureaucratic Attitudes

Development Functions – Democratic Values

1 Both are necessary to ensure effective functioning of bureaucracy.

2 Bureaucratic attitudes are necessary to perform regulatory functions whereas democratic values are essential to perform developmental functions for which EI is the base.
