INFRASTRUCTURE

Nagarjuna Sagar Dam

INFRASTRUCTURE

Infrastructure is the provision of services, which include roads, railways, ports, airports, dams, power stations, oil and gas pipelines, telecommunication facilities. It also includes schools, colleges, health system including hospitals, clean drinking water, sanitation, banking, insurance, financial institutions etc.

THE STATE OF INFRASTRUCTURE AT THE TIME OF INDEPENDENCE

- 1 At the time of independence, India's infrastructure was abysmally at poor state.
- 2 British developed only railway lines basically to further their own interests.
- 3 At the time of independence, around 85-90% people were living in villages, but the rural infrastructure, both economic as well as social were abysmally in poor state.
- 4 Agrarian economy suffered badly because of poor road infrastructure in rural areas.
- 5 Schools and hospitals were almost non-existent in rural areas.

All together, the development of infrastructure like Railways by the British only to further their interests.

ECONOMY

INFRASTRUCTURE

1

ECONOMIC

Internal facilities of a country that make business activity possible, such as communication, transportation, and distribution networks, financial institutions and markets, and energy supply systems.

2

SOCIAL

Social Infrastructure is a subset of the infrastructure sector and typically includes assets that accommodate social services. Examples are schools, hospitals, prisons and community housing, water supply, sanitation etc.

3

FINANCIAL

Financial infrastructure is the set of institutions that enable effective operation of financial intermediaries. This includes such elements as payment systems, credit information bureaus etc.

1

ECONOMIC INFRASTRUCTURE

1. ELECTRICITY

Even after 70 years of independence, we couldn't achieve universal access to electricity and government's plan is now to ensure 100% electrification of villages by 1st May, 2018.

1

ECONOMIC INFRASTRUCTURE

1. ELECTRICITY

1

ECONOMIC INFRASTRUCTURE

2. ROADS

**PRADHAN MANTRI
GRAM SADAK YOJANA**

Lot of emphasis is being given to improve road infrastructure and the emphasis further got momentum with Pradhan Mantri Gram Sadak Yojana and four laning and 6 laning of highways, since early 2000s.

**National Highway
Authority of India**

1

ECONOMIC INFRASTRUCTURE

2. ROADS

1

ECONOMIC INFRASTRUCTURE

3. RAILWAYS

- Railway infrastructure was substantially developed by the British (though to further their interests) and further development of railways during the past 70 years after independence is not up to the mark.
- We are yet to see high speed railway lines as well as bullet trains. Bullet trains have recently been conceptualized for the first time between Mumbai and Ahmedabad.

1

ECONOMIC INFRASTRUCTURE

3. RAILWAYS

1

ECONOMIC INFRASTRUCTURE

4. PORTS

12 major ports are under the Ministry of Shipping, Government of India and we are yet to develop world class ports and our port infrastructure is not commensurate with world class ports like Singapore, Rotterdam (Netherlands), Antwerp (Belgium) etc.

4. PORTS

1

ECONOMIC INFRASTRUCTURE

5. AIRPORTS

- Most of the hinterland is not connected with air infrastructure and recent Regional Connectivity Scheme is one such **a step in this direction**.
- In recent times, world class airports are developed for e.g. **Delhi, Hyderabad and Bengaluru**.

1

8. TELECOM

2

FINANCIAL INFRASTRUCTURE

1. BANKING SECTOR

- Indian Banking Sector developed satisfactorily. Rural penetration also took place considerably with regional rural banks, co-operative banks extending to rural areas.
- Moreover, Indian Banking System is quite robust and withstood the failures across the world like 2008 financial crisis.

2

FINANCIAL INFRASTRUCTURE

2. INSURANCE SECTOR

Life Insurance made **substantial gains** with **state monopoly** by LIC. The goal of universal life insurance is yet to be ensured. **PMJJBY**, **PMSBY** are in this direction.

**Pradhan Mantri
Suraksha Bima Yojana**

2

FINANCIAL INFRASTRUCTURE

BANKING SECTOR

INSURANCE SECTOR

2

FINANCIAL INFRASTRUCTURE

3. MISCELLANEOUS

BHARATIYA RESERVE BANK
NOTE MUDRAN (P) LTD.

- In recent times lot of emphasis is being given for **development of financial institutions** at par with world class standards and overall our financial system is now commensurate with best standards across the world.
- Capital markets, money markets are well developed whereas debt markets are yet to be developed.

3

SOCIAL INFRASTRUCTURE

1. SCHOOLS

- The penetration of schools in rural areas is substantial and with the emphasis by the Central Government through Sarva Shiksha Abhiyan. Schools were established even in remote areas.
- But the biggest problem is the quality of education and lot more needs to be done to improve the quality of education.

SOCIAL INFRASTRUCTURE

3

SOCIAL INFRASTRUCTURE

2. HOSPITALS

- The penetration of hospitals to rural areas happened in some states and the biggest problem is maintaining the quality of services as well as the availability of medicines and secondary care is mostly concentrated in district head quarters as well as big towns.
- Tertiary care is available mostly in Metros
- Almost 65% of the expenditure for health is out of pocket expenditure and this is the biggest worry.

3

SOCIAL INFRASTRUCTURE

2. HOSPITALS

1

PRIMARY HEALTH CARE

- ✓ It is normally at **village level**/small town level.
- ✓ It includes **education** concerning prevailing health problems and methods of identifying, preventing and controlling them.
- ✓ The main focus is on **immunisation**, maternal, child health, proper nutrition and availability of essential drugs etc.
- ✓ **Auxiliary Nurse Midwife (ANM)** is the first person, who provides primary health care in rural areas.

3

SOCIAL INFRASTRUCTURE

2. HOSPITALS

2

SECONDARY HEALTH CARE

These are the hospitals which have better facilities for surgery, X-ray, ECG etc.

3

SOCIAL INFRASTRUCTURE

2. HOSPITALS

3

TERTIARY HEALTH CARE

3

TERTIARY HEALTH CARE

- The hospitals which have advanced equipment and medicines and undertake all the complicated health problems come under the tertiary sector.
- These are super specialty hospitals available mostly in Metro cities.

3

SOCIAL INFRASTRUCTURE

3. WATER SUPPLY AND SANITATION

- Provision of **potable drinking water** could be ensured to the **majority of the villages in the country**.
- Now the Government is giving more emphasis for **Open Defecation Free** with the **construction of toilets**.
- The biggest problem is **proliferation of slums** in urban areas as more and more people are **migrating to urban centers** in search of employment.

3

SOCIAL INFRASTRUCTURE

3. WATER SUPPLY AND SANITATION

3

SOCIAL INFRASTRUCTURE

4. COURTS

OVERALL INFRASTRUCTURE STATUS IN OUR COUNTRY

- To attract investment, we could not create world class infrastructure in our country. Since 2000, some effort is being made.
- Substantial progress has been made during the past 70 years in creating infrastructure in rural areas, but a lot more needs to be done in improving the quality of infrastructure especially social infrastructure like schools, hospitals etc.
- Moreover, because of migration to urban areas, provision of social infrastructure is becoming the biggest challenge for the governments of the day.

Overall, lot more needs to be done to create infrastructure to the world class standards
